Skokholm A Naturalists Island:

The Natural History of Skokholm Island Graham Victor Frederick Thompson, 2008-01-16 Skokholm is a remote island nature reserve located off the southwest coast of Pembrokeshire Wales Home to over 100 000 seabirds including the third largest Manx shearwater colony in the World it was made famous by pioneer naturalist Ronald Mathias Lockley in the 1930s and 1940s as a result of the many books that he wrote about it He leased Skokholm for 20 years from 1928 until 1948 during which time he established Britain's first Bird Observatory in 1933 The field outing of the 8th International Ornithological Congress was held on the island in the following year The Pembrokeshire Bird Protection Society now the Wildlife Trust of South West Wales of which Lockley was a founder took over the lease in 1948 and ran the island as a ringing station and nature reserve In 1954 it was notified as a Site of Special Scientific Interest A huge number of studies have been carried out looking into the lives of the various birds the House Mice and Rabbits invertebrates plants and plant communities In 1963 the Edward Grey Institute for Field Ornithology became involved and began a number of studies looking at seabird biology and populations The Council for the Promotion of Field Studies now the Field Studies Council was at this time running the island under license from the Wildlife Trust The Medical Research Council and then the Royal Free Hospital School of Medicine undertook a study on the genetically unique island House Mouse and the Ministry of Agriculture studied the Rabbit population as the disease Myxomatosis swept across Britain but did not affect the island animals at all making the site even more interesting

Ecocriticism and the Island Pippa Marland, 2022-12-19 Islands have long been the subject of cultural fascination but in recent decades they have exerted an increasingly powerful centrifugal force sending writers to the outer edges of the British Irish archipelago in search of inspiration and insight Drawing on contemporary ecocritical approaches island studies and emergent archipelagic perspectives *Ecocriticism and the Island* explores a wide selection of island themed creative non fiction Through a combination of textual analysis and where possible original interviews and archival research Pippa Marland offers new insights into the work of Tim Robinson Brenda Chamberlain Christine Evans W G Sebald Stephen Watts Amy Liptrot Kathleen Jamie Adam Nicolson Robert Macfarlane and David Gange In assessing the ways in which these authors negotiate existing cultural tropes of the island while offering their own distinctive articulations of islandness this book represents an important intervention into island literary studies At the same time it contributes to the development of an archipelagic strand of ecocriticism one that offers a valuable perspective on human environmental relationships in an Anthropocene context

Birds in a Cage Derek Niemann, 2012-01-11 At Warburg Germany in 1941 four British PoWs find an unexpected means of escape from the horrors of internment when they form a birdwatching society and embark on an obsessive quest behind barbed wire Through their shared love of birds they overcome hunger hardship fear and stultifying boredom Their quest draws in not only their fellow prisoners but also some of the German guards at great risk to them all Derek Niemann draws on original diaries letters and drawings to tell of how Conder Barrett Waterston and Buxton were

forged by their experiences as POWs into the giants of post war wildlife conservation Their legacy lives on in institutions such as the RSPB and the British Wildlife Trust **The Naturalist** ,1982 *Reel Nature* Gregg Mitman,1999 Americans have had a long standing love affair with the wilderness As cities grew and frontiers disappeared film emerged to feed an insatiable curiosity about wildlife The camera promised to bring us into contact with the animal world undetected and unarmed Yet the camera s penetration of this world has inevitably brought human artifice and technology into the picture as well In the first major analysis of American nature films in the twentieth century Gregg Mitman shows how our cultural values scientific needs and new technologies produced the images that have shaped our contemporary view of wildlife Like the museum and the zoo the nature film sought to recreate the experience of unspoiled nature while appealing to a popular audience through a blend of scientific research and commercial promotion education and entertainment authenticity and artifice Travelogue expedition films like Teddy Roosevelt s African safari catered to upper and middle class patrons who were intrigued by the exotic and entertained by the thrill of big game hunting and collecting The proliferation of nature movies and television shows in the 1950s such as Disney s True Life Adventures and Marlin Perkins s Wild Kingdom made nature familiar and accessible to America s baby boom generation fostering the environmental activism of the latter part of the twentieth century *Reel Nature* reveals the shifting conventions of nature films and their enormous impact on our perceptions of and politics about the environment Whether crafted to elicit thrills or to educate audiences about the real life drama of threatened wildlife nature films then and now reveal much about the yearnings of Americans to be both close to nature and yet distinctly apart *Transactions of the Cardiff Naturalists' Society* Cardiff Naturalists' Society,1886 **The Islands of England** J.
