Southern Railway, Lord Nelson Class 4-6-0s Tim Hillier-Graves,2020-09-19 The Lord Nelson Class has come to be viewed as an also ran amongst express locomotives and is largely overlooked for that reason It had the misfortune to be sandwiched on Southern metals between the classic and much revered King Arthurs and Schools and by Bullied s controversial Pacifics In such company any design might suffer by comparison And yet when first appearing they attracted plaudits from railway professionals including the footplate crew and the public alike But with only 16 being built their impact was muted and any faults in their design were magnified beyond their actual impact In truth they deserved far better than this and were in fact sturdy reliable performers that served the company well on the heavy boat trains for which they were designed and across their other passenger services for 30 years and more in peace and war Much has been written about these locomotives but no story is ever complete with new information and photographs emerging to deepen our understanding of them This book provides an in depth view that re examines these impressive engines using new material eye witness accounts contemporary assessments and more than 200 photographs and drawings **The Locomotive News and Railway Contractor** ,1919 **The GWR Bristol to Bath Line** Colin Maggs,2012-05-15 A new edition of a classic history of the railway line between Bristol and Bath illustrated with over 200 pictures *LMS/BR Class 7 4-6-0 Rebuilds* David Clarke,2014-02-28 A comprehensive look at the LMS BR Class 7 4 6 0 rebuilt locomotives including the rebuilt Jubilees the rebuilt Patriots and the rebuilt Royal Scots The book includes hundreds of photographs and feedback from the original crews that operated the engines Contents include Origins of the rebuilt Class 7s in the 1940s and the design of the 2A boiler Differences between the classes Liveries names and name plates Detailed allocation tables Rebuilt Class 7s to the rescue the severe winter of 1962 3 Decline of the Class 7s and withdrawal in the 1960s Preservation of the Class 7 rebuilds Essential reading for all locomotive enthusiasts illustrated with 240 colour photographs and includes feedback from the original crews

Richard Marks,2026-04-28 Since Richard Trevithick's first forays into the development of the steam locomotive Britain's engineers have been at the forefront of railway technology. Often innovative and sometimes unfairly maligned, the country's locomotive engineers continually broke new barriers in traction technology, although not everything was successful. From the earliest simple steam locomotives to the latest diesel and electric engines, Britain had led the way in railway locomotion, although competition from European, Japanese and American manufacturers sometimes exceeded what British engineers had achieved. In this new book, industrial and railway historian Dr Richard Marks provides fresh insights into Britain's role in railway locomotive design and technology and examines the highlights of British developments from Trevithick's Coalbrookdale locomotive to the Brush Class 60 diesel locomotive. Based upon new research, this useful primer aims to start the reader on a journey of discovery, unravelling some of the myths which have arisen around Britain's railway history and explaining in an easy-to-follow narrative why some potentially advantageous developments failed to live up to expectations. In this new survey of 200 years of British locomotive history to accompany the Railway 200 celebrations, the reader is presented with a compelling and easy-to-read introduction to a complex but intriguing subject. *GWR Locomotives: The Prairies* Allen Jackson,2022-11-15 The latest volume in Allen Jackson's series examining the locomotives of the Great Western Railway. Profusely illustrated throughout. **The British Steam Railway Locomotive, 1925-65** Oswald Stevens Nock,1966

Those which can be found in private collections and the ones which adorn the various heritage railways which operate throughout Britain. The book looks at each subject both in its working life and during its subsequent preservation. The pictorial content covers a wide swathe of Britain during the years before the heritage locomotives were earmarked for preservation. Praise for *British Steam Locomotives Before Preservation* The book does exactly what it says on the cover and is recommended for anyone with an interest in UK standard gauge steam. The photographs include not only locomotives but also trains in some very interesting settings, which adds to the enjoyment of a well-researched offering. Recommended. Next one please. *Ffestiniog Railway Magazine*. **The Last Days of British Steam** Malcolm Clegg,2020-11-06 A treasury of photos capturing the end of an era in transportation history, the final decade of steam locomotives in Britain. Malcolm Clegg has been taking railway pictures since the early 1960s and also enjoys access to collections taken by friends who were recording the steam railway scene during this period. In this book, he covers a wide variety of classes of locomotives that were withdrawn during the last decade of steam traction, examples of some of which are now preserved. This book is a record of his and other people's journeys during the last decade of steam in the 1960s, with photographs and informative captions looking at steam traction in a wide variety of geographical locations around the British Railways network. **Great Eastern**

Railway Magazine London and North Eastern Railway,1918 **The Locomotives of Robert Riddles** Colin

Boocock,2023-11-09 The Locomotives of Robert Riddles guides the reader in the quest to understand how Robert Riddles career on the LMS and in war service shaped his knowledge and character and led to him becoming the obvious choice for leading the locomotive engineering function within the newly formed Railway Executive The book outlines the substantial impact Riddles had on the design and supply of locomotives that were to support the Allied military campaigns in the second world war including useful analysis of the types of locomotives specifically designed for that work The bulk of the book outlines the decision making processes that led to the twelve designs of standard steam locomotives that were intended to be the future stop gap before electrification and the political and practical reasons for successive policy changes that led to their unexpectedly short lives Those events include the 1955 Modernization Plan with its emphasis on dieselization and the subsequent railway rationalizations that reduced the need not only for new steam locomotives but also made relatively new diesels redundant Each BR standard locomotive type is described in its own chapter The performance of each class is given its rightful emphasis The book is comprehensively illustrated with largely unpublished pictures that cover a wide range of locations and locomotive duties
