S. C. Northrop no individual better incorporated the new role of the Indian Chinese Japanese and Arabic peoples in this postwar world Sorokin came to view social and cultural dynamics in terms of three major processes a major shift of mankind's creative center from Europe to the Pacific a progressive disintegration of

the sensate culture and finally the first blush of the emergence and growth of a new idealistic sociocultural order This volume is perhaps most famous for revealing Sorokin s remarkable efforts to understand the relationship of war and peace to the process of social and political change Contrary to received wisdom he shows that the magnitude and depth of war grows in periods of social cultural and territorial expansion by the nation In short war is just as often a function of development as it is of social decay This long unavailable volume remains one of the major touchstones by which we can judge efforts to create an international social science There are few areas of social or cultural life that are not covered from painting art and music to the ethos of universalism and particularism These are terms which Sorokin introduced into the literature long before the rise of functional doctrines For all those interested in cultural and historical processes this volume provides the essence of Sorokin s remarkably prescient effort to achieve sociological transcendence by taking *Trust Modeling and Management in Digital Environments: From Social Concept to System Development* Yan, Zheng,2010-01-31 This book investigates various definitions of trust and their characteristics in distributed systems and digital computing and details how to model and implement trust in a digital system Provided by publisher **Knowledge and Opinion** John Gneisenau Neihardt,2002-01-01 How important were Sioux authors such as Charles Eastman in the opinion of the writer responsible for *Black Elk Speaks* What will be the legacy of modern poetry according to the poet behind *The Cycle of the West* Knowledge and Opinion offers an unparalleled glimpse into the social and literary thought of John G Neihardt 1881-1973 one of America s most celebrated poets and authors A wealth of little known essays and reviews deepen and round out our appreciation for the accomplishments of Neihardt by revealing his no nonsense opinions about noted literary figures and trends events and social issues of his day Featured in these pages are Neihardt s views of such literary giants as F Scott Fitzgerald Robert Frost H G Wells e e Cummings Dorothy Parker Ernest Hemingway Ezra Pound Eugene O Neill and Upton Sinclair The contributions of Sigmund Freud anthropologist Paul Radin and modern philosophers like Bertrand Russell do not escape his sweeping gaze In their entirety these essays showcase Neihardt s perspectives and opinions on a wide range of subjects and issues including modern poetry the qualities of great literature twentieth century trends in writing and literary criticism the defining characteristics of Western civilization the literatures and cultures of Native Americans the lost world of the Old West economic turmoil in the Great Depression and the enduring power of classical thought This rich archive of essays and reviews will surprise delight and provoke those who thought they already knew John G Neihardt **Research in Education** ,1969 [Resources in Education](#) ,1969-07 [Gender and the politics of time](#) Valerie Bryson,2007-11-21 Women s increased role in the labour market has combined with concerns about the damaging effects of long working hours to push time related issues up the policy agenda in many Western nations This wide ranging and accessible book assesses policy alternatives in the light of feminist theory and factual evidence The book introduces mainstream ideas on the nature and political significance of time and re frames them from a feminist perspective to provide a critical overview of policies in Western

Individual Development and Social Change John R. Nesselroade,Alexander Von Eye,2013-09-24 Individual Development and Social Change Explanatory Analysis

represents a convergence of three lines of emphasis now visible in developmental research and theory building The three are

- 1 the life course as a focus for the study of development and social change and their interrelationships
- 2 the life span orientation to the study of individual development with its acknowledgment of the salience of contextual features for understanding development and
- 3 the growth of methodological innovations that provide more appropriate and powerful ways of exploiting data gathered to describe and explain developmental change processes

The book opens with a study on how major cultural change originates and unfolds over time This is followed by separate chapters on the use of sequential designs for explanatory analyses evolutionary aspects of social and individual development the concepts of the theory of causal and weak causal regressive dependence and the concepts of age period and cohort from the perspective of developmental psychology Subsequent chapters examine development and aging as lifelong processes of historical populations the methodological integration of natural and cultural science perspectives in developmental psychology and application of the multifaceted methodology to the mutuality of constraint between sociocultural group and individual dynamics
