Richard Peltier,2013-06-29 According to my latest model for the last glacial maximum LGM Grosswald 1988 the Arctic continental margin of Eurasia was glaciated by the Eurasian ice sheet which consisted of three interconnected ice domes the Scandinavian Kara and East Siberian The Kara Sea glacier was largely a marine ice dome grounded on the sea s continental shelf The ice dome discharged its ice in all directions northward into the deep Arctic Basin southward and westward onto the mainland of west central North Siberia the northern Russian Plain and over the Barents shelf into the Norwegian Greenland Sea On the Barents shelf the Kara ice dome merged with the Scandinavian ice dome In the Arctic Basin the discharged ice floated and eventually coalesced with the floating glacier ice of the North American provenance giving rise to the Central Arctic ice shelf Along its southern margin the Kara ice dome impounded the northward flowing rivers causing the formation of large proglacial lakes and their integration into a transcontinental meltwater drainage system Despite the constant increase in corroborating evidence the concept of a Kara ice dome is still considered debatable and the ice dome itself problematic As a result a paleogeographic uncertainty takes place which is aggravated by the fact that a great deal of existing knowledge no matter how broadly accepted is based on ambiguous interpretations of the data most of which are published in Russian and therefore not easily available to western scientists *Encyclopedia of the Arctic* Mark Nuttall,2005-09-23 With detailed essays on the Arctic s environment wildlife climate history exploration resources economics politics indigenous cultures and languages conservation initiatives and more this Encyclopedia is the only major work and comprehensive reference on this vast complex changing and increasingly important part of the globe Including 305 maps This Encyclopedia is not only an interdisciplinary work of reference for all those involved in teaching or researching Arctic issues but a fascinating and comprehensive resource for residents of the Arctic and all those concerned with global environmental issues sustainability science and human interactions with the
