Social Class And Health Status:

Social Class and Health Status D. L. Crombie, 1984 This is not a summary of the black report The problems have been examined from the more localized and parochial view of working general practitioners Differences in health status between groups of individuals are just differences They become inequalities only if the differences result from disadvantage Seven statements can be made which transform the rather pessimistic assessment contained in the black report Notwithstanding the persistent relative disparity between the health status of social class 5 compared with social class 1 Improved health for all is one thing Equal opportunities for health for all is another To expect that equal health status can be achieved by all is unrealistic
