Relational Designs in Literature and the Arts, 2012-01-01 This collection focuses on texts that address the other arts from painting to photography from the stage to the screen and from avant garde experiments to mass culture Despite their diversity of object and approach the essays in Relational Designs coalesce around the argument that representations are defined by relations and dynamics rather than intrinsic features This rationale is supported by the

discourses and methodologies favoured by the book's contributors their approaches offer a cross section of the intellectual and critical environment of our time The book illustrates the critical possibilities that derive from the broad range of modes of inquiry poststructuralist criticism gender studies postcolonial studies new historicism that the book's four sections bring to bear on a wealth of intermedial practices But Relational Designs compounds such critical emphases with the voice of the practitioner the book is rounded off by an interview in which a contemporary novelist discusses her attraction to the other arts in terms that extend the book's insights and bridge the gap between academic discourse and artistic practice

The essays in this collection are based on papers given at a conference on detective fiction in European culture held at the University of Exeter in September 1997 The range of topics covered is designed to show not only the presence and variety of narratives of detection across different European countries and their different media although there is a predictable emphasis on the novel It also illustrates the fertility of the genre its openness to a spectrum of readings with different emphases formal as well as thematic Approaches to detective fiction have often tended to confine themselves to symptomatic interpretation where details of the fictional world represented are used to diagnose a specific set of social preoccupations and priorities operative at the time of writing Such approaches can yield valuable insights Nonetheless there is a risk of limiting the value of the genre as a whole solely to its role as a mirror held up to society In this perspective issues of structure and style are sidelined or if addressed are praised to the extent that they approach invisibility concision spareness realism are the qualities singled out for praise The genre also gives much scope for formal innovation and indeed has often attracted already established mainstream writers and filmmakers for just this reason The eclectic diversity of the detective narratives considered in this volume reveal the malleability of the traditional constraints of the genre The essays bear rich testimony to the value of considering the interplay

of thematic and structural issues even in the most apparently unselfconscious and popular or populist forms of narrative. The patterns of reassurance, the triumph of intellect and the ordered rational world of old are now challenged by the need to foreground the problems, ambiguities and uncertainties of the self and of society. The plurality of meanings and the antithetical imperatives explored in these detective narratives confirm that the most recent forms of the genre are not mere palimpsests of their golden age precursors. The subversion of traditional expectations and the implementation of diverse stylistic devices take the genre beyond mere homage and pastiche. The role of the reader, spectator and critic in conferring meaning is a crucial one.
