Social and Interpersonal Dynamics in Pain Tine Vervoort, Kai Karos, Zina Trost, Kenneth M. Prkachin, 2018-07-18 This groundbreaking analysis moves our knowledge of pain and its effects from the biomedical model to one accounting for its complex psychosocial dimensions Starting with its facial and physical display pain is shown in its manifold social contexts in the lifespan in a family unit expressed by a member of a gender and or race and as observed by others These observations by caregivers and family are shown as vital to the social dynamic of pain as observers react to sufferers pain and as these reactions affect those suffering The book s findings should enhance practitioners understanding of pain to develop more effective individualized treatments for clients pain experience and inspire researchers as well Among the topics covered Why do we care Evolutionary mechanisms in the social dimension of pain When how and why do we express pain On the overlap between physical and social pain Facing others in pain why context matters Caregiving impact upon sufferers cognitive functioning Targeting individual and interpersonal processes in therapeutic interventions for chronic pain Social and Interpersonal Dynamics in Pain will be a valuable resource for clinicians who deal in pain practice and management as well as for students and researchers interested in the social interpersonal and emotional variables that contribute to pain the processes with which pain is associated and the psychology of pain in general *Anthropology and Public Health* Robert A. Southern California Practitioner, 1911 **Pain and Its Transformations** Sarah Coakley, Kay Kaufman Shelemay, 2007 As neuroscientific research shows even the immediate sensation of pain is shaped by psychological state and interpretation Many individuals and cultures find meaning particularly religious meaning even in chronic and inexplicable pain This interdisciplinary book includes not only essays but also discussions among a wide range of specialists

Rethinking Diabetes Emily Mendenhall, 2019-07-15 In *Rethinking Diabetes* Emily Mendenhall investigates how global and local factors transform how diabetes is perceived experienced and embodied from place to place Mendenhall argues that the link between sugar and diabetes overshadows the ways in which underlying biological processes linking hunger oppression trauma unbridled stress and chronic mental distress produce diabetes The life history narratives in the book show how deeply embedded these factors are in the ways diabetes is experienced and reproduced among poor communities around the world *Rethinking Diabetes* focuses on the stories of women living with diabetes near or below the poverty line in urban settings in the United States India South Africa and Kenya Mendenhall shows how women's experiences of living with diabetes cannot be dissociated from their social responsibilities of caregiving demanding family roles expectations and gendered experiences of violence that often displace their ability to care for themselves first These case studies reveal the ways in which a global story of diabetes overlooks the unique social political and cultural factors that produce syndemic diabetes differently across contexts From the case studies *Rethinking Diabetes* clearly provides some important parallels for scholars to consider significant social and economic inequalities health systems that are a mix of public and private with substandard provisions for low income patients and rising diabetes incidence and prevalence At the same time Mendenhall asks us to unpack how social cultural and epidemiological factors shape people's experiences and why we need to take these differences seriously when we think about what drives diabetes and how it affects the lives of the poor

Gonsalves,Anna T. Danielsson,2020-04-24 This Edited Volume engages with concepts of gender and identity as they are mobilized in research to understand the experiences of learners teachers and practitioners of physics The focus of this collection is on extending theoretical understandings of identity as a means to explore the construction of gender in physics education research This collection expands an understanding of gendered participation in physics from a binary gender deficit model to a more complex

understanding of gender as performative and intersectional with other social locations e.g. race, class, LGBT status, ability etc. This volume contributes to a growing scholarship using sociocultural frameworks to understand learning and participation in physics and that seeks to challenge dominant understandings of who does physics and what counts as physics competence. Studying gender in physics education research from a perspective of identity and identity construction allows us to understand participation in physics cultures in new ways. We are able to see how identities shape and are shaped by inclusion and exclusion in physics practices, discourses that dominate physics cultures and actions that maintain or challenge structures of dominance and subordination in physics education. The chapters offered in this book focus on understanding identity and its usefulness in various contexts with various learner or practitioner populations. This scholarship collectively presents us with a broad picture of the complexity inherent in doing physics and doing gender. California Medical Journal

,1903 **Handbook of Working with Children, Trauma, and Resilience** Aida Alayarian, 2018-05-08. This book is a psychoanalytic discussion of the effects of trauma and torture on children with a specific focus on how professionals can use an approach focused on resiliency rather than vulnerability to help the child reach wellbeing. Aida Alayarian argues that in a world where the torture, maltreatment, and neglect of children shamefully persist, it is incumbent upon all of us to intervene appropriately to put a stop to it. Whether in conference rooms developing a more comprehensive policy to hold perpetrators accountable or working in clinics where traumatised children and their families seek help, the question of how we act to improve the opportunity for recovery in children and young people subjected to such inhumane treatment should be our primary concern. *Handbook of Working with Children, Trauma, and Resilience* discusses this salient issue drawing on psychoanalytic perspectives of the effects of trauma on children and looking specifically at the case of refugee children and families. Understanding challenging behaviour in traumatised children and the effects of refugee experience on families can help all concerned to offer more appropriate and effective support. **California State Journal of Medicine**, 1921

Analysing the History of British Social Welfare Jonathan Parker, 2024-04-09. This book offers insights into the development of social welfare policies by exploring the interconnections between policies and practice throughout history. It challenges tacitly accepted arguments that favour particular approaches to welfare such as conditionality and eligibility. It provides examples of enduring social assumptions which influence the way we perform social welfare such as the equivocal position of women in social welfare and the unintended consequences of reforms such as Universal Credit. By identifying continuities in welfare policy, practice, and thought, it offers the potential for the development of new thinking, policy making, and practice.
