Slave Economics Vol 1:

Slave Population and Economy in Jamaica, 1807-1834 B. W. Higman, 1995 First published in 1976 see HLAS 40 2983 work is a masterful analysis of the dynamics of slave labor in the economic growth of early 19th century Jamaica Discusses various characteristics of slave and free colored population including mortality birth rates manumission distribution and structure as well as jobs performed on island as a whole Contains excellent statistical tables and new introduction by author Handbook of Latin American Studies v 58 *A Bibliography of Historical Economics to 1980* Deirdre N. McCloskey, George K. Hersh, Jr, 1990 Historians and economists will find here what their fields have in common the movement since the 1950s known variously as cliometrics economic history or historical economics A leading figure in the movement Donald McCloskey has compiled with the help of George Hersh and a panel of distinguished advisors a highly comprehensive bibliography of historical economics covering the period up until 1980 The book will be useful to all economic historians as well as quantitative historians applied economists historical demographers business historians national income accountants and social historians *Modernizing a Slave Economy* John Majewski, 2011-04-01 What would separate Union and Confederate countries look like if the South had won the Civil War In fact this was something that southern secessionists actively debated Imagining themselves as nation builders they understood the importance of a plan for the economic structure of the Confederacy The traditional view assumes that Confederate slave based agrarianism went hand in hand with a natural hostility toward industry and commerce Turning conventional wisdom on its head John Majewski's analysis finds that secessionists strongly believed in industrial development and state led modernization They blamed the South's lack of development on Union policies of discriminatory taxes on southern commerce and unfair subsidies for northern industry Majewski argues that Confederates opposition to a strong central government was politically tied to their struggle against northern legislative dominance Once the Confederacy was formed those who had advocated states rights in the national legislature in order to defend against northern political dominance quickly came to support centralized power and a strong executive for war making and nation building *Enslavement* Orlando Patterson, 2024-11-05 Slavery is one of humanity's most ancient and persistent inequities It predates the rise of civilization played a key role in the growth of Western and Islamic cultures and was an integral part of the emergence and global spread of capitalism Given its historical significance it is not surprising that the problem of slavery is still passionately debated today and that modern day trafficking and forced servitude remain key issues of public concern In *Enslavement Past and Present* historical sociologist Orlando Patterson casts a wide net to examine the social political and economic complexities of slavery across different eras and societies Patterson examines slavery at several levels of abstraction from micro level relations of domination to the macro structures of entire societies Building on the bundle of rights perspective he reevaluates the definition of slavery exposing its variegated fabric of iniquities across tribal and advanced pre modern societies as well as our modern globalized age Patterson also examines the

critical role of women in the history of slavery the significance of manumission in the formation of Christian doctrine and the devastating toll of genocide and undaunted revolt of slaves in Jamaican slave society Concluding with an investigation of contemporary slavery and other forms of servitude this book urges readers to reckon with the brutal legacies of the past and its alarming modern day persistence Enslavement Past and Present deepens our understanding of the broad spectrum of evil and human bondage throughout history an understanding that is essential for contemporary struggles to build a more inclusive society for all **Review of Austrian Economics, Volume 7** Murray Rothbard,2009 *Slave Trade and the*

Economic Development of 18th-Century Lancaster Melinda Elder,2019-07-29 This book looks at the role of the slave trade in the economic development of 18th Century Lancaster **Slavery, Freedom and Business Endeavor** Bradley

Bowden,2022-05-03 This book argues that modern Western civilization is synonymous with business and you cannot have one without the other or at least not for very long Without Western civilization with its emphasis on inquiry questioning experimentation reasoning freedom of expression a free press equality of opportunity before the law then the innovation and vitality that lies at the heart of Western business success evaporates Without business endeavor all the ideas and inquiry are materially meaningless The author postulates that only through business opportunity is the wealth created that allows a continuation of our society's intellectual endeavors Further the world of modern business a unique creation of Western civilization even if it has witnessed many regional and national adaptations is also the actual place where inequalities are overcome and opportunities created It is through the world of business and work that women have for example achieved something approaching equality with men to a degree unprecedented in human history This book will offer scholars a research based argument that Western civilization owes its existence to business rather than Greco Roman antiquity

Climate Chaos and its Origins in Slavery and Capitalism Reva Blau,Judith Blau,2020-10-26 Climate Chaos provides readers the latest consensus among international scientists on the cascading impacts of climate change and the tipping points that today threaten to irreversibly destroy the delicate balance of the Earth's ecosystems The book argues that deregulation and an expansion of fossil fuel extraction have already tipped the planet towards a climate that is out of control This crisis will cause massive human suffering when extreme weather pollution and disease lead to displacement food and water shortages war and possibly species extinction The repression of science creates an existential crisis for humanity that has reached crisis proportions in the twentieth first century The scale of the crisis has prompted a call for geoengineering large interventions into the climate by technological innovation However the history of colonialism and slavery make the technological and monetary elites untrustworthy to solve this humanitarian and planetary crisis While the elites have always cast certain groups of humanity as expendable the climate crisis makes a true humanist and egalitarian movement based in human rights and dignity not only aspirational but also existentially mandatory The crisis demands that we remake the world into a more just and safe place for all the world's people Diverse Development Paths and Structural Transformation in the

Escape from Poverty Martin Andersson, Tobias Axelsson, 2016 The book discusses different possibilities for and obstacles to economic development in lower income countries in Asia Latin America and Sub Saharan Africa It asks what lessons can be learned from previous success cases and assesses whether the growth of developing countries over the last decades can be sustained It pays attention to actual processes of development over the long term to shed light on prospects for global development today

Watching Slavery Joe Lockard, 2008 How did witnesses of slavery relate their experiences and what effect did their reports have This book examines travel accounts fictions poetry and legal texts to analyze direct and indirect encounters with slavery in the antebellum United States It discusses the rhetorical politics of British and American and black and white observations of slavery The discussion raises critical questions about the role of witness and its link with political action both in antebellum and contemporary America

Slavery and Historical Capitalism during the Nineteenth Century Dale Tomich, 2017-10-16 This book examines the historiography of nineteenth century slavery from the perspective of the second slavery The concept of the second slavery

emphasizes the relationship between local histories and world economic transformations. It breaks with conventional narratives of slavery by emphasizing the expansion of reconfigured slaveries in extensive new zones of commodity production in Brazil, Cuba, and the US South as part of world economic processes of decolonization, industrialization, urbanization, and the creation of mass markets. Thus, slavery was not a moribund institution. Capitalist modernity, liberal ideology, and anti-slavery from above or from below faced a vigorous foe that operated within the very economic, political, and cultural premises of the changing 19th-century world. This perspective offers an original approach to the history of slavery. It has opened up vigorous debates over slavery and anti-slavery, Atlantic history, and capitalism. An international group of scholars critically engages older traditions of scholarship on Atlantic history, the economic history of slavery, and the history of slavery in Cuba, Brazil, and the United States from the perspective of the second slavery. Each chapter reinterprets its subject matter in a way that opens out to dialogue between national historiographies and to a reformulation of Atlantic and world economic history. This collection of essays contributes to the development of a more productive conceptual framework for the reconstruction and reinterpretation of the historical relation of slavery and world capitalism during the nineteenth century. The Making of New World Slavery Robin Blackburn, 2020-05-05. The Making of New World Slavery argues that independent commerce geared to burgeoning consumer markets was the driving force behind the rise of plantation slavery. The baroque state sought successfully to feed upon this commerce and with markedly less success to regulate slavery and racial relations. To illustrate this thesis, Blackburn examines the deployment of slaves in the colonial possessions of the Portuguese, the Spanish, the Dutch, the English, and the French. Plantation slavery is shown to have emerged from the impulses of civil society, not from the strategies of individual states. Robin Blackburn argues that the organization of slave plantations placed the West on a destructive path to modernity and that greatly preferable alternatives were both proposed and rejected. Finally, he shows that the surge of Atlantic trade predicated on the murderous toil of the plantations made a decisive contribution to both the Industrial Revolution and the rise of the West. *Economics and Empire in the Roman World* Matthew J. M.

Coomber, 2025-01-16. Over the past few decades, the study of biblical economics has developed into an important subfield of biblical studies. This subfield uses textual and archaeological evidence to uncover the economic realities behind biblical literature, resulting in greater understandings of the lives and possible intentions of those individuals and communities that composed these religious texts and also of their potential relevance or lack thereof to the communities that continue to receive them. *Economics and Empire in the Roman World* has brought together eight scholars of biblical economics to create a repository of what is understood about the socioeconomic realities of those who penned and first received what were to become the Christian scriptures. In addition to serving the research and teaching interests of biblical scholars, this volume has also been created for the benefit of economic historians, anthropologists, and sociologists. **Slave Trade Profiteers in the Western Indian Ocean** Hideaki Suzuki, 2017-10-12. British suppression campaign in the nineteenth century western Indian Ocean By focusing on the transporters buyers sellers and users of slaves in the region the book traces the many links between slave trafficking and other types of trade Drawing upon first person slave accounts travelogues and archival sources it documents the impact of abolition on Zanzibar politics Indian merchants East African coastal urban societies and the entirety of maritime trade in the region Ultimately this ground breaking work uncovers how western Indian Ocean societies experienced the slave trade suppression campaign as a political intervention with important implications for Indian Ocean history and the history of the slave trade **Liberalism,**

Theology, and the Performative in Antebellum American Literature Patrick McDonald,2023-09-19 The 1850s United States witnessed a far reaching political social and economic crisis Symptomatic of this a wide range of narrative fiction from sentimental novels to sensational drama identifies a foundational link between liberal institutions and performative utterances Auctions trials marriages and contracts this fiction contends all depend on the self constituting authority of words and performances which anybody and everybody can appropriate and are always subject to misfiring Rather than viewing this as a liberatory and egalitarian political force however writers from Herman Melville and James Fenimore Cooper to Captain Mayne Reid and E D E N Southworth insist that such naked authority must be supplemented A broad swath of 1850s literature insists that this supplement ought to come from Christianity Anticipating thinkers like Carl Schmitt and Giorgio Agamben these works suggest that legitimate political authority depends upon its ability to represent Christian transcendence and account for revealed truth something firmly outside of speech acts and performance s purview In so doing this diverse body of fiction registers a desire to reconstitute political authority on transcendent and representable ground augmenting institutional reliance on mere words and assuaging the contemporary crises of confidence and authority
