Building Anglo-Saxon England John Blair, 2021-10-12 Shortlisted for the Wolfson History Prize A radical rethinking of the Anglo Saxon world that draws on the latest archaeological discoveries This beautifully illustrated book draws on the latest archaeological discoveries to present a radical reappraisal of the Anglo Saxon built environment and its inhabitants John Blair one of the world's leading experts on this transformative era in England's early history explains the origins of towns manor houses and castles in a completely new way and sheds new light on the important functions of buildings and settlements in shaping people's lives during the age of the Venerable Bede and King Alfred **Building Anglo Saxon England** demonstrates how hundreds of recent excavations enable us to grasp for the first time how regionally diverse the built environment of the Anglo Saxons truly was Blair identifies a zone of eastern England with access to the North Sea whose economy prosperity and timber buildings had more in common with the Low Countries and Scandinavia than the rest of England The origins of villages and their field systems emerge with a new clarity as does the royal administrative organization of the kingdom of Mercia which dominated central England for two centuries Featuring a wealth of color illustrations throughout **Building Anglo Saxon England** explores how the natural landscape was modified to accommodate human activity and how many settlements secular and religious were laid out with geometrical precision by specialist surveyors The book also shows how the Anglo Saxon love of elegant and intricate decoration is reflected in the construction of the living environment which in some ways was more sophisticated than it would become after the Norman Conquest

Newspaper Building Design and Journalism Cultures in Australia and the UK: 1855-2010 Carole O'Reilly, Josie Vine, 2022-11-30 This book examines the micro cultural ideologies of the journalism profession in Britain and Australia by focusing on the design execution and development of newspaper building architecture Concentrating on the main newspaper buildings in some of the major metropolitan areas in Australia Melbourne

Sydney Adelaide and the UK Manchester London Edinburgh and Liverpool from 1855 to 2010 Newspaper Building Design and Journalism Cultures in Australia and the UK 1855 2010 interweaves a rich analysis of spatial characteristics of newspaper offices with compelling anecdotes from journalists working lives to examine the history evolution and precarious future of the physical newsroom and the surrounding interior and exterior space The book argues that newspaper buildings are designed to accommodate and extend journalism's professional values and belief systems over time and that their architecture reflects ideological change and continuity in these value and belief systems such as the evolution from trade to profession Ancillary factors such as the influence of the newspapers owners on the building design and the financing of new structures are also considered As professional practice rapidly shifts out of the newspaper offices this insightful study questions what this may mean for the future of the industry Newspaper Building Design and Journalism Cultures in Australia and the UK 1855 2010 will benefit academics and researchers in the areas of media journalism cultural studies and urban history

Books, Buildings and Social Engineering Alistair Black, Simon Pepper, Kaye Bagshaw, 2017-05-15 Public libraries have strangely never been the subject of an extensive design history Consequently this important and comprehensive book represents a ground breaking socio architectural study of pre 1939 public library buildings A surprisingly high proportion of these urban civic buildings remain intact and present an increasingly difficult architectural problem for many communities The book thus includes a study of what is happening to these historic libraries now and proposes that knowledge of their origins and early development can help build an understanding of how best to handle their future

Building The H Bomb: A Personal History Kenneth W Ford, 2015-03-25 In this engaging scientific memoir Kenneth Ford recounts the time when in his mid twenties he was a member of the team that designed and built the first hydrogen bomb He worked with and relaxed with scientific giants of that time such as Edward Teller Enrico Fermi Stan Ulam John von Neumann and John Wheeler and here offers illuminating insights into the personalities the strengths and the quirks of these men Well known for his ability to explain physics to nonspecialists Ford also brings to life the physics of fission and fusion and provides a brief history of nuclear science from the discovery of radioactivity in 1896 to the ten megaton explosion of Mike that obliterated a Pacific Island in 1952 Ford worked at both Los Alamos and Princeton's Project Matterhorn and brings out Matterhorn's major but previously unheralded contribution to the development of the H bomb Outside the lab he drove a battered Chevrolet around New Mexico a bantam motorcycle across the country and a British roadster around New Jersey Part of the charm of Ford's book is the way in which he leavens his well researched descriptions of the scientific work with brief tales of his life away from weapons

Traditional Buildings in the Oxford Region John Steane, James Ayres, 2013-11-29 The pivotal position of the Oxford region in the geological and therefore building history of England is of fundamental importance to the study of traditional construction Oxford occupies a central position on the ancient route between Northampton and Southampton and on the east west road between London The West Country Wales and Ireland For

this reason unusually for vernacular architecture the buildings of the region were subject to a wide range of influences This book the fruit of twenty years research provides an account of vernacular architecture in the Oxford region from Anglo Saxon times to the 19th century It begins with a discussion of methods and procedures followed by a description of building materials stone brick slate and thatch This serves as an introduction to the heart of the book eleven chapters dealing with surveys of cruck buildings manorial and moated sites town houses with particular emphasis on Abingdon and houses in the countryside from farmhouses to cottages There are then chapters on fire hazards public houses and public buildings Several appendices are devoted to wall paintings ferramenta apotropaic marks carpentry details secrets under the floorboards fireplaces staircases and windows The book is richly and profusely illustrated with over 500 illustrations photographs maps and a particular strength a large number of drawings of architectural details and sketch perspectives *Historical Industrial Buildings and their Real Estate Utilisation* Robin Groer, Patrick J. Morrissey, Thomas Glatte, 2025-07-10 Both Germany and the United Kingdom have economically vital cities and peripheral locations that contain historic industrial structures or districts This prompts the question of how to manage historic industrial buildings and how they can be preserved to maintain their value while simultaneously benefiting future generations This book focuses on the potential and redevelopment opportunities of historical industrial buildings While on the one hand these historical industrial buildings reflect culturally significant buildings and sites deserving of appreciation and hence preservation on the other hand they are frequently situated in promising and fascinating locations that could represent significant possibilities for urban development and neighborhood planning This publication is part of the series Studien zum nachhaltigen Bauen und Wirtschaften

Church Building and Society in the Later Middle Ages Gabriel Byng, 2017-12-14 The construction of a church was undoubtedly one of the most demanding events to take place in the life of a medieval parish It required a huge outlay of time money and labour and often a new organisational structure to oversee design and management Who took control and who provided the financing was deeply shaped by local patterns in wealth authority and institutional development from small villages with little formal government to settlements with highly unequal populations This all took place during a period of great economic and social change as communities managed the impact of the Black Death the end of serfdom and the slump of the mid fifteenth century This original and authoritative study provides an account of how economic change local politics and architecture combined in late medieval England It will be of interest to researchers of medieval socio economic and art history

when used for a building to its eventual deterioration The structure of stone buildings is then discussed with explanations of the mechanics of pillars lighthouses and walls arches bridges buttresses and roof vaults plus castles and cathedrals The sequence of the historical architectural styles of stone buildings is explained from the early days through to postmodern buildings Special attention is paid to two famous architects the Roman Vitruvius and the English Sir Christopher Wren who designed and supervised the construction of St Paul s Cathedral in London To demonstrate many of the concepts presented two exemplary stone buildings are described in detail the Albert Memorial in London and Durham Cathedral in northern England The former building is interesting because it is comprised of a cornucopia of different building stones and the latter building because of its architecture and sandstone decay mechanisms In the final Chapter ruined stone buildings are discussed the many reasons for their decay and the possibility of their rebirth via digital recording of their geometry The book has over 350 pages and is illustrated with more than 450 diagrams and colour photographs of both the various stones and the associated stone buildings Readers knowledge of the subject will be greatly enhanced by these images and the related explanatory text A wide ranging references and bibliography section is also included
