Skinned Activists Condemn The Horrors Of The Fur Trade:

The Subjugation of Canadian Wildlife Max Foran, 2018-04-10 Hardly a day goes by without news of the extinction or endangerment of yet another animal species followed by urgent but largely unheeded calls for action. An eloquent denunciation of the failures of Canada's government and society to protect wildlife from human exploitation, Max Foran's The Subjugation of Canadian Wildlife argues that a root cause of wildlife depletions and habitat loss is the culturally ingrained beliefs that underpin management practices and policies. Tracing the evolution of the highly contestable assumptions that define the human wildlife relationship, Foran stresses the price wild animals pay for human self-interest. Using several examples of government oversight at the federal, provincial, and territorial levels from the Species at Risk Act to the Biodiversity Strategy, Protected Areas Network, and provincial management plans, this volume shows that wildlife policies are as much or more about human needs, priorities, and profit as they are about preservation. Challenging established concepts including ecological integrity, adaptive management, sport hunting as conservation, and the flawed belief that wildlife is a renewable resource, the author compels us to recognize animals as sentient individuals and as integral components of complex ecological systems. A passionate critique of contemporary wildlife policy, The Subjugation of Canadian Wildlife calls for belief change as the best hope for an ecologically healthy, wildlife-rich Canada. **Animal Rights** John M.

Peter J. Li, 2021-03-01 Peter J. Li's pathbreaking new book Animal Welfare in China is timely and valuable. ANTHROZOOS The plight of animals in China has attracted intense interest in recent times. Since the outbreak of COVID-19, speculation about the origins of the virus have sparked global curiosity. Speculation about the origins of COVID-19 has sparked curiosity about

how animals are treated traded and consumed in China today In *Animal Welfare in China* Peter Li explores the key animal welfare challenges facing China now including animal agriculture bear farming and the trade and consumption of exotic wildlife dog meat and other controversial products He considers how Chinese policymakers have approached these issues and speaks with activists from China's growing animal rights movement Li also offers an overview of the history of animal welfare in China from ancient times through the enormous changes of the 20th and 21st centuries Some practices that are today described as traditional he argues are in fact quite recent developments reflecting the contemporary pursuit of economic growth rather than long standing cultural traditions Based on years of fieldwork and analysis *Animal Welfare in China* makes a compelling case for a more nuanced and evidence based approach to these complex issues *Animals, Ethics and Trade* Joyce D'Silva,Jacky Turner,2012-05-16 Modern urban life cuts us off from direct connection with the animal world yet daily the lives of millions of animals are affected by what we consume and wear and what we trade in The use of animals for food labour and pleasure pursuits has long been justified with the assumption that unlike humans animals aren't fully sentient beings In recent years however science has revealed an astonishing array of complex animal behaviour and scientists and policy makers now accept that the animals we make use of are indeed conscious with preferences and intentions The implications for our culture of factory farming fast food and rainforest liquidation are staggering In this powerful book internationally renowned experts on animal behaviour and agriculture such as Jane Goodall Tim Lang and Vandana Shiva are brought together with ethicists religious scholars international industry and regulators for the first time to debate these critical issues and tackle the profound implications of animal sentience The first sections discuss scientific and ethical perspectives on the consciousness emotions and mental abilities of animals Later sections address how human activities such as science law religion farming food production trade development and education respect or ignore animals sentience and welfare and review the options for changes in our policies our practices and our thinking The result is nothing less than a stark and necessary look into the heart of humanity and the ethics that govern our animal powered society
