Snowy Brad Collis, 2002 **Immigrant Industry** Anoma Pieris, Mirjana Lozanovska, Dr Alexandra Dellios, Andrew Saniga, 2024-08-02 After the end of the Second World War migrants were critical to the spatial making of modern Australia Major federally funded industries driving postwar nation building programs depended on the employment of large numbers of people who had been displaced by the war Directed to remote rural and urban industrial sites migrant labor and resettlement altered the nation's physical landscape providing Australia with its contemporary economic base While the immigrant contribution to nation building in cultural terms is well known its everyday spatial architectural and landscape transformations remain unexamined This book aims to bring to the foreground postwar industry and immigration to comprehensively document a uniquely Australian shaping of the built environment The A to Z of Australia James C. Docherty, 2010-04 The A to Z of Australia relates the history of this unique and beautiful land which is home to an amazing range of flora and fauna a climate that ranges from tropical forests to arid deserts and the largest single collection of coral reefs and islands in the world Through Utilities Reform in Twenty-First Century Australia Malcolm Abbott, Bruce Cohen, 2021 The book traces the development and consequences of the economic reform measures undertaken in the utilities sector in Australia communications energy water wastewater services and transport in the last years of the 20th century and early decades of the 21st century Australia's Boldest Experiment Stuart Macintyre, 2015-06-01 In this landmark book Stuart Macintyre explains how a country traumatised by World War I hammered by the Depression and overstretched by World War II became a prosperous successful and growing society by the 1950s An extraordinary group of individuals notably John Curtin Ben Chifley Nugget Coombs John Dedman and Robert Menzies re made the country planning its reconstruction against a background of wartime sacrifice and austerity The other part of this triumphant story shows Australia on the world stage seeking to fashion a new world order that would bring peace and prosperity This book shows the 1940s to be a pivotal decade in Australia At the height of his powers Macintyre reminds us that key components of the society we take for granted work welfare health education immigration housing are not the result of military endeavour but policy planning politics and popular resolve **Australian Alps** Deirdre Slattery, 2015-12 Australian Alps is a fascinating guide to Kosciuszko Alpine and Namadgi National Parks It introduces the reader to Australia's highest mountains their climate geology and soils plants and animals and their human history It traces the long running conflicts between successive users of the mountains and explores the difficulties in managing the land for nature conservation The book gives credit to little known or understood stories of the people who have worked to establish better understanding of the Alps especially their vital role as the major water catchments for south eastern Australia This new edition updates many themes including the involvement of Aboriginal people in the region catchment function and condition pest plants and animals fire and the issue of climate change Written by a specialist with over 25 years experience in community education in and about the

The Water Dreamers Michael Cathcart,2010-08-02 The long awaited history that will change the way Australians think about their country The Water Dreamers is the story of the settlement of Australia of the scarcity of water and the need to fill an imagined silence with the sounds of civilisation From the moment the First Fleeters stepped ashore water determined progress The Tank Stream that flowed through what is now the Sydney CBD provided fresh water until settlers and their livestock fouled it Then water from a nearby swamp was piped into the growing settlement When it ran dry sights were set further afield The Water Dreamers is an illuminating account of the ways people have imagined and interpreted Australia while struggling to understand this continent and striving to conquer its obstacles It s an environmental history and a cultural history with an unmistakable sense of how today we are part of that continuing story

Coslett,2021-11-22 This anthology collects developing scholarship that outlines a new decentred history of global modernism in architecture using postcolonial and other related theoretical frameworks By both revisiting the canons of modernism and seeking to decolonize and globalize those canons the volume explores what a genuinely global history of architectural modernism might begin to look like Its chapters explore the historiography and weaknesses of modernism s normative interpretations and propose alternatives to them The collection offers essays that interrogate transnationalism in new ways reconsiders the agency of the subaltern and the roles played by infrastructures materials and global institutions in propagating a diversity of modernisms internationally Issues such as colonial modernism architectural pedagogy cultural imperialism and spirituality are engaged With essays from both established scholars and up and coming researchers this is an important reference for a new understanding of this crucial and developing topic

Australia's Bid For The Atomic Bomb Reynolds, Wayne,1997-02-11 This very important work is a fundamental rewriting of Australian history from 1943 to 1968 It argues that after World War II Australian defence policy was premised on Joint nuclear weapons development with the United Kingdom and that while this endeavour failed it shaped domestic and foreign policy until the end of the 1950s Nuclear weapons have traditionally been seen as American and British concerns and various official histories have held that the development of rockets and atomic weapon testing were essentially British exercises But author Wayne Reynolds reveals an entirely new perspective on Australia s role in these events Australia s Bid for the Atomic Bomb examines the implications of this for major social political and security issues and developments in Australia s recent history This work will arouse considerable media interest and will appeal to anyone interested in Australia s political and military history

book unveils the history of defending Australia s natural environment and examines the subject s legal and political contexts from the birth of the nation in 1901 until the advent of the so called modern era of environmental regulation in the late 1960s It rejects the mythology that Australia lacked environmental law before the late 1960s in revealing how many of today s environmental laws from pollution control to nature conservation emerged from precedents or events much earlier in the 20th century This history however reveals a discrepancy between lawmakers greater efficacy to exploit rather than protect the environment a discrepancy that grew as nature s backlash intensified in a rapidly degrading continent colonised to build the Australian nation In exploring these dynamics the book offers a rich tapestry of case studies illustrated with historic photographs that show the origins of Australia s environmental laws and how they borrowed from international precedents or furnished lessons for other nations Through its multi disciplinary enquiry the book offers scholars and students of environmental law legal history and the environmental humanities a unique story about the failures and successes in the making of environmental law The ebook editions of this book are available open access under a CC BY NC ND 4 0 licence on

bloomsburycollections.com Water Politics in the Murray-Darling Basin Daniel Connell, 2007 In January 2007 the Australian Prime Minister John Howard announced a 10 billion plan to reform rural water management Most of the effort will focus on the Murray Darling Basin In this book Daniel Connell explains why there is a crisis in the Murray Darling He highlights the disastrous consequences of a century of fitful reluctant co operation between the six governments responsible for the region Connell argues that a new institutional system is essential but a Commonwealth takeover is not the best answer Instead the Commonwealth government should use its constitutional and financial power to force the States to adopt national policies and stick to them whatever the local politics The States would continue to play a substantial role but the controls would be tighter the framework more comprehensive He also shows how the National Water Initiative the great blueprint for water reform has stalled with many of its most important recommendations ignored So far the public debate about the future of the Murray Darling Basin has concentrated on new technical projects and increased water trading Connell argues that unless institutional change is given priority hundreds of millions of dollars of annual investment will be frittered away and the crisis will continue *Migrant Men* Mike Donaldson, Raymond Hibbins, Richard Howson, Bob Pease, 2009-09-11 This edited volume contributes an important collection of chapters to the growing theoretical and empirical work being undertaken at the international level on men and migration The chapters presented here focus on what we might call migratory masculinities the experiences men have of masculinity upon immigration into another national ethnic and cultural context How do these men re construct their conceptions of masculinity Where are the points of tension ambivalence or assimilation in this process Featuring interviews and data drawn from migrants working and living in Australia this book explores how the gender identity of men from non English speaking backgrounds is influenced by the experiences of migration and settlement in an English speaking culture across various cultural spheres such as work leisure family life and religion *Beyond the Policy Cycle* HK Colebatch, 2020-07-29 It is common and comforting to see public policy as the result of careful craft work by expert officials who recognise a problem identify and evaluate possible responses and choose the most appropriate strategy the policy cycle The reality is more complex and challenging Many hands are involved in policy making not all of them official they are not all addressing the same problem they have different ideas about what would be a good answer and the process is rarely brought to a neat close by a clear decision The development of policy can resemble firefighting with players rushing to react to demands for action in areas that are already in crisis or it can be a less frenetic process of weaving as they search for an outcome which reflects the concerns of all the stakeholders Effective participation in the policy process calls for a clear understanding of this complexity and ambiguity *Beyond the Policy Cycle* sets policy in this wider context It recognises that participants in the process are drawn from both government and diverse areas outside government and looks not at a model process but rather at how the game is played how issues rise to prominence who is actually doing the work and exactly what it is that they are doing With detailed Australian case studies

and examining the implications of recent trends in policy such as the outsourcing of service provision Beyond the Policy Cycle offers students and practitioners a critical and engaged look at the activity of policy that reflects the reality of the policy experience

The Environment in Anthropology Nora Haenn, Richard Wilk, 2006 Presenting ecology and current environmental studies from an anthropological point of view this book gives readers a strong intellectual foundation as well as offering practical tools for solving environmental problems

Plains of Promise, Rivers of Destiny Joseph Michael Powell, 1991 Analysis of the role of water management in the development of Queensland after its separation from NSW The book is divided into four chronological parts each beginning with a discussion of general background issues The author is a prolific and well known writer and lecturer in human geography

'Now is the Psychological Moment' Stephen Wilks, 2020-10-12 Earle Christmas Grafton Page 1880 1961 surgeon Country Party leader treasurer and prime minister was perhaps the most extraordinary visionary to hold high public office in twentieth century Australia Over decades he made determined efforts to seize the psychological moment and thereby realise his vision of a decentralised regionalised and rationally ordered nation Page s unique dreaming of a very different Australia encompassed new states hydroelectricity economic planning cooperative federalism and rural universities His story casts light on the wider place in history of visions of national development He was Australia s most important advocate of developmentalism the important yet little studied stream of thought that assumes that governments can lead the nation to realise its economic potential His audacious synthesis of ideas delineated and stretched the Australian political imagination Page s rich career confirms that Australia has long inspired popular ideals of national development but also suggests that their practical implementation was increasingly challenged during the twentieth century Effervescent intelligent and somewhat eccentric Page was one of Australia s great optimists Few Australian leaders who stood for so much have since been so neglected
