**Nutritionism** Gyorgy Scrinis, 2013-06-18 Popularized by Michael Pollan in his best selling *In Defense of Food* Gyorgy Scrinis's concept of nutritionism refers to the reductive understanding of nutrients as the key indicators of healthy food an approach that has dominated nutrition science dietary advice and food marketing Scrinis argues this ideology has narrowed and in some cases distorted our appreciation of food quality such that even highly processed foods may be perceived as healthful depending on their content of good or bad nutrients Investigating the butter versus margarine debate the battle between low fat low carb and other weight loss diets and the food industry's strategic promotion of nutritionally enhanced foods Scrinis reveals the scientific social and economic factors driving our modern fascination with nutrition Scrinis develops an original framework and terminology for analyzing the characteristics and consequences of nutritionism since the late nineteenth century He begins with the era of quantification in which the idea of protective nutrients caloric reductionism and vitamins curative effects took shape He follows with the era of good and bad nutritionism which set nutricentric dietary guidelines and defined the parameters of unhealthy nutrients and concludes with our current era of functional nutritionism in which the focus has shifted to targeted nutrients superfoods and optimal diets Scrinis's research underscores the critical role of nutrition science and dietary advice in shaping our relationship to food and our bodies and in heightening our nutritional anxieties He ultimately shows how nutritionism has aligned the demands and perceived needs of consumers with the commercial interests of food manufacturers and corporations Scrinis also offers an alternative paradigm for assessing the healthfulness of foods the food quality paradigm that privileges food production and processing quality cultural traditional knowledge and sensual practical experience and promotes less reductive forms of nutrition research and dietary advice

**Heart Seizures** John Saltwick,2019-08-08 If you are a male over fifty five slightly

overweight out of shape and hooked on a diet of greasy foods you are a prime candidate for coronary artery disease CAD If you are female over sixty in menopause with similar conditions weigh more than you should less than in shape and prone to eating whatever you want without concern of fat content you too are a prime candidate for CAD Statistically you are now in a group with a high probability of contracting some heart or blood pressure related affliction And it doesn't have to be I know What follows is my twenty plus year chronicle of living with diagnosed coronary artery disease I did not have to be a candidate for CAD and neither should you If I knew then before I suffered my first heart attack what I know now I would not have had that first heart attack and the eventual triple bypass operation You can rise above the statistics that one half of the population will sometime in their life be a diagnosed with CAD With conscious thought and daily management you too can defy the odds of contracting a heart related affliction namely a heart attack If you have had a heart attack and pulled through there is life afterward a good life in fact A well managed life filled with tomorrows without chest pains is attainable You can live more than the generally accepted projection of six years between heart seizure events heart attacks There is no mysterious formula Understanding CAD is of first and foremost important And that's what this book is about The more you know about the heart and coronary artery disease and its causes and effects the more likely you will minimize the chance of ever having a heart attack or another heart attack again As I say in the book if I knew then what I know now I would not have had the initial heart attack and probably not the triple bypass surgery years later So isn't it time to take a hold of your life Do it now You will enjoy the benefits
