Skill Building For Interpersonal Competence:

Skill Building for Interpersonal Competence Sharon A. Ratliffe, David D. Hudson, 1987 *Working Alliance Skills for Mental Health Professionals* Jairo N. Fuertes, 2019-09-30 *Working Alliance Skills for Mental Health Professionals* provides expert guidance to mental health providers who wish to develop and augment their skills and competence in this area of practice. Each chapter deconstructs a dimension of the working alliance in psychotherapy, defining and describing specific mechanisms and interventions that can help professionals establish an alliance with their clients. The book includes skills in nonverbal communication, ways to foster the working bond with diverse clients, goal and task setting strategies, and verbal and interpersonal therapeutic skills, as well as mechanisms for repairing ruptures and for fostering the working alliance through supervision. The authors provide in-session examples of how each skill may be implemented and highlight the use of interventions through clinical vignettes and masked clinical cases. *Working Alliance Skills for Mental Health Professionals* is ideal for use in training programs in counseling, clinical psychology, and social work. It may also be valuable to professional-level practitioners interested in honing their skills in optimizing the working alliance. Technical Report, 2004

Sustainability on University Campuses: Learning, Skills Building and Best Practices Walter Leal Filho, Ugo Bardi, 2019-06-03 The implementation of sustainability initiatives on campuses is an essential component of promoting sustainability in the higher education context. In addition to reflecting an awareness of environmental issues, campus programmes demonstrate how seriously universities take sustainability at the institutional level. There is a lack of truly interdisciplinary publications that comprehensively address the issue of campus greening, and there is an even greater need for publications that do so at a truly international level. This book meets these needs. It is one of the outcomes of the Second Symposium on Sustainability in University Campuses (SSUC 2018) which was jointly organised by the University of Florence, Italy; Manchester Metropolitan University, UK; the Research and Transfer Centre Sustainable Development and Climate Change Management; and the European School of Sustainability Science and Research at the Hamburg University of Applied Sciences, Germany, in cooperation with the Inter-University Sustainable Development Research Programme (IUSDRP). The book showcases examples of campus-based research and teaching projects, regenerative campus design, low-carbon and zero-carbon buildings, waste prevention, and resilient transport, among others. Ultimately, it demonstrates the role of campuses as platforms for transformative social learning and research and explores the means by which university campuses can be made more sustainable. The aims of this publication are as follows: to provide universities with essential information on campus greening and sustainable campus development initiatives from around the world; to share ideas and lessons learned in the course of research, teaching, and projects on campus greening and design, especially successful initiatives and good practice; and to introduce methodological approaches and projects intended to integrate the topic of sustainable development in campus design and operations. This book gathers contributions from researchers and practitioners in the field of campus
