**Transhumanist Dreams and Dystopian Nightmares** Maxwell J. Mehlman, 2012-08-10 Transhumanists advocate for the development and distribution of technologies that will enhance human intellectual physical and psychological capacities even eliminate aging What if the dystopian futures and transhumanist utopias found in the pages of science journals Margaret Atwood novels films like Gattaca and television shows like Dark Angel are realized What kind of world would humans have created Maxwell J Mehlman considers the promises and perils of using genetic engineering in an effort to direct the future course of human evolution He addresses scientific and ethical issues without choosing sides in the dispute between transhumanists and their challengers However Transhumanist Dreams and Dystopian Nightmares reveals that radical forms of genetic engineering could become a reality much sooner than many people think and that we need to encourage risk management efforts Whether scientists are dubious or optimistic about the prospects for directed evolution they tend to agree on two things First however long it takes to perfect the necessary technology it is inevitable that humans will attempt to control their evolutionary future and second in the process of learning how to direct evolution we are bound to make mistakes Our responsibility is to learn how to balance innovation with caution Sleep Difficulties and Autism Spectrum Disorders Kenneth J. Aitken, 2012-01-01 Addressing the sleep difficulties prevalent amongst people with Autism Spectrum Disorders ASD this accessible book discusses in depth covers a broad range of sleep disorders and presents proven remedies and treatment regimes Original **The Power of Your Child's Imagination** Charlotte Reznick Ph.D., 2009-08-04 Imagine your frustrated four year old calming her own anger with a few simple breaths Picture your fourth grader visualizing an ice blue pillow to cool his hot headaches Or your worried eleven year old improving her concentration by consulting a personal wizard to help with homework The Power of Your Child's Imagination will show you how to empower your child with easy effective and creative skills for surviving and thriving in a stressful world This indispensable guide provides nine simple tools to help children cope with stress and anxiety by tapping into their imagination to access their own natural strength and confidence Dr Reznick illustrates how each tool can be used every day to deal with problems such as Stress induced headaches and stomachaches Phobias panic attacks and social anxiety Bed wetting and sleepless nights Separation anxiety and fear of the unknown Coping with death divorce and other losses Hurt frustration and anger Trouble with schoolwork and concentration Sibling rivalry and school yard squabbles **Sleep and Health Risk** Jörg H. Agriculture,1920      **Critical Interventions in the Ethics of Healthcare** Dave Holmes,2016-04-22 Critical Interventions in  
the Ethics of Healthcare argues that traditional modes of bioethics are proving incommensurable with burgeoning  
biotechnologies and consequently emerging subjectivities Drawn from diverse disciplines this volume works toward a new  
mode of discourse in bioethics offering a critique of the current norms and constraints under which Western healthcare  
operates The contributions imagine new less paternalistic terms by which bioethics might proceed terms that do not resort to  
exclusively Western models of liberal humanism or to the logic of neoliberal economies It is argued that in this way we can  
begin to develop an ethical vocabulary that does justice to the challenges of our age Bringing together theorists practitioners  
and clinicians to present a wide variety of related disciplinary concerns and perspectives on bioethics this volume challenges  
the underlying assumptions that continue to hold sway in the ethics of medicine and health sciences      **Genes and the  
Bioimaginary** Deborah Lynn Steinberg,2016-03-03 Genes and the Bioimaginary examines the dramatic rise and  
contemporary cultural apotheosis of the gene The book traces not only the genetification of modern life but is also a journey  
through the complex relationship between science and culture At the heart of this book are three interlinked questions The  
first concerns the paradigmatic transformations of the genetics revolution how can we understand the impact of genes on  
social arenas as diverse as law and agriculture politics and medicine genealogy and jurisprudence Second how has the  
language of genes come to pervade public discourse as much a trope of personal narrative as of the popular imaginary And  
third how can we gain critical purchase not only on the conditions and consequences of a particular science but on its  
projective seductions the terms of its persuasion and the dilemmas and anxieties provoked in its wake Through a series of  
illuminating case studies ranging from gay genes to Jew genes to genes for crime from CSI to the Innocence Project from  
genetics post racial imaginary to its phantasies of redemption the book examines the emergence of the gene as a pre eminent  
locus of both scientific and social explanation and as a powerful object of spectacle projective phantasy and attachment  
Genes and the Bioimaginary makes a distinctive contribution to our understanding of how knowledge comes to be not only  
powerful but plausible      **Your Child Abroad** Jane Wilson-Howarth,Dr. Matthew Ellis,2005 A down to earth guide for
