Social Action and Human Nature Axel Honneth, Hans Joas, 1988      The Critical Theory of Axel Honneth Danielle Petherbridge, 2013-09-05 The Critical Theory of Axel Honneth provides a comprehensive study of the work of Axel Honneth tracing the theoretical trajectory from his earliest writings on philosophical anthropology to the development of a theory of recognition The book argues that Honneth's early work provides important insights for the reconstruction of the normative project of critical theory and the articulation of a conceptual framework for analyzing social relations of power and domination Danielle Petherbridge contends however that these aims are not fully realized in Honneth's more mature project and that central insights recede as his project develops Petherbridge seeks to demonstrate that the basis for an alternative theory of intersubjectivity that can account for both an adequate theory of power and normative forms of subject formation can be immanently reconstructed from within Honneth's own work By contextualizing Honneth's project in relation to its theoretical influences The Critical Theory of Axel Honneth provides a critical study and excellent entry point that will be essential reading for both students and scholars who work in the areas of European philosophy critical theory social and political philosophy or social and political theory      **Existentialism and Social Work** Neil Thompson, 2017-09-29

Existentialism and Social Work provides a clearly expressed and well argued exposition of Sartrean existentialism as a theory base for social work practice It introduces the key concepts and themes of the philosophy and relates them to social welfare theory and practice Existentialism is a valuable means of making sense of many of the complexities contradictions and dilemmas which social work staff encounter The book explores the relationship between theory and practice and examines how existentialism can help to bridge the gap A number of theoretical perspectives are evaluated from an existentialist perspective and links are drawn between Sartre's philosophy and aspects of commonly used theories and methods But this is not simply a theoretical analysis Neil Thompson also explores the use of existentialism as a guide to day to day practice and draws up a set of Principles for Practice The ultimate aim is to present existentialism as a concrete philosophy of praxis

**Human Nature** Stephen Gislason, 2017-07-05 Preface Being a human is challenging Human life is a journey thorough time and space with many obstacles injury disease constant uncertainty and relentlessly difficult interactions with other humans Each human is the reincarnation of a long lineage of ancestors Species memory perceptual skills needs drives feelings desires and behaviors are built in and begin operating in utero Humans evolved from primate ancestors and retained features of mind and behavior that have been present in animals for hundreds of millions of years Urges desires designs feelings cry out from within and often surprise us as if we were the hosts to wild animals and spirits within that refuse to be identified or tamed Human behavior can be understood in relation to the whole spectrum of primate behaviors and social organizations Humans appear to have an eclectic combination of primate tendencies with elaboration of features such as tool making symbolic reasoning and spoken language Linda Stone suggested that Primates are a natural grouping of mammals that includes prosimians tree dwelling animals such as lemurs and tarsiers monkeys apes and humans Some of the physical characteristics that distinguish primates from other mammals are binocular vision and the grasping hand with mobile digits and flat nails Evolutionary trends characteristic of the Primate Order are most pronounced in humans and include prolongation of gestation of the fetus prolongation of the period of infant care and expansion and elaboration of the brain An important feature in the social life of many nonhuman primates is dominance and the formation of dominance hierarchies a dominant animal wins aggressive encounters with others and usually has greater access to resources such as food water or

sexual partners Rather than viewing society and culture as real things an observer can recognize that humans live in groups that repeat and modify innate behaviors to produce prolific variations on a few underlying themes that are common to all societies A smart observer will consider the grouping characteristics of humans and discern basic patterns and problems underlying the apparent complexity of modern civilization The organization of society begins with small local clusters that link family groups into clans that are more or less cooperative units Clans associate forming bands that tend to affiliate with other bands forming tribes looser affiliations that occupy larger geographic areas The band tribal structure emerges from ancient animal groupings Patterns of organization rules and institutions that regulate human behavior are in flux and will continue to be unstable As human populations expand and interactions become increasingly complex innate abilities are stretched and distorted The ability of individuals to relate to other humans remains limited and limits the effective management of enlarging groups Managers and leaders do not become smarter as the organizations they lead become larger It is axiomatic that organizations that exceed a threshold number become dysfunctional It is matter of empirical study to recognize group size thresholds and too little is known about the cognitive limitations of leaders Civility, Nonviolent Resistance, and the New Struggle for Social Justice ,2019-11-26 In Civility Nonviolent Resistance and the New Struggle for Social Justice Amin Asfari brings together scholarly contributions addressing the causes of injustice in its many forms Predicated on the idea that violence and injustice are systemic and historical this collection includes chapters that examine the antecedents and effects of prejudice state sponsored violence policies of exclusion and the social forces that shape and solidify their existence Moving beyond ad hoc ahistorical and descriptive explanations of violence and injustice this volume provides a scholarly multidisciplinary approach to confronting them Contributions reflect the many ways in which injustice manifests and civil nonviolent means of engagement are emphasized challenging the very systems that give rise to these notions **Social Action Art Therapy in a Time of Crisis** Jamie Bird,2022-09-19 Social Action Art Therapy in a Time of Crisis outlines theories and models of social action art therapy identifies its application in times of crisis and explores the ways in which art therapy can work effectively for individuals and groups experiencing crisis Drawing upon various ecologies climate psychology and eco art therapy this book addresses various responses to climate change including notions of belonging the physicality of experience and the role of imagination in creating alternative versions of the future The author presents a social action approach to art therapy as a way of addressing the political and collective components of climate change as well as the individual and emotional components To help explore what social action art therapy can offer in this time of crisis the author illustrates examples that show how the ideas have been used in other moments of crisis including asylum refuge and domestic abuse This innovative book contributes to the development of contemporary art therapy practice and will be of interest to arts therapists arts psychotherapists expressive therapists ecotherapists ecopsychologists arts based researchers and many more *Anti-Oppressive Social Work Practice* Karen Morgaine,Moshoula
