Team Leadership In Christian Ministry Kenneth O. Gangel, 1997-01-05 Team leadership is the exercise of one s spiritual gifts under the call of God to serve a certain group of people in achieving the goals God has given them toward the end of glorifying Christ How is your church or organization governed Does it have an authoritarian top down administration Is the ministry vision developed by a few top officials with little input from staff or volunteers Today the definition of an effective leader has changed No longer does the model leader manage like the Lone Ranger either do it his way or no way Today the model leader shares responsibility with fellow team leaders and seeks to serve them In this complete revision of his earlier work Building Leaders for Church Education Dr Gangel carefully lays a biblical foundation for the team leadership model This leadership is not dogmatic control or personality worship It has no room for political power plays Instead it is Paul gently nurturing young Christians in his epistles It is Barnabas willingly thrusting others into situations where they develop their own gifts It is Christ choosing not one but twelve men to carry on His ministry It is servant leadership With examples illustrations and suggestions for further reading at the end of each chapter Dr Gangel prods and encourages the reader to move beyond the safety net of autocratic leadership into the rewarding effective practice of leading with and through others

Hospital Waste Management Training Among The Staff Of Dental Teaching Hospitals In Bangalore City: Hospital Waste Management Sushma Rudraswamy, 2014 Hospitals have been existing in one form or the other since time immemorial but there never had been so much concern about the waste generated by them The implications of hospital wastes are manifold Now hospital waste management is one of the thrust areas which are drawing attention of health authorities and also the government Hospital waste management requires commitment from persons at all the levels of the health care facility The present interventional study was conducted to assess the knowledge attitude and practice about hospital waste management and to provide training programme on hospital waste management for the staff and to assess the effect of training among the staff of dental teaching hospitals in Bangalore city For the purpose

of conducting this study cluster sampling procedure was adopted and eight dental teaching hospitals were randomly selected. A specially prepared and pre tested structured questionnaire was given to assess the knowledge attitude and practices among the staff of dental teaching hospitals and collected personally. In each institution the following elements were studied using checklist: i.e. segregation, disinfection, disfigurement, containment, colour coding, personal protective equipment in house transport and disposal. One day training programme on the hospital waste management was organized at each dental college. Training was given in English to the Dentist and Dental Auxiliary and the local Kannada language for the Attenders. Learning media used was Audiovisual Aid, LCD projector. The duration of training per each cadre was for one and half hour which was interactive, participatory and task focused. Two months after initial training the same baseline questionnaire was administered to the staff i.e. Dentist, Dental Auxiliary and Attenders and monitoring of the waste management practices was done using the same check list used earlier. Intervention was evaluated by assessing improvements in their knowledge, attitude and practice scores after intervention in comparison to the base line scores. This comparison involved mean and percentage changes in their knowledge, attitude and practice on the hospital waste management. Appropriate statistical tests were used to analyze the data. 177 dentists, 19 auxiliaries and 54 attenders completed the study. Two months after intervention, 24.4% improvement in knowledge was found among the dentists, 18.7% improvements among auxiliaries and 23.3% improvements among the attenders when compared to the baseline knowledge. Change in attitude was 36.2% among the dentists, 33.3% among auxiliaries and 56.42% among the attenders, $p < 0.001$ significant when compared to the baseline attitude. Change in practice was 17.6% among the dentists, 16.4% among auxiliaries and 4.4% among the attenders when compared to the baseline practice. The findings of this study suggest that a training programme increases the knowledge as well as the sense of responsibility resulting in change in attitude and practices.

Heart. Soul. Mind. Strength. Andrew T. Le Peau, Linda Doll, 2022-08-02. In this behind the scenes narrative of InterVarsity Press, Andrew Le Peau and Linda Doll offer a glimpse into the stories, people and events that made IVP what it is today. Recording good times and bad, celebrations and challenges, they place IVP in its historical context and demonstrate its contribution to the academy, church and world.

Good Novels, Better Management. B. Czarniawska-Joerges, P. de Montheroux, 2005-08-05. This collection of essays demonstrates how novels are not only comparable but often superior to the case histories used in business education. As many novelists have had personal experience of working in organizations, their work combines introspective insight with analytical skill.
