The Gulf War Military Lessons Learned Interim Report Of The Csis Study Group July 1991:

The Army Historian, 1993 *Weapons Proliferation in the 1990s* Brad Roberts, 1995 The proliferation of weapons of mass destruction has emerged as a major topic of international security in the post Cold War world This compendium of articles published in *The Washington Quarterly* between 1991 and 1995 describes the changing nature of the problem discusses new trends in nonproliferation and counterproliferation policy identifies new arms control challenges at the regional and global levels and concludes by addressing the global politics of proliferation *Rogue States and Nuclear Outlaws* Michael T. Klare, 1995 In this incisive examination of our national security policy Michael Klare suggests that the Pentagon in effect established a new class of enemies when the Cold War came to an unpredictable and hostile states in Asia Africa and Latin America Klare argues that the containment of these rising Third World powers Iraq Iran Libya and North Korea especially became the centerpiece of American military policy and the justification for near Cold War levels of military spending The Gulf War CSIS Study Group on Lessons Learned from the Gulf War, James Blackwell, Michael J. Mazarr, Don M. Snider, 1991 **Strategic Review**, 1996 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States **Army History**, 1992 *History of the 4th Marine Division, 1943-1996*, 1997 **History of the 4th Marine Division, 1943-2000**, 2000 **Parameters**, 1992

The 1990-91 Gulf War Andrew Orgill, 1995 An annotated bibliography of over 1400 entries of books document collections and journal articles published up to September 1993 Entries include English French German and Italian items and are divided into five areas reference sources general studies the crisis the war and the aftermath **The Muslim World**, 2004 Toward the Twenty-first Century Glenn P. Hastedt, Kay M. Knickrehm, 1994 A collection of 48 articles designed to get students to think about what international relations will look like in ten years *American National Security* Amos A. Jordan, William Jesse Taylor, Lawrence J. Korb, 1993 This fourth edition has been thoroughly revised to show how recent events have affected the security needs of the United States The section on international and regional security issues has been completely updated and includes a new chapter on Europe Truly outstanding in providing such needed integration and longer range vision It is an invaluable teaching tool Zbigniew Brzezinski This significantly revised fourth edition captures the momentous changes of our times Senator Sam Nunn from the Foreword to this edition The Iranian Journal of International Affairs, 1996 Journal of Third World Studies, 1992 Consists of abstracts of selected papers from various conferences dealing with the third world and its problems **Weapons Don't Make War** Colin S. Gray, 1993 Weaponry does not equal strategy argues Colin Gray but the two are often confused resulting in such linguistic errors as strategic weapons There may be an interactive relationship between policy strategy and weaponry but he contends policy and strategy always take the front seat *The United States and the New Middle East* Robert Edwards Hunter, Lee Hamilton, 1992

Our New National Security Strategy James J. Tritten, 1992-09-30 This book is an analysis of President Bush's Regional

Defense Strategy first unveiled in Aspen Colorado on August 2 1990 This strategy involves a mix of active reserve and reconstitutable forces and General Colin Powell's Base Force If implemented the new strategy and force structure would return significant U S ground and air forces to the continental United States where most would be demobilized In the event of a major crisis the United States would rely on active and reserve forces for a contingency response much as was done for Operation Desert Storm The new national security strategy is based upon the 25 percent budget cut negotiated with Congress a greatly depleted Russian threat and a new international security environment that assumes two years warning of a European centered global war with the former USSR There are four major critical factors upon which the new strategy depends 1 the continued decline of the Russians as a threat to world stability 2 the ability of the intelligence community to meet new challenges 3 the behavior of the allies and Congress and 4 the ability of industry to meet new demands The new strategy is not simply an adjustment to existing defense doctrine or strategy but rather a fundamental revision of the way the United States has approached defense since 1945 Students and scholars interested in politico military strategy and government policy will find this book of great interest

Storm Over Iraq Richard Hallion, 1992 An incisive account of the Persian Gulf War which marked the ascendancy of air power in warfare Hallion traces the history of air power up to the planning preparation and conduct of the war and also outlines the significance the war holds for national security planning Detailed appendices further examine specific issues while the entire volume is meticulously documented and thoroughly illustrated Accessible to a broad audience Annotation copyright by Book News Inc Portland OR

The Army after Next Thomas K. Adams, 2006-10-30 This book recounts the successes and failures of the US Army's Army Transformation program in the larger context of the Department of Defense's overall military transformation effort Spurred by the belief that RMA represented the future the Department of Defense DoD set out to transform the U S armed forces by adopting RMA concepts Led by President George W Bush and Defense Secretary Donald Rumsfeld the DoD spent billions in an attempt to make the hypothetical capabilities real changing the entire structure of the armed forces as a result The services the media Congress and the military industry each had its own agenda all of which continue to come into play in the development of RMA strategies The interplay of politics technology and military reality offers a fascinating narrative Sure to be found controversial by some compelling by all this is the only available book length examination of the way the U S Army and Department of Defense have tried to create the capabilities promised by the high tech Revolution in Military Affairs Of more immediate concern it is also the only in depth account of the effect RMA and transformation concepts had on the American operations in Afghanistan and Iraq Many of the problems in both Iraq and Afghanistan author Thomas K Adams argues arose from the DoD's implacable desire to implement RMA driven transformation concepts whether they were appropriate or not What we need to do he maintains is to fight the war we have not the war we want
