## **Social Change In A Peripheral Society The Creation Of A Balkan Colony:**

*Social Change in a Peripheral Society* Daniel Chirot, 1976 *Social Change in a Peripheral Society A History of the Balkans 1804-1945* Stevan K. Pavlowitch, 2014-09-25 The Balkans have often been a flashpoint of conflict in European history The recent civil war has torn the country apart and the region faces an uncertain future This authoritative study provides an account of the history of the whole area from the first major nationalist rising against its Ottoman rulers in 1804 to the aftermath of World War II Covering the former Yugoslavia Albania Greece Bulgaria and Romania it provides a Balkan wide overview as well as histories of specific states and sets the context to the recent conflict **Society and Economy in Early**

**Modern Europe, 1450-1789** Barry Taylor, 1989 *History of the Balkans: Volume 2* Barbara Jelavich, 1983-07-29 This volume concentrates on the Balkan wars and World War II focusing particularly on Bulgaria Greece Montenegro Romania and Serbia since 1945 **The Psychology of Personal Constructs** George Kelly, 2002-09-26 First published in 1992

Unavailable for many years this is a reissue of George Kelly's classic work It is the bible of personal construct psychology written by its founder The first volume presents the theory of personal construct psychology Migration, Class and Transnational Identities Val Colic-Peisker, 2010-10-01 Val Colic Peisker harnesses concepts and theories from sociology anthropology and political science to compare the vastly different experiences of two Croatian immigrant cohorts in the city of Perth Western Australia The populations explored represent an earlier group of working class migrants arriving from communist Yugoslavia from the 1950s to 1970s and a later group of urban professionals arriving in the 1980s and 1990s as independent or skills based migrants This latter group integrated into professional ranks but also used their Australian experience as a stepping stone in becoming part of a highly mobile global professional middle class Employing a refined theoretical analysis this rich ethnography challenges the domination of the ethnic perspective in migration studies and the idea of ethnic community itself It emphasizes the importance of class focusing on the intersection of class ethnicity and gender in the process of migration migrant incorporation and transnationalism In theorizing the connection of the two migrant cohorts with their native Croatia the study introduces concepts of ethnic and cosmopolitan transnationalism as two distinctive experiences mediated by class **State Formation in Wallachia, 1740-1800** Vasile Mihai Olaru, 2024-12-21

This book explores the transformation of the state in Wallachia an Ottoman tributary principality between 1740 and 1800 by focusing on three administrative techniques regulations paperwork registers identification certificates and weights and measures The implementation by the central power of regulations bookkeeping certificates and standard units of measurement was not smooth but it nevertheless heralded the beginning of the struggle against localism and the efforts to extend the boundaries of legitimate state action The author challenges the mostly Romanian historiography of the Phanariot period which has portrayed the state as a set of institutions undertaking certain responsibilities and has insisted almost exclusively on its extractive function and abusive character Instead this book takes a closer look at how the Wallachian state

functioned examining how its means of interacting with its subjects changed in the second half of the eighteenth century Rethinking the problem of the state in eighteenth century Wallachia traditionally regarded as a mere instrument of Ottoman domination it claims that it was precisely during this time that the bases of modern statehood were laid in a context defined by imperial rivalries Ottoman Habsburg Russian in the region Making the case for state formation in the absence of preparation for war the author also stresses in contrast to recent contributions that decentre the state the need to study the process whereby the effect of state coherence is produced While focusing on Wallachia this book provides valuable reading for those interested in early modern administrative and legal history the history of state formation and Southeast European history more generally **Islam and the Orientalist World-system** Khaldoun Samman,Mazhar Al-Zo'by,2015-11-17 Featuring Immanuel Wallerstein Joseph Massad Marnia Lazreg and other well known and emerging new authors this book seeks a more accurate understanding of Islam and Islamic societies role and relations to global cultural and economic realities The book confronts a trend today of analyzing Islam as a cultural system that stands outside of and even predates modernity The authors see this trend as part of a racist discourse unaware of the realities of contemporary Islam Islamic societies today are products of the world capitalist system and cannot be understood as being separate from its forces The authors offer a more carefully constructed and richer portrait of Islamic societies today and forcefully challenge the belief that Islam is not part of nor much affected by the modern world system **Abyssinia's Samuel Johnson** Wendy Laura Belcher,2012-06-01 Uncovers African influences on the Western imagination during the eighteenth century paying particular attention to the ways Ethiopia inspired and shaped the work of Samuel Johnson Governance Beyond the Law Abel Polese,Alessandra Russo,Francesco Strazzari,2019-03-29 This volume explores the continuous line from informal and unrecorded practices all the way up to illegal and criminal practices performed and reproduced by both individuals and organisations The authors classify them as alternative subversive forms of governance performed by marginal and often invisible peripheral actors The volume studies how the informal and the extra legal unfold transnationally and in particular how and why they have been are being progressively criminalized and integrated into the construction of global and local dangerhoods how the above mentioned phenomena are embedded into a post liberal security order and whether they shape new states of exception and generate moral panic whose ultimate function is regulatory disciplinary and one of crafting practices of political ordering **Cultural Politics in Greater Romania** Irina Livezeanu,2018-08-06 Since the fall of the Ceausescu regime Romanian politics have been haunted by unresolved issues of the past Irina Livezeanu examines a critical chapter in Eastern European history the trajectory of the aggressive nationalism that dominated Romania between the world wars **Economic Sociology** Arthur L. Stinchcombe,2013-10-02 Economic Sociology introduces the student to the main conceptions of economic sociology illustrates the application of the concepts and theories of economic sociology and critiques the growing literature that uses economic sociology in the explanation of macroscopic social phenomena mostly deriving

from the Marxist tradition The book features chapters that discusses the ecological analysis of societies how economic objectives get translated into requirements on social relations the basic structure of claims on the flow of benefits from economic enterprises the reproduction of relations of production and the general problem of creating a set of roles for new generations to occupy in such a way as to reproduce the basic structure of the economic system and the shaping of the flow of children s socialization and placement and of adult careers so that the roles will be filled The text will be interesting to political scientists economists and historians

**Unintended Nations** Alex R. Tipei, 2025-08-31 In the wake of Napoleon s defeat in 1815 French liberals set out to create an informal empire Their efforts to cultivate unequal partnerships with Christian Greek speaking elites in southeast Europe shaped national identities and structured global civilizational hierarchies over the decades that followed Unintended Nations tracks a notion of civilization that developed in early nineteenth century France Alex Tipei explores the constellation of ideas beliefs and practices this concept invoked what she calls civilization speak and charts the cross continental networks that employed it as an organizing principle Drawing on archival and printed primary sources in six languages Tipei maps out the uses of this civilization speak on both sides of the continent focusing on France and the lands that make up significant parts of present day Greece and Romania She shows how and why French liberals mobilized civilization speak to offering an innovative analysis of liberalism and capitalism s relationship to informal empire Calling into question long standing assumptions about the rise of nationalism in southeast Europe Unintended Nations explores how Franco Balkan exchanges helped define political civilizational and biopolitical boundaries in the post Napoleonic era

Defending the Rights of Others Carole Fink, 2006-11-02 This study of the period from 1878 to 1938 explores international minority protections

The Road to Disillusion: From Critical Marxism to Post-communism in Eastern Europe Raymond C. Taras, 2015-02-24 The history of reform movements in postwar Eastern Europe is ultimately ironic inasmuch as the reformers successes and defeats alike served to discredit and demoralize the regimes they sought to redeem The essays in this volume examine the historic and present day role of the internal critics who whatever their intentions used Marxism as critique to demolish Marxism as ideocracy but did not succeed in replacing it Included here are essays by James P Scanlan on the USSR Ferenc Feher on Hungary Leslie Holmes on the German Democratic Republic Raymond Taras on Poland James Satterwhite on Czechoslovakia Vladimir Tismaneanu on Romania Mark Baskin on Bulgaria and Oskar Gruenwald on Yugoslavia In concert the contributors provide a comprehensive intellectual history and a veritable Who s Who of revisionist Marxism in Eastern Europe

Beyond Balkanism Diana Mishkova, 2018-07-17 In recent years western discourse about the Balkans or balkanism has risen in prominence Characteristically this strand of research sidelines the academic input in the production of western representations and Balkan self understanding Looking at the Balkans from the vantage point of balkanism has therefore contributed to its further marginalization as an object of research and the evisceration of its agency This book reverses the perspective and looks at the Balkans primarily inside out from within the

Balkans towards its self and the outside world where the west is important but not the sole referent The book unravels attempts at regional identity building and construction of regional discourses across various generations and academic subcultures with the aim of reconstructing the conceptualizations of the Balkans that have emerged from academically embedded discursive practices and political usages It thus seeks to reinstate the subjectivity of the Balkans and the responsibility of the Balkan intellectual elites for the concept and the images it conveys The book then looks beyond the Balkans inviting us to rethink the relationship between national and transnational self representation and the communication between local and exogenous Western Central and Eastern European concepts and definitions more generally It thus contributes to the ongoing debates related to the creation of space and historical regions which feed into rethinking the premises of the new area studies Beyond Balkanism The Scholarly Politics of Region Making will interest researchers and students of transnationalism politics historical geography border and area studies **Modern Romania** Tom

Gallagher,2005-06 Since the 1989 fall of Communism in Eastern Europe Romania arguably the most regimented of states in the Soviet bloc has struggled with the transition from totalitarian state to democratic nation In this insightful examination of modern Romania Tom Gallagher provides an overview of Romania s unique political and social history focusing on both its national identity as well as the legacy of Soviet rule Gallagher provides an in depth look at Romania since 1989 focusing on the government s attempts at economic reform engagement with democracy problems with corruption among the ruling elite as well as the weakness of civil society and the resilience of implacable expressions of nationalism Ultimately Gallagher argues that thus far democracy has essentially failed in Romania In fact he warns that Romania is on its way to becoming one of the most unequal states in Europe and quite possibly a future trouble spot unless efforts to resume much needed reforms are undertaken **The Nationalist Dilemma** Marvin Suesse,2023-05-11 Nationalists think about the economy Marvin

Suesse argues and this thinking matters once nationalists hold political power Many nationalists seek to limit global exchange but others prioritise economic development The potential conflict between these two goals shapes nationalist policy making Drawing on historical case studies from thirty countries from the American Revolution to the rise of China this book paints a broad panorama of economic nationalism over the past 250 years It explains why such thinking has become influential despite the internal contradictions and chequered record of many nationalist policy makers At the root of economic nationalism s appeal is its ability to capitalise upon economic inequality both domestic and international These inequalities are reinforced by political factors such as empire building ethnic conflicts and financial crises This has given rise to powerful nationalist movements that have decisively shaped the global exchange of goods people and capital **The Industrial Revolution in World History** Peter N Stearns,2018-04-17 The industrial revolution was the single most important development in human history over the past three centuries and it continues to shape the contemporary world With new methods and organizations for producing goods industrialization altered where people live how they play and even

how they define political issues By exploring the ways the industrial revolution reshaped world history this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact In the fourth edition noted historian Peter N Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West including the study of India the Middle East and China In addition an expanded conclusion contains an examination of the changing contexts of industrialization The Industrial Revolution in World History is essential for students of world history and economics as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times      **The Oxford Handbook of Economic**

**Imperialism** Zak Cope,Immanuel Ness,2022 Including thirty four chapters written by academics and experts in the field of international political economy The Oxford Handbook of Economic Imperialism examines the history of economic imperialism from the early modern age to the present The Handbook demonstrates the persistence of economic imperialism in today s postcolonial world and the enduring control wielded by great powers even after the end of formal empire Moreover the Handbook reveals how emerging powers are expanding economic control in new geographic and geopolitical contexts and highlights the significance of economic imperialism in the structures relations processes and ideas that sustain poverty and conflict worldwide
