INITIAL REVIEW STATEMENTS Anyone who reads this rich and wonderfully interesting memoir will be inspired by what Jean Langenheim has accomplished scientifically and personally during her long and distinguished career at the interface of multiple scientific fields This is more than a personal memoir by a leading scientist It is a deeply insightful reflection on how major scientific disciplines have developed over the past half century and how the culture of scientific research itself has changed

John Thompson Distinguished Professor of Ecology and Evolution University of California Santa Cruz quoted in UCSC press release <http://press.ucsc.edu/text.asp?pid=3771> The title of this good read is truly apropos it is an odyssey of the mind as well as life of a self confessed adventurous woman someone always open to the next chapter in an ever changing life lived during a period of significant social and technological changes There's a solid dose of real scientific research and discovery tempered by the authors vivid descriptions of her travels of the wonders of the natural world and of the cultures she encounters in some amazing places she finds herself Provocatively you may recognize and view elements of your own life in ways you never thought about before

Susan Martin retired researcher US Department of Agriculture Colorado State University I liked very much your life metaphor about weaving threads in your life tapestry It was delightful to read how those threads were constructed and woven Your life has been very rich impacting and inspiring many people with your thoughts and action
