Social Care In The Community:

Social Care in the Community Malcolm Payne,1986 **Community Care in Perspective** J. Welshman,J.

Walmsley,2006-10-31 This cohesive collection fills a major gap in medical and social history by offering a detailed account of community provision for so called vulnerable adults in the UK from 1948 2005 It examines key issues such as charity versus rights the role of the market in care provision and the changing construction of social categories **Understanding**

Community Care Ann McDonald,2006-01-24 The second edition of this popular textbook on community care has been substantially updated to incorporate both the new requirements for social work training and the considerable developments in policy law research and practice since 1999 The book traces the historical development of community care and describes the different stages of the process of care management and assesses the impact of care management as a system upon the practice of social work Connections between social care health care and housing are thoroughly explored and the impact of community care policies upon different user groups is explained Exercises and case studies are included and there are suggestions for further reading at the end of each chapter *Social Care Practice in Context* Malcolm Payne,Lena

Dominelli,2008-10-06 In this clear and insightful book best selling author Malcolm Payne analyses the major elements of social care practice explaining how caring and social work skills and values are crucial to effective social care Through theory research evidence and skill development Payne identifies the varying contexts in which social care takes place the agencies that provide it and the relationships at its heart The book explains the key practical social care skills How to be receptive to users and carers own understanding of their needs How to develop continuity in service provision How to use effective interpersonal engagement with users and carers to ensure a positive future for them in which they have as much control over their care as possible How to work in partnership with colleagues and other agencies With practice and case examples research boxes further reading and reflection activities this book is a stimulating read for social work and community care students and practitioners **The Challenge of Person-centred Care** Georgina Koubel,Hilary

Bungay,2008-12-16 This impressive book brings together two major tenets of modern healthcare person centred care and interprofessional working in order to utilise different perspectives on practice to identify the best treatment for the individual In a three part structure covering theory ethics and practice The Challenge of Person Centred Care provides Jargon free explanations of the role of person centred care for each professional group Clear advice to prepare students for practice Numerous case studies and scenarios to illustrate how theory can be applied As a text that engages readers in ethical and moral debates The Challenge of Person Centred Care is an essential resource for health and social care students and practitioners By inspiring critical thinking and reflection on the varied practice roles it contributes towards improving patient experience in the future *Commissioning for Health and Well-Being* Jon Glasby,2012-01-18 Commissioning is now a key task for health and social care and yet policy aspirations often outstrip the infrastructure needed to support commissioners

as they take difficult decisions about future services and to make commissioning a career of choice for future leaders While commissioning was important under New Labour it seems set to be even more fundamental now as commissioners think about future services in an era of austerity Against this background this is the first comprehensive text on a key area of management practice exploring what commissioning is where it has come from and where it might be taking us With a wide range of leading contributors from fields including health care social care local government the book takes students practitioners and managers through key stages of the commissioning cycle as well as addressing cross cutting themes such as the economics of commissioning user involvement and commissioning in an era of personalisation It is essential reading for everyone involved in the planning and delivery of health and social care for social policy students health and social care practitioners managers and policy makers alike Managing Madness (Psychology Revivals) Joan Busfield,2014-10-17 Psychiatry regularly comes under attack as a way of caring for and controlling the mentally ill Originally published in 1986 this title explores the history and theory of psychiatry to illuminate current practice at the time and shows why mental health services had developed in particular ways The book was invaluable for all those who needed to understand the problems and processes behind current psychiatric practice at the time sociologists and psychologists psychiatrists and doctors social workers and health service planners and administrators and will still be of historical interest today *Direct Payments and Personal Budgets* Jon Glasby,Rosemary Littlechild,2016-01-13 In the context of the Care Act 2014 this third edition of the leading textbook on personalisation considers key policy changes since 2009 and new research into the extension and outcomes of personal budgets Direct payments and personal budgets have developed rapidly transforming the whole of adult social care In future all care will be delivered via a personal budget with direct payments as the default rather than the exception As the concepts have spread from adult social care to other sectors the changes have been controversial and difficult to implement Front line practitioners and people using services have struggled to make sense of these ways of working in a challenging financial and policy context This accessible textbook is essential reading for students practitioners and policy makers in social work and community care services *The treatment of asylum seekers* Great Britain: Parliament: Joint Committee on Human Rights,2007-03-30 treatment of asylum Seekers Tenth report of session 2006 07 Vol 2 Oral and written Evidence The NHS Handbook 2008/09 ,2008 **Occupational Outlook Handbook** ,1980 Describes 250 occupations which cover approximately 107 million jobs *Bulletin of the United States Bureau of Labor Statistics* ,1980 *Oxford Textbook of Public Health Palliative Care* Julian Abel,Allan Kellehear,2022 Death dying loss and care giving are not just medical issues but societal ones This volume explores the adoption of public health principles to palliative care including harm reduction early intervention health and well being promotion and compassionate communities **Growing Older in World Cities** Michael K. Gusmano,2006 Population aging often provokes fears of impending social security deficits uncontrollable medical expenditures and transformations in living arrangements but public policy could also stimulate social

innovations These issues are typically studied at the national level yet they must be resolved where most people live in diverse neighborhoods in cities New York London Paris and Tokyo are the four largest cities among the wealthiest most developed nations of the world The essays commissioned for this volume compare what it is like to grow older in these cities with respect to health care quality of life housing and long term care The contributors look beyond aggregate national data to highlight the importance of how local authorities implement policies
