The Fifty Year Kill:

The Highway Murders Sourabh Mukherjee, 2023-01-12 In August 2009 a thirty nine year old policewoman went missing in Tamil Nadu A month later her heavily decomposed body was discovered in a drain by a graveyard She had been brutally violated and killed As the investigation started the police detected a pattern in more than a dozen unsolved rape and murder cases with mutilated bodies of women turning up in graveyards drains and empty fields along the highways It didn't take the police too long to find out that the perpetrator was a trucker named M Jaishankar What followed was a cat and mouse game across states many more gruesome killings one of the most sensational jailbreaks in the history of the country and a controversial suicide in a high security cell The Highway Murders is the breathtaking true story of Psycho Shankar one of India's most notorious serial killers and one policeman's relentless decade long battle against the terror of the highways

Smoking Kills Conrad Keating, 2016-07-05 At the end of the Second World War Britain had the highest incidence of lung cancer in the world For the first time lung cancer deaths exceeded those from tuberculosis and no one knew why On 30 September 1950 a young physician named Richard Doll concluded in a research paper that smoking cigarettes was a cause and an important cause of the rapidly increasing epidemic of lung cancer His historic and contentious finding marked the beginning of a life long crusade against premature death and the forces of Big Tobacco Born in 1912 Doll a natural patrician jettisoned his Establishment background and joined the Communist Party as a reaction to the anarchy and waste of capitalism in the 1930s He treated the blistered feet of the Jarrow Marchers served as a medical officer at the retreat to Dunkirk and became a true hero of the NHS A political revolutionary and an epidemiologist with a Darwinian heart of stone Doll fulfilled his early ambition to be a valuable member of society Doll steered a course through a minefield of medical and political controversy Opponents from the tobacco industry questioned his science while later critics from the environmental lobby attacked his alleged connections to the chemical industry An enigmatic individual Doll was feared and respected throughout a long and wide ranging scientific career which ended only with his death in 2005 In this authorised and groundbreaking biography Conrad Keating reveals a man whose life and work encapsulates much of the twentieth century Described by the British Medical Journal as perhaps Britain's most eminent doctor Doll ushered in a new era in medicine the intellectual ascendancy of medical statistics According to the Nobel laureate Sir Paul Nurse his work which may have prevented tens of millions of deaths transcends the boundaries of professional medicine into the global community of mankind A well crafted biography of Doll who single handedly saved millions of lives with his findings New Scientist As this fascinating and fair minded biography makes clear while Doll's political instincts were radical he was nevertheless a conservative scientist always cautious in causal inference Impressive and engaging International Journal of Epidemiology
