**The Green to Gold Business Playbook** Daniel C. Esty, P. J. Simmons, 2011-04-08 Implement the green strategies outlined in Dan Esty s and Andrew Winston s bestseller Green to Gold Hard nosed business advice for gaining competitive advantage through sustainability action in buildings and operations information technology product design sourcing manufacturing logistics and transportation marketing accounting and other key business functions Whether you are a climate

change skeptic or an environmentalist sustainability issues cannot be ignored in today's corporate world. With rising energy and natural resource costs, intensified regulations, investor pressures, and a growing demand for environmentally friendly products, sustainability is no longer an option; it's a business imperative. Unlike many green business books, the Playbook skips the environmental ideology and deals exclusively with tools and strategies that have been shown to cut costs, reduce risks, drive revenues, and build brand identity. Builds on Dan Esty and Andrew Winston's prizewinning *Green to Gold*, which has become a business classic and a staple of management training across the world. Shows in detail how each business function or department can achieve an eco advantage over the competition. Offers frameworks, checklists, and action plans applicable to any business, big or small, in manufacturing or services. The *Green to Gold Business Playbook* gives you the tools to make green work and work profitably for your business.

**Advances in Intelligent Manufacturing** Grzegorz Krolczyk, Chander Prakash, Sunpreet Singh, Joao Paulo Davim, 2020-06-09. This book consists of select proceedings of the International Conference on Functional Material Manufacturing and Performances ICFMMP 2019 and presents latest research on using the combined intelligence of people, processes, and machines to impact the overall economics of manufacturing. The book focuses on optimizing manufacturing resources, improving business value and safety, and reducing waste both on the floor and in back office operations. It highlights the applications of the latest manufacturing execution system (MES), intelligent devices, machine-to-machine communication, and data analysis for the production lines and facilities. This book will be useful to manufacturers of finished goods and of sub-assemblies in the automotive, agriculture, and construction equipment sector. It will also provide solutions to make production strategies exceptional and can be a useful reference for beginners, researchers, and professionals interested in intelligent manufacturing technologies.
