to put together a considerable amount of unpublished data collected by the co author of most of the chapters Bikram Shrestha which might be useful for other researchers working on snow leopard In addition researchers might find it useful to have a key for determining the diet of snow leopard based on remnants of its food in its scats Last but not least based on the difficulty we experienced trying to compare and combine different sets of results we propose a general methodology for collecting data Thus this book is not an all encompassing compendium but an attempt to fill some gaps in the literature and to show how to publish new data on snow leopard in a useful and workable way The first part describing the main features of snow leopard and its main prey ecology is followed by a comprehensive review of data available on its abundance and threats to its survival The third most extensive part the substance of the book presents new data from 15 years of intensive camera trapping combined with scat sampling These data are analyzed by means of advances GIS and genetic techniques which yields a large amount of conservation implications The purpose of this book is to provide a tool for both environmental managers and researchers to find quickly what is known about this species for conservation planning and for an effective protection of snow leopard However enthusiasts interested in wild cats may welcome the book too *Saving the Snow Leopard* Louise Spilsbury,2023-02-01 The snow leopard is one of Earth s most entrancing creatures yet it is also one of its most threatened Find out why some people are making it their mission to try to save snow leopards and what readers can do to make it their mission too in this call to action series Mission Survival explores why humans are endangering snow leopards and their biomes and how and why some people have devoted their careers to helping save them Some of the world s most beautiful creatures are threatened because of human action Find out why some people are making it their mission to try to save them what kids on a mission are doing to save them and what readers can do to make it their mission too in this call to action series Mission Survival includes case studies that explore the work people are undertaking to save threatened animals and career information that shows children how they can build their own careers in animal conservation *The Snow Leopard* Peter Matthiessen,2022-06-02 **Snow Leopard** Jessica Joe,2020-07-12 Snow Leopard Amazing Facts Pictures
