Social Cognition European Monographs In Social Psychology:

Social Context and Cognitive Performance Jean-Marc Monteil,Pascal Huguet,1999 Based on twenty years of research on the social regulation of academic performances this book offers theoretical and empirical arguments in favour of the inclusion of the social dimension of human beings as essential for their cognitive activities We all engage in social interactions compare ourselves with other people belong to social groups and are the object of a myriad of categorisations Not only do such social experiences affect cognition but they actually determine its form and its content Several experiments indeed reveal that cognitive performance depends on the relationship between the individual and the social context in which cognition takes place And this relationship is not forged directly by features of the situation but rather by personal construals of these features most notably social comparison This fact alone justifies granting the individual s social experiences a psychological status and it further strengthens the key idea of this book namely that the social context only exists through the intervention of cognitive processes of contextualization producing a cognitive context of the self such as those involved in autobiographical memory A social psychology of cognition is suggested in which the fashionable distinction between cognition and social cognition makes no sense From this innovative perspective it is indeed more the social nature of the individual rather than that of the object to be processed that defines the social nature of cognition Well known phenomena such as social facilitation and social loafing as well as established educational practices are also re examined from this perspective **Social Cognition** ,1976 *Social-Cognitive Development in Context* Felicisima C. Serafica,2015-06-19 The relationship between the cognitive and social spheres of human functioning and their context has long been regarded by social and behavioural scientists as a central theoretical issue By the early 1980s a number of empirical studies had further elucidated the nature of this relationship but no attempt had been made to present a coherent picture of the research and developments in this increasingly popular area of study Originally published in 1982 the topics covered in this book filled the gap admirably They present a view of the development of aspects of the self and of self other relations and how these two lines of development interact within a given context All the contributions attempt to portray the child s developing awareness of the self in relation to the social world but all consider it from different perspectives and in varying degrees of detail This useful collection by a number of well known contributors should still be of great value to students of developmental and social psychology Psychology Library Editions: Social Psychology Various,2021-07-09 Psychology Library Editions Social Psychology 30 volume set brings together an eclectic mix of titles from a wealth of authors with diverse backgrounds seeking to understand human behaviour and interaction from a socio psychological perspective The series of previously out of print titles originally published between 1908 and 1993 includes those from some authors considered to be founders of social psychology and traces the development of the subject from its early foundations Social Cognition Joseph P. Forgas,1981-01-01 Development According to Parents W. Andrews Collins,Jacqueline J. Goodnow,2014-01-02 To their

everyday life with children parents bring a number of ideas about development and about parenting Some of these ideas are about their own children and about themselves as parents Others are more general ideas for instance about what babies are like how children change with age what kinds of affection and control they need the responsibilities of mothers and fathers or the degree of influence each parent has over the way a child develops Moreover the ideas that parents hold shape their actions with children and the way they assess both their children and their own performance as parents With the recognition of parental thinking as a powerful factor in family life research has turned to the study of this everyday or informal psychology Some of the studies deal with the nature of parents ideas What ideas are held Which are most widely shared How do these ideas differ from one another Some deal with the sources of parents ideas with the factors that give rise to differences among parents from different backgrounds different cultures different economic groups different degrees of experience with children Others concentrate on the consequences of parents ideas for themselves and for children This monograph summarizes the research with an eye to several audiences researchers clinicians educators and with an emphasis on the questions that remain A major goal is to point not only to significant gaps but also to some specific ways in which they might be addressed by further research **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), **Outsider Designations and Boundary Construction in the New Testament** Paul R. between identity and behavior norms and b the potential group dynamic effects of this imagination The result is a demonstration of how Ephesians is able to create a coherent narrative beginning with God s agency and ending with behavior norms and facilitating psychological and group dynamic effects such as intergroup distinction self esteem cognitive certainty and consensus among group members intragroup cooperation moral judgment and inclusion marginalization motivation to remain committed and last but not least a sense of capacity and obligation to act morally **Psychology and Sociology Applied to Medicine E-Book** Edwin Roland van Teijlingen,Gerald M Humphris,2018-11-29 Now in its fourth edition this definitive and popular introduction to human behaviour in the context of health and illness includes three new chapters many new contributors and a new co editor It is arranged in nine sections to cover the core concepts of psychology and sociology as they apply to medicine The life cycle Development of the person Society and health Preventing illness and promoting health Illness behaviour and the doctor patient encounter Illness and disability Coping with illness and disability Hoe do health services work How do you fit into all this Topics presented as self contained double page spreads Cases throughout to reinforce understanding of important concepts Boxes and discussion points throughout The authors comprise psychologists sociologists and doctors Highly illustrated 48 new contributors New co editor Gerry Humphris 3 new chapters Malnutrition and obesity Urban nature health and well being LGBT Health *Medical and Health Care Books and Serials in Print* ,1986
