Sunshine At The End Of Life:

Understanding End of Life Practices: Perspectives on Communication, Religion and Culture Chandana Banerjee, 2023-10-18 This book is an exploration of issues that are essential in end of life care Understanding end of life practices across cultures and religions is important in the delivery of patient centered end of life care This book helps clinicians and non clinicians understand the various end of life practices in their vast patient populations further contributing to providing empathetic and compassionate end of life care to patients With the advent of many new options at the end of life this book also explores the modern day approaches to end of life often sought by patients when faced with disease progression and adversity

The Sun We Share Kristine Larsen, 2024-11-13 As the dominant star in our sky the Sun has been alternately worshipped as a god and viewed as a threat over the course of human history Despite significant advances in astronomy the Sun continues to surprise us most notably in its production of so called space weather that impacts technology here on Earth This unique mixture of familiarity and mystery has made the Sun a main character in popular media over the past three centuries This book examines how popular media have adapted to our ever changing understanding of the inner workings of the Sun It provides a valuable way to observe the inherent problems of communicating science to a non technical audience Chapters cut through the widespread hype found on the Internet and instead explore our ever improving scientific exploration of the Sun the persistent misconceptions surrounding it the fate of the Sun and its relation to the fate of the Earth and why despite comments to the contrary by Oscar Wilde the average person should care about sunspots

Chasing the Sun Richard Cohen, 2011-08-04 The Sun is so powerful so much bigger than us that it is a terrifying subject Yet though we depend on it we take it for granted Amazingly the first book of its kind CHASING THE SUN is a cultural and scientific history of our relationship with the star that gives us life Richard Cohen applying the same mix of wide ranging reference and intimate detail that won outstanding reviews for *By the Sword* travels from the ancient Greek astronomers to modern day solar scientists from Stonehenge to Antarctica site of the solar eclipse of 2003 when penguins were said to sing Mexico's Aztecs to the Norwegian city of Tromsø where for two months of the year there is no Sun at all He introduces us to the crucial sunspot cycle in modern economics the religious dances of Indian tribesmen the histories of sundials and calendars the plight of migrating birds the latest theories of global warming and Galileo recording his discoveries in code for fear of persecution And throughout there is the rich Sun literature from the writings of Homer through Dante and Nietzsche to Keats Shelley and beyond Blindingly impressive and hugely readable this is a tour de force of narrative non fiction

The Pictorial Mode Donald A. Ringe, 2021-12-14 Focusing on style as a means of thematic expression Donald A Ringe in this study examines in detail the affinities that exist between the paintings of the Hudson River school and the works of William Cullen Bryant Washington Irving and James Fenimore Cooper The emphasis on physical description of nature that characterizes the work of these writers he finds is not simply an imitation of European models nor is it merely nonfunctional decoration Rather he demonstrates that the authors concern with description of the physical world derives from the late eighteenth century theory of knowledge and specifically from the concepts of the Scottish Common Sense school of philosophy Recognizing the differing limitations and opportunities presented by the media in which these two groups of artists worked Ringe traces deeper parallels in their treatment of spatial and temporal relationships Having at their disposal the suggestive powers of language the writers succeeded in making of the pictorial mode an effective means of expressing moral and intellectual themes of fundamental concern to the nineteenth century American A full understanding of this characteristic mode of expression Ringe concludes is essential to accurate interpretation of the literary works of the first generation of American romantics

From Stardust to First Cells Sankar Chatterjee, 2023-09-20 This book presents a groundbreaking hypothesis to answer one of the greatest scientific mysteries How did life begin Like a detective piecing together seemingly disparate bits of evidence Dr Sankar Chatterjee combines the most recent discoveries in cosmology geology chemistry information systems and biology weaving a vast tapestry from the threads of current research Dr Chatterjee convincingly argues that the odyssey of life first began when the fundamental building blocks were brought to Earth by meteorites These cosmic compounds concentrated and simmered like a soup in hydrothermal crater caldrons Through a system of subterranean vent networks a biosynthetic rich variety of organic compounds mixed and matched into a recipe of rich biomolecules guided by prebiotic information systems Through symbiosis these complex biopolymers gradually assemble into membrane bound protocells At each stage of this evolutionary progression through natural selection they refined with increasing stability and complexity ultimately leading to the emergence of the first cells about four billion years ago In this book Dr Chatterjee tells this story in rigorous detail in language that is both accessible and engaging
