Summer Mountain Lp:

John Clare: Poems of the Middle Period, 1822-1837 John Clare, 1996 Completing the influential Oxford edition of Clare's collected poems this volume presents the poems of the Northborough period of Clare's creativity As with other volumes in the edition many of the poems have never before been published and Clare's spelling punctuation grammar and vocabulary have all been carefully preserved This final volume also includes corrections to the texts variants and notes in previously published volumes in the series along with a cumulative glossary and cumulative indices of first lines and titles that will assist readers in their use of the edition as a whole Clare's poetry deals not only with his own countryside but also with its ceremonies and celebrations its customs and games its political economic and religious concerns its proverbs tales and songs indeed with all aspects of its popular culture The poems of the Northborough period are some of Clare's best work demonstrating a particularly concise vision of Clare's experience of Nature Lolo National Forest (N.F.), Butte Lookout, 2008 Thinking Like a Mountain Susan L. Flader, 1994-08-01 When initially published more than twenty years ago Thinking Like a Mountain was the first of a handful of efforts to capture the work and thought of America's most significant environmental thinker Aldo Leopold This new edition of Susan Flader's masterful account of Leopold's philosophical journey including a new preface reviewing recent Leopold scholarship makes this classic case study available again and brings much deserved attention to the continuing influence and importance of Leopold today Thinking Like a Mountain unfolds with Flader's close analysis of Leopold's essay of the same title which explores issues of predation by studying the interrelationships between deer wolves and forests Flader shows how his approach to wildlife management and species preservation evolved from his experiences restoring the deer population in the Southwestern United States his study of the German system of forest and wildlife management and his efforts to combat the overpopulation of deer in Wisconsin His own intellectual development parallels the formation of the conservation movement reflecting his struggle to understand the relationship between the land and its human and animal inhabitants Drawing from the entire corpus of Leopold's works including published and unpublished writing correspondence field notes and journals Flader places Leopold in his historical context In addition a biographical sketch draws on personal interviews with family friends and colleagues to illuminate his many roles as scientist philosopher citizen policy maker and teacher Flader's insight and profound appreciation of the issues make Thinking Like a Mountain a standard source for readers interested in Leopold scholarship and the development of ecology and conservation in the twentieth century **Mountain Timberlines** Friedrich-Karl Holtmeier, 2009-03-15 For more than 40 years I have been engaged in timberline research Thus one could suppose that writing this book should not have been too difficult It was harder however than expected and in the end I felt that more questions had arisen than could be answered within its pages Perhaps it would have been easier to write the book 30 years ago and then leave the subject to mature Lastly it was the late Prof Heinz Ellenberg who had convinced me to portray a much needed and complete picture of

what we know of the timberline with special respect to its great physiognomic structural and ecological variety The first version of this book was published in the German language Holtmeier 2000 Nevertheless I was very delighted when Prof Martin Beniston encouraged me to prepare an English edition for the series Advances in Global Change Research which guaranteed a wider circulation Timberline is a worldwide and very heterogeneous phenomenon which can only be presented by way of examples My own field experience is necessarily limited to certain timberline areas such as the Alps northern Scandinavia northern Finland and many high mountain ranges in the western United States and Canada However my own observations and the results of my and my previous collaborators research were essential for developing the concept of the book and became integrated into the picture of timberline that is presented in the following chapters
