Soaring With The Schweizers The Fifty Year History Of Their Aviation Adventures:

Soaring With the Schweizers William Schweizer, 1991 *Dreams of Flight* Janet Rose Daly Bednarek, Michael H. Bednarek, 2003 General aviation encompasses all the ways aircraft are used beyond commercial and military flying private flights barnstormers cropdusters and so on Authors Janet and Michael Bednarek have taken on the formidable task of discussing the hundred year history of this broad and diverse field by focusing on the most important figures and organizations in general aviation and the major producers of general aviation aircraft and engines This history examines the many airplanes used in general aviation from early Wright and Curtiss aircraft to the Piper Cub and the Lear Jet The authors trace the careers of birdmen birdwomen barnstormers and others who shaped general aviation from Clyde Cessna and the Stinson family of San Antonio to Olive Ann Beech and Paul Poberezny of Milwaukee They explain how the development of engines influenced the development of aircraft from the E 107 that powered the 1929 Aeronca C 2 the first affordable personal aircraft to the Continental A 40 that powered the Piper Cub and the Pratt and Whitney PT 6 turboprop used on many aircraft after World War II In addition the authors chart the boom and bust cycle of general aviation manufacturers the rising costs and increased regulations that have accompanied a decline in pilots the creation of an influential general aviation lobby in Washington and the growing popularity of type clubs created to maintain aircraft whose average age is twenty eight years This book provides readers with a sense of the scope and richness of the history of general aviation in the United States An epilogue examining the consequences of the terrorist attacks on September 11 2001 provides a cautionary note

Fogel, Craig S. Harwood, 2012-10-11 The Wright brothers have long received the lion s share of credit for inventing the airplane But a California scientist succeeded in flying gliders twenty years before the Wright s powered flights at Kitty Hawk in 1903 *Quest for Flight* reveals the amazing accomplishments of John J Montgomery a prolific inventor who piloted the glider he designed in 1883 in the first controlled flights of a heavier than air craft in the Western Hemisphere Re examining the history of American aviation Craig S Harwood and Gary B Fogel present the story of human efforts to take to the skies They show that history s nearly exclusive focus on two brothers resulted from a lengthy public campaign the Wrights waged to profit from their aeroplane patent and create a monopoly in aviation Countering the aspersions cast on Montgomery and his work Harwood and Fogel build a solidly documented case for Montgomery s pioneering role in aeronautical innovation As a scientist researching the laws of flight Montgomery invented

basic methods of aircraft control and stability refined his theories in aerodynamics over decades of research and brought widespread attention to aviation by staging public demonstrations of his gliders After his first flights near San Diego in the 1880s his pursuit continued through a series of glider designs These experiments culminated in 1905 with controlled flights in Northern California using tandem wing Montgomery gliders launched from balloons These flights reached the highest altitudes yet attained demonstrated the effectiveness of Montgomery s designs and helped change society s attitude toward what was considered the impossible art of aerial navigation Inventors and aviators working west of the Mississippi at the turn of the twentieth century have not received the recognition they deserve Harwood and Fogel place Montgomery s story and his exploits in the broader context of western aviation and science shedding new light on the reasons that California was the epicenter of the American aviation industry from the very beginning
