The First Descent of the Matterhorn Alan Lyall, 1997-01-01 **The Matterhorn** Guido Rey, 1908 The First Descent of the Matterhorn Alan Lyall, 1998-02-01 **The Laboratory of Progress** Joseph Jung, 2022-07-29

The Laboratory of Progress Switzerland in the 19th Century tells the improbable story of how a small backward mountainous agricultural country with almost no raw materials became an industrial powerhouse a hub of innovation a touristic mecca and a pioneer in transportation all in the course of a single century That a tiny landlocked country should become a dominant steamship builder for the rest of the world that a country that had never seen a cotton plant should become the world s second largest textile producer that a country with hardly any level terrain should come to boast the world s most highly developed railway network and that a country whose main export was impoverished emigrants should be transformed into one of the world s major financial centres these astonishing developments among many others are explored and explained both through the specific stories of individual innovators and through a prescient analysis of the political economic societal and cultural structures that formed the context in which Switzerland s astonishing transformation took place The book is a compelling read both for professional historians and for general readers with an interest in Switzerland it highlights the roles of transport networks and individual pioneers in industrial and political development
