State Governors in the Mexican Revolution, 1910-1952 Jürgen Buchenau, William H. Beezley, 2009-03-16 This unique book traces Mexico's eventful years from 1910 to 1952 through the experiences of its state governors During this seminal period revolutionaries destroyed the old regime created a new national government built an official political party and then discarded in practice the essence of their revolution In this tumultuous time governors some of whom later became president served as the most significant intermediaries between the national government and the people it ruled Leading scholars study governors from ten different states to demonstrate the diversity of the governors' experiences implementing individual revolutionary programs over time as well as the waxing and waning of strong governorship as an institution that ultimately disappeared in the powerful national regime created in the 1940s and 1950s Until that time the contributors convincingly argue the governors provided the revolution with invaluable versatility by dealing with pressing issues of land labor housing and health at the local and regional levels The flexibility of state governors also offered test cases for the implementation of national revolutionary laws and campaigns The only book that considers the state governors in comparative perspective this invaluable study offers a fresh view of regionalism and the Revolution Contributions by William H Beezley Jürgen Buchenau Francie R Chassen Lopez Michael A Ervin María Teresa Fernández Aceves Paul Gillingham Kristin A Harper Timothy Henderson David LaFrance Stephen E Lewis Stephanie J Smith and Andrew Grant Wood

Outside the Hacienda Walls Allan Meyers, 2012-11-01 The Mexican Revolution was a tumultuous struggle for social and political reform that ousted an autocrat and paved the way for a new national constitution The conflict however came late to Yucatán where a network of elite families with largely European roots held the reins of government This privileged group reaped spectacular wealth from haciendas cash crop plantations tended by debt ridden servants of Maya descent When a revolutionary army from central Mexico finally gained a foothold in Yucatán in 1915 the local custom of agrarian servitude met its demise Drawing on a dozen years of archaeological and historical investigation Allan Meyers breaks new ground in the study of Yucatán haciendas He explores a plantation village called San Juan Bautista Tabi which once stood at the heart of a vast sugar estate Occupied for only a few generations the village was abandoned during the revolutionary upheaval Its ruins now lie within a state owned ecological reserve Through oral histories archival records and physical remains Meyers examines various facets of the plantation landscape He presents original data and fresh interpretations on settlement organization social stratification and spatial relationships His systematic approach to things underfoot small everyday objects that are now buried in the tropical forest offers views of the hacienda experience that are often missing in official written sources In this way he raises the voices of rural mostly illiterate Maya speakers who toiled as laborers What emerges is a portrait of hacienda social life that transcends depictions gleaned from historical methods alone Students researchers and travelers to Mexico will all find something of interest in Meyers's lively presentation Readers will see the old haciendas once forsaken but now experiencing a rebirth as tourist destinations in a new light These heritage sites not only testify to social conditions that prevailed before the Mexican Revolution but also remind us that the human geography of modern Yucatán is as much a product of plantation times as it is of more ancient periods
