New Challenges for Stateless Nationalist and Regionalist Parties Eve Hepburn, 2013-10-18 Throughout Europe stateless nationalist and regionalist parties have moved from niche actors in party systems to mainstream political players No longer the outsider in party politics these parties have successfully entered government at the regional and state levels and many have been responsible for pushing the agenda for radical constitutional change in the United Kingdom Spain Italy Belgium Germany and France However the transformation of these parties from peripheral movements to established parties of government does not come without its problems Whilst these parties were once able to focus on the single issue of self determination they have been forced to change their strategies alter their behaviour and compromise on their principles in order to succeed in an era of electoral volatility partisan dealignment and multi level governance This book explores how stateless nationalist and regionalist parties across Western Europe have responded to the twin challenges of multi level politics i e operating at the regional state and European levels and a multi dimensional policy space whereby they must articulate policy proposals alongside their territorial demands Written by leading experts in the field this is a cutting edge collection of theoretical analytical and empirical work on the challenges currently facing nationalist and regionalist parties in Europe This book was previously published as a special issue of Regional and Federal Studies

Regional Institutions and Governance in the European Union José Magone, 2003-08-30 European integration has profoundly changed the relationship between national and subnational governments and has led to the emergence of the Europe of the Regions This edited volume highlights some of the problems involved in the integration of the three main levels of governance in the European Union the regional national and supranational level The contributors address recent developments in various regions and examine the way these regions have adjusted to the growing importance of the European Union s multilevel governance system Among the issues discussed are the emergence and institutionalization of new regional political systems such as those of Scotland Wales and Flanders the channels available to the regions for influencing the EU policy process in relation to their constituencies and horizontal projects of integration among regions which make the whole multilevel governance system more flexible as well as more complex

Parliamentary Administrations in the European Union Anna-Lena Högenauer, Christine Neuhold, Thomas Christiansen, 2016-04-08 This book offers a comprehensive overview of the role of parliamentary administrations in the control of European Union policy making It questions whether the decision to give parliaments greater powers in the

aftermath of the Lisbon Treaty had only the intended effect of political debate on European policies or whether it has also resulted in the bureaucratisation of parliaments The authors argue that the challenges of information management faced by parliaments lead them to delegate an extensive set of tasks to their administrations They offer a broad empirical picture analysing the challenges faced by national parliaments and the role and response of their administrations in the case of the European Parliament national parliaments and regional parliaments In addition the book studies the interaction between different administrations and their contribution to interparliamentary cooperation It presents a new and different perspective on the challenges and dynamics of multi level parliamentarism **National Parliaments and European Democracy** Jit Peters,Olaf Tans,Carla M. Zoethout,2007 This book engages in the vivid debate about the role of nationalparliaments in the future European democracy These parliaments are widely regarded to be essential in reducing the European Union s democratic deficit but it remains unclear how their function should be organized The purpose of this volume is to contribute to such a regime on the basis of a comparative analysis of scrutiny systems as they exist today
