**The Social Construction of Global Corruption** Elitza Katarova, 2018-12-06 This book offers new ways of thinking about corruption by examining the two distinct ways in which policy approaches and discourse on corruption developed in the UN and the OECD. One of these approaches extrapolated transnational bribery as the main form of corrupt practices and advocated a limited scope offense, while the other approach tackled the broader structure of the global economic system and advocated curbing the increasing power of multinational corporations. Developing nations, in particular Chile, initiated and contributed much to these early debates, but the US-sponsored issue of transnational bribery came to dominate the international agenda. In the process, the corrupt corporation was supplanted by the corrupt politician, the corrupt public official, and their international counterpart, the corrupt country. This book sheds light on these processes and the way in which they reconfigured our understanding of the state as an economic actor and the multinational corporation as a political actor.

**The Social Construction of Public Administration** Jong S. Jun, 2012-02-01 In this conceptual guided tour of contemporary public administration, Jong S. Jun challenges the limitations of the discipline, which he argues make it inadequate for understanding today's complex human phenomena. Drawing on examples and case studies from both Eastern and Western countries, he emphasizes critical and interpretive perspectives as a counterforce to the instrumental technical rationality that reduces the field to structural and functionalist views of management. He also emphasizes the idea of democratic social construction to transcend the field's reliance on conventional pluralist politics. Jun stresses that public administrators and institutions must create opportunities for sharing and learning among organizational members and must facilitate interactive processes between public administrators and citizens so that the latter can voice their problems and opinions. The future role of public administrators will be to transcend the limitations of the management and governing of modern public administration and to explore ways of constructing socially meaningful alternatives through communicative action and the participation of citizens.
