Brodzinsky, 2014-02-24 First published in 1986 Over the past decade and a half the rising divorce rate coupled with other changes in family life has led some observers to conclude that the traditional nuclear family today is analogous to a species of dinosaur facing an inevitable Ice Age and with it extinction During this recent period of social upheaval in which the American family has undergone considerable change there has been an exciting upswing in research

Cocking,2014-02-25 This book constitutes the first time in the field of developmental psychology that cross cultural roots of minority child development have been studied in their ancestral societies in a systematic way and by an international group of researchers Most child development and child psychology texts take cultural diversity in development into account only as an addendum or as a special case it is not integrated into a comprehensive theory or model of development The purpose of this text is to redress this situation by enlisting insiders and outsiders perspectives on socialization and development in a diverse sampling of the world s cultures including developing regions that often lack the means to speak for themselves in the arena of international social science The unique feature of this text is the paradigm For the minority groups represented the questions focused on how development was behaviorally expressed within the culture of origin and in new societal contexts Thus developmental issues such as language and mother child interactions for African American children are considered in the United States as well as in the African culture of origin and in France as a country of immigration This paradigm is considered for African and Asian cultures and the Americas including Hispanics from Mexico as well as Native Americans Specific questions posed consider the extent to which the development and socialization of minority children can be seen as continuous with their ancestral cultures the cultural and political conditions in the United States Canada and France have modified developmental and socialization processes yielding discontinuities with ancestral cultures the ancestral cultures have changed yielding cross generational discontinuities in the development and socialization of immigrants from the very same countries the role of interdependence and independence in developmental scripts can account for historical continuities and discontinuities in development and socialization both across and within cultures These questions not only provide the unifying theme of this unique book but also a model for conceptualizing multi culturalism within a unified framework for developmental psychology **Family, Self, and Human Development Across Cultures** Cigdem Kagitcibasi,2007-03-09 Reflecting author igdem Kagit ibasi s influential work over the last two decades this new edition examines human development the self and the family in a cultural context It challenges the existing assumptions in mainstream western psychology about the nature of individuals The author proposes a new model the Autonomous Related Self which expands on existing theory by demonstrating how culture influences self development The development of competence is examined from a contextual perspective with a view towards global urbanization which is creating increasingly similar lifestyles around the world The implications of this perspective are discussed extensively particularly early intervention policy implications related to promoting human competence in immigration and acculturation Rich in both theory and application each topic is introduced with a historical antecedent and earlier research before current

work is discussed This new edition also features a new theoretical perspective that integrates cultural variation with universal human development trajectories in the context of social change globalization and immigration two new chapters on Parenting and the Development of the Autonomous Related Self and Immigration and Acculturation a more student friendly approach with boxed stories summary and main point reviews discussion questions and an extensive bibliography in each chapter and a comprehensive glossary of all the book s key terms for a quick reference Intended as a graduate or advanced undergraduate level text for courses addressing cross cultural psychology taught in a variety of departments including developmental community family and educational psychology this comprehensive volume will also appeal to researchers interested in issues of human development in a socio cultural context

Father-Child Relations Barry S. Hewlett, Due to a greater involvement of American fathers in the direct care of their children in recent years interest in the impact and nature of the father's role in nurturing children has increased While studies about fathers in the industrialized literate West have proliferated little is known about the role of fathers in the preliterate non Western world This collection examines the diversity of paternal roles found in human cultures among various types of societies that are very peaceful and those that actively engage in warfare as a mode of existence Father Child Relations recognizes the importance of understanding both biological and cultural aspects of the father's role Many of the contributors utilize evolutionary or biosocial models including those of developmental psychology to examine the father's role while others rely upon the symbolic analysis of cultural and social anthropology One chapter is devoted to male infant relationships in nonhuman primates a further largely ignored comparative perspective The anthropologists who have contributed to this collection are field workers who have lived intimately over significant periods of time with the people about whom they are writing These research reports from the field have been edited to make them wholly accessible to the non specialist The contributors of this volume recognize that biology and ideology are intertwined both together influence the father's behavior and the effects of his behavior
