Japanese Industrial Transplants in the United States Atsushi Sumi, 2018-12-07 First Published in 1998 This book examines the transferability of Japanese organizational practices to Japanese owned industrial transplants in the United States and demonstrates that relations of power and conflict on the corporate structural level are equally as significant as the social and cultural differences between American and Japanese practices in the workplace The research is based upon extensive ethnographic fieldwork at automotive transplants in the Midwest and high tech transplants in California as well as a case study company in New Mexico and focuses primarily on their adaptation to the US industrial environment Extensive interviews demonstrate that organizational practices of Japanese transplants are significantly different from either their Japanese or American counterparts Relations of power at the case study company are examined in depth and reveal two contrasting forms of control American managers tend to exert hierarchical control in the manufacturing department using a top down approach and clear distinctions between work and private lives In contrast the Japanese managers utilize what the author calls poka yoke fail proof control over the repair department Poka yoke control is characterized by strict attendance and dress codes emphasizing loyalty and dedication to work At the same time the US headquarters in New York and the parent company in Japan impose remote control thus limiting the autonomy of local managers The Time Bind Arlie

ethnography Louise Lamphere University of New Mexico When Women Come First Sheba George, 2005-07-18 With a subtle yet penetrating understanding of the intricate interplay of gender race and class Sheba George examines an unusual immigration pattern to analyze what happens when women who migrate before men become the breadwinners in the family Focusing on a group of female nurses who moved from India to the United States before their husbands she shows that this story of economic mobility and professional achievement conceals underlying conditions of upheaval not only in the families and immigrant community but also in the sending community in India This richly textured and impeccably researched study deftly illustrates the complex reconfigurations of gender and class relations concealed behind a quintessential American success story When Women Come First explains how men who lost social status in the immigration process attempted to reclaim ground by creating new roles for themselves in their church Ironically they were stigmatized by other upper class immigrants as men who needed to play in the church because the nurses were the bosses in their homes At the same time the nurses were stigmatized as lower class sexually loose women with too much independence George's absorbing story of how these women and men negotiate this complicated network provides a groundbreaking perspective on the shifting interactions of two nations and two cultures **Public Anthropology in a Borderless World** Sam Beck, Carl A.

Maida, 2015-07-01 Anthropologists have acted as experts and educators on the nature and ways of life of people worldwide working to understand the human condition in broad comparative perspective As a discipline anthropology has often advocated and even defended the cultural integrity authenticity and autonomy of societies across the globe Public anthropology today carries out the discipline's original purpose grounding theories in lived experience and placing empirical knowledge in deeper historical and comparative frameworks This is a vitally important kind of anthropology that has the goal of improving the modern human condition by actively engaging with people to make changes through research education and political action **The Near Northwest Side Story** Gina Perez, 2004-10-04 In The Near Northwest Side Story Gina M P rez

offers an intimate and unvarnished portrait of Puerto Rican life in Chicago and San Sebastian Puerto Rico two places connected by a long history of circulating people ideas goods and information P rez's masterful blend of history and ethnography explores the multiple and gendered reasons for migration why people maintain transnational connections with distant communities and how poor and working class Puerto Ricans work to build meaningful communities P rez traces the changing ways that Puerto Ricans have experienced poverty displacement and discrimination and illustrates how they imagine and build extended families and dense social networks that link San Sebastian to barrios in Chicago She includes an incisive analysis of the role of the state in shaping migration through such projects as the Chardon Plan Operation Bootstrap and the Chicago Experiment The Near Northwest Side Story provides a unique window on the many strategies people use to resist the negative consequences of globalization economic development and gentrification **The New Don't Blame**
