Featherland How the Birds lived at Greenlawn Manville Fenn George, 2023-11-01 *Featherland* by George Manville Fenn is a first-rate journey book for kids that pulls readers into the tale of Roy and Gladys Ransome, two brothers who turn out to be in a stunning land inhabited with the aid of clever speaking birds. The story starts off evolved when the children find a hidden route of their grandfather's aviary that leads them to a world known as Featherland. In this exceptional international world, the birds communicate to each other in human language, developing a society that looks and acts like ours. Roy and Gladys meet many distinctive varieties of birds, each with its very own character and developments. They turn out to be friends and work through difficult problems collectively. While exploring Featherland's colorful and sundry surroundings, they learn about the people who live there and their traditions. Fenn crafts an exciting story that combines adventure, friendship, and ethical classes. This mix appeals to younger readers with the aid of combining creativity with instructions about existence. Through the Ransome siblings' memories in Featherland, the story emphasizes cooperation, bravery, and information. It additionally gives younger readers an exceptional and spellbinding adventure into a world in which birds play human-like roles, which helps them appreciate nature and its wonders even greater.

The Word Speaks to the Faustian Man Som Raj Gupta, 1991-01-01 *The Chandogya Upanishad*. The culture it reflects is remote and archaic; the texture of its ritualistic and contemplative symbolism is thick and dense, virtually a closed book for us moderns. A sustained self-submitting attentiveness, however, discloses its language as resonating, disturbingly modern notes focusing our attention on many of our pathologies as well as our possibilities. Pathologies and possibilities that have escaped the notice of us moderns. The spirit of quiet hermeneutics that characterizes this study illumines many an opaque spot in this text, solves many an interpretive puzzle, turns many of its archaic naivetes into living and compelling profundities. We are made to realize that what some moderns call *Gestell* is far more primordial than they would envisage it to be: far more ominous and primitive, tragic and persistent. A radical transformation is required: an ontological transformation. Not mere a masterly exposition of an ancient text is therefore this study, but an authentic springboard for fresh philosophical thinking, fecundating the two shores of the human experience: East and West. The first three published Vols are on i) *Isa Kena Katha* and *Prasna Upanishads*; ii) *Mundaka* and *Mandukya Upanishad* with *Gaudapada Karika*; iii) *Taittiriya* and *Aitareya Upanishads*.

How to Use Your Eyes James Elkins, 2007-08-20 James Elkins's *How to Use Your Eyes* invites us to look at and maybe to see for the first time the world around us with breathtaking results. Here are the common artifacts of life, often misunderstood and largely ignored, brought into striking focus. With the discerning eye of a painter and the zeal of a detective, Elkins explores complicated things like mandalas, the periodic table, or a hieroglyph, remaking the world into a treasure box of observations: eccentric, ordinary, marvelous.

The Cosmic Journey in the Book of Revelation Joel M. Rothman, 2023-05-18 Joel M Rothman considers the significance of cosmology in biblical and extra biblical texts and the role of the cosmic journey in many apocalyptic narratives He posits that Revelation's narrative likewise takes the hearer on a virtual journey through a cosmic story space of great theological significance While scholarship commonly assumes a three tiered cosmos in Revelation Rothman argues that Revelation's narrative operates in a four tiered cosmos with the hyper heaven sitting above the sky heaven earth and abyssal depths a cosmic story space that is recreated in the imagination of the hearers Beginning with a methodology of visual narrative reading Rothman then discusses the assumptions and existing conceptions regarding heaven and earth He stresses that Revelation does not exhibit tension in its portrayal of heaven between heaven as a site of conflict and heaven as the realm in which God truly reigns but rather shows readers a sky heaven characterised by archetypal conflict between powerful sky beings and a hyper heaven defined by full recognition of the Throne In journeying through the sky structure and God space and by analysing the four cosmic layers in operation the distinct nature of the two sky spaces cosmic change and the ideological import of the cosmic structure Rothman demonstrates that the existence of the hyper heaven in contradistinction with the limited lived cosmos of earth and sky heaven is a present guarantee of the final cosmic transformation that creates a new space for human life exclusive of imperial draconian elements
