web the motion of any particle in a circular path refers to circular motion a body is said to be in circular motion if it moves in a manner that the distance from a particular fixed point always remains same in this topic we will learn about the dynamics of circular motion with its application table of content 1 suggested videos 2 circular motion

notes on uniform circular motion unacademy - Jun 01 2022

web uniform circular motion is the motion of a body traveling at a constant speed along a circular path the speed remains constant but the velocity varies if a particle is traveling in a circle it must be experiencing some acceleration towards the center causing it to rotate around the center

6 2 uniform circular motion physics openstax - Mar 10 2023

web the simplest case of circular motion is uniform circular motion where an object travels a circular path at a constant speed note that unlike speed the linear velocity of an object in circular motion is constantly changing because it is always changing direction
