Riehle, 2024 This book will introduce readers to Russia's Federal Security Service FSB Since its founding in 1995 the FSB has reaccumulated the majority of the domestic security functions of the Soviet era KGB Vladimir Putin served as FSB director just before reaching the presidency and with his patronage the FSB has grown to be one of the most powerful organizations in Russia Early FSB personnel largely came from the KGB and the organization has continued to exhibit a similar mindset The FSB conducts anti dissident activities at home and abroad counterintelligence operations and counterterrorist operations This concise history will cover the FSB's origins place within government and society culture leaders activities international partners and depictions in literature and film This book will be based on English and Russian sources     Global Secret and Intelligence Services III Heinz Duthel, 2014-11-04 ECHELON ECHELON is a term associated with a global network of computers that automatically search through millions of intercepted messages for pre programmed keywords or fax telex and e mail addresses Every word of every message in the frequencies and channels selected at a station is automatically searched The processors in the network are known as the ECHELON Dictionaries ECHELON connects all these computers and allows the individual stations to function as distributed elements an integrated system An ECHELON station's Dictionary contains not only its parent agency's chosen keywords but also lists for each of the other four agencies in the UKUSA system NSA GCHQ DSD GCSB and CSE Somebody's listening and they don't give a damn about personal privacy or commercial confidence     **Communist Bloc Intelligence Activities in the United States** United States. Congress. Senate. Committee on the Judiciary. Subcommittee to Investigate the Administration of the Internal Security Act and Other Internal Security Laws, 1975     Dictatorship and Information Martin K. Dimitrov, 2023 Fear pervades dictatorial regimes Citizens fear leaders the regime's agents fear superiors and leaders fear the masses The ubiquity of fear in such regimes gives rise to the dictator's dilemma where autocrats do not know the level of opposition they face and cannot effectively neutralize domestic threats to their rule The dilemma has led scholars to believe that autocracies are likely to be short lived Yet some autocracies have found ways to mitigate the dictator's dilemma As Martin K Dimitrov shows in Dictatorship and Information substantial variability exists in the survival of nondemocratic regimes with single party polities having the longest average duration Offering a systematic theory of the institutional solutions to the dictator's dilemma Dimitrov argues that single party autocracies have fostered channels that allow for the confidential vertical transmission of information while also solving the problems associated with distorted information To explain how this all works Dimitrov focuses on communist regimes which have the longest average

lifespan among single party autocracies and have developed the most sophisticated information gathering institutions Communist regimes face a variety of threats but the main one is the masses Dimitrov therefore examines the origins evolution and internal logic of the information collection ecosystem established by communist states to monitor popular dissent Drawing from a rich base of evidence across multiple communist regimes and nearly 100 interviews Dimitrov reshapes our understanding of how autocrats learn or fail to learn about the societies they rule and how they maintain or lose power
