Christian America? Daryl C. Cornett, 2011-11-01 Throughout her history America has possessed a rich religious component largely comprised of different traditions of the Christian faith This tide of personal religious devotion connected to government observances and policies has ebbed and flowed through time but it has always been a part of American identity one that is full of social and political debate As such Christian America presents a hearty point counterpoint discussion about the nature of the relationship Christianity has had to American politics and culture throughout the country's existence aiming to determine which of these four differing opinions is most appropriate David Barton WallBuilders supports the idea that America is distinctly Christian based on centuries of authoritative government declarations Jonathan D Sassi College of Staten Island believes America is distinctly secular based on the nation's religiously eclectic and secular beginning particularly the emphasis on the complete separation of church and state William D Henard The Southern Baptist Theological Seminary sees America as essentially Christian making his case for the nation's crucial faith component while exploring varied interpretations of comments like one made in 2009 by President Barack Obama Although we have a very large Christian population we do not consider ourselves a Christian nation Daryl C Cornett the book's editor argues that America is partly Christian a nation that was shaped by a blend of religious and non religious tendencies He writes After the Civil War steady decline in religious adherence was the impetus for evangelicals to mythologize American history and pine for a return to a golden age of Christian faith and virtue at its founding that never existed
