Bronze Age The second section covers the period since writing systems began Ranging across the Mediterranean and Northern Celtic and Slavic Europe the essays assess the archaeological and textual evidence Dispersed archaeological remains and biased outside sources constitute our main sources of information so the complex task of interpreting these traces is explained for each case The Handbook also aims to highlight the plurality of religion in ancient Europe the many ways in which it is expressed notably in discourse action organization and material culture how it is produced and maintained by different people with different interests how communities always connect with or disassociate from adjunct communities and how their beliefs and rituals are shaped by these relationships The Handbook will be invaluable to anyone interested in ancient History and also to scholars and students of Religion Anthropology Archaeology and Classical Studies

**On the Origin of Myths in Catastrophic Experience, vol. 1: Preliminaries** Marinus Anthony van der Sluijs, 2019-01-01 Creation myths around the world reveal an intricate network of recurrent motifs Many of these are counterintuitive and not widely known describing a time when the sky was low the stars did not yet shine multiple suns appeared the moon was brighter than the sun no land existed deities and mortals maintained frequent contact a world axis in the form of a tree ladder or giant man connected the earth with the sky a devastating flood or fire ended the old order and so forth The present work in multiple volumes aims to find an origin for this cross culturally and internally consistent body of traditions in a series of extraordinary natural events relating especially to the earth's transition from the last glacial period to the Holocene This first volume sets the stage for the

interdisciplinary hypothesis Essential lines of research receive a historical introduction comparative mythology catastrophism and the study of the mythical world axis in relation to the earth's rotation Various astronomical and meteorological interpretations that are not strictly catastrophist are explored for several types of myths about the sun the moon and the world axis but leave many of the most intriguing traditions unexplained It is argued that a structural core of the worldwide mythology of creation and destruction in which the cosmic axis takes pride of place points to a specific period of dramatic natural circumstances in real prehistoric time A new synopsis is provided of this universal mythological substrate It emerges that the mythical world axis cannot have been based on a single object seen or imagined at one of the poles as has usually been supposed This surprising conclusion paves the way for the innovative geomagnetic theory proposed in volume 2
