The First Birth A Family Turning Point:

The First Birth, a Family Turning Point Doris R. Entwisle, Susan G. Doering, 1981 *The First Birth, a Family Turning Point* Doris R. Entwisle, Susan G. Doering, 1981 The Me I Know Susan Krauss Whitbourne, 2012-12-06 For the last 5 years I have been living with 94 adults These 94 adults made up the sample of people in a study on adult development that Dale Dannefer and I began in 1980 This book represents my efforts to condense the almost 200 hours of tape recorded material from the 94 adults into a form that captures at least some of the diversity and also some of the commonalities in their answers to the question Who am I My version of their answers is based on their reflections about themselves as family members workers and people with a goal in life In arriving at the conclusion that adults attempt to see themselves as loved competent and good human beings I believe that I have done justice to these people and their answers to my interview questions Arriving at the point of being able to write about these 94 people's identities has not been an easy process Countless attempts at numerically based rating systems were tried and discarded progressively until finally I decided to read all the transcripts in sequence person by person rather than question by question What I found when I approached them as total individuals was surprising to me I found a vibrant theme of certainty and self assuredness in their identities that flew in the face of my previous ideas about developmental change in adulthood Understanding Family Process Carlfrid B. Broderick, 1993-03-09 Systems theory is the basic theoretical model underlying most contemporary family therapy In this accessible introduction the author traces how systems theory gave rise to family systems theory outlines the basic propositions of family systems and links it both to other family theory literature and to clinical practice Among the topics covered are relational space family boundaries family stratification and child socialization Family meanings and such shared realities as family folklore stories myths and memorabilia are discussed Family rituals are also explored After the Baby Rhonda Nordin, 2000-04-01 Conversational and practical After the Baby teaches couples about the natural progression of their marriage as it expands to include children An essential guide for strengthening marriage while becoming parents it offers both help and hope for building better families *Becoming A Person* Martin Woodhead, 2013-10-28 The first volume of readings for the Child Development in Social Context series concentrates on the importance of social relationships in the young child's life Early readings summarise recent research on children's emotional attachments But relationships are also the context of much of their early play and learning There are readings to illustrate how parents frame guide and scaffold young children's development with special reference to the way children are initiated into using language as a tool for learning The cross cultural dimension of early development is a particular focus of this volume which concludes with readings on the construction of personal identity First published in 1991 Routledge is an imprint of Taylor Francis an information company The Scientific Basis of Child Custody Decisions Robert M. Galatzer-Levy, Louis Kraus, Jeanne Galatzer-Levy, 2009-03-23 The legal system requires mental health professionals to provide research summaries to support

their evaluations in child custody cases Contributions from leading developmental researchers legal professionals and clinicians describe how scientific evidence is properly used in court Timely and current this book helps evaluators access the best information to fulfill their obligations to their clients and the court The Second Edition adds chapters on family observation parental alienation and sexual abuse Forensic psychologists family lawyers and judges will be equipped with the most current information to aid in custody decisions **Categories and Contexts** Simon Szreter,Hania Sholkamy,A.

Dharmalingam,2004-03-18 Throughout its history as a social science demography has been associated with an exclusively quantitative orientation for studying social problems As a result demographers tend to analyse population issues scientifically through sets of fixed social categories that are divorced from dynamic relationships and local contexts and processes This volume questions these fixed categories in two ways First it examines the historical and political circumstances in which such categories had their provenance and second it reassesses their uncritical applications over space and time in a diverse range of empirical case studies encouraging throughout a constructive interdisciplinary dialogue involving anthropologists demographers historians and sociologists This volume seeks to examine the political complexities that lie at the heart of population studies by focusing on category formation category use and category critique It shows that this takes the form of a dialectic between the needs for clarity of scientific and administrative analysis and the recalcitrant diversity of the social contexts and human processes that generate population change The critical reflections of each chapter are enriched by meticulous ethnographic fieldwork and historical research drawn from every continent This volume therefore exemplifies a new methodology for research in population studies one that does not simply accept and re use the established categories of population science but seeks critically and reflexively to explore test and re evaluate their meanings in diverse contexts It shows that for demography to realise its full potential it must urgently re examine and contextualize the social categories used today in population research *Handbook of Parenting* Marc H. Bornstein,2019-02-01 This highly anticipated third

edition of the Handbook of Parenting brings together an array of field leading experts who have worked in different ways toward understanding the many diverse aspects of parenting Contributors to the Handbook look to the most recent research and thinking to shed light on topics every parent professional and policymaker wonders about Parenting is a perennially hot topic After all everyone who has ever lived has been parented and the vast majority of people become parents themselves No wonder bookstores house shelves of how to parenting books and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice However almost none of these is evidence based The Handbook of Parenting is Period Each chapter has been written to be read and absorbed in a single sitting and includes historical considerations of the topic a discussion of central issues and theory a review of classical and modern research and forecasts of future directions of theory and research Together the five volumes in the Handbook cover Children and Parenting the Biology and Ecology of Parenting Being and Becoming a Parent Social Conditions and Applied Parenting and the Practice of Parenting Volume 3

Being and Becoming a Parent considers a large cast of characters responsible for parenting each with her or his own customs and agenda and examines what the psychological characteristics and social interests of those individuals reveal about what parenting is Chapters in Part I on The Parent show just how rich and multifaceted is the constellation of children's caregivers Considered first are family systems and then successively mothers and fathers coparenting and gatekeeping between parents adolescent parenting grandparenting and single parenthood divorced and remarried parenting lesbian and gay parents and finally sibling caregivers and nonparental caregiving Parenting also draws on transient and enduring physical personality and intellectual characteristics of the individual The chapters in Part II on Becoming and Being a Parent consider the intergenerational transmission of parenting parenting and contemporary reproductive technologies the transition to parenthood and stages of parental development and then chapters turn to parents well being emotions self efficacy cognitions and attributions as well as socialization personality in parenting and psychoanalytic theory These features of parents serve many functions they generate and shape parental practices mediate the effectiveness of parenting and help to organize parenting
