Erickson,Charles Wilhelm,2017-07-12 Homelessness has become a lasting issue of vital social concern As the number of the homeless has grown the complexity of the issue has become increasingly clear to researchers and private and public service providers The plight of the homeless raises many ethical anthropological political sociological and public health questions The most serious and perplexing of these questions is what steps private charitable and public organizations can take to alleviate and eventually solve the problem The concept of homelessness is difficult to define and measure Generally persons are thought to be homeless if they have no permanent residence and seek security rest and protection from the elements The homeless typically live in areas that are not designed to be shelters e g parks bus terminals under bridges in cars occupy structures without permission e g squatters or are provided emergency shelter by a public or private agency Some definitions of homelessness include persons living on a short term basis in single room occupancy hotels or motels or temporarily residing in social or health service facilities without a permanent address Housing the Homeless is a collection of case studies that bring together a variety of perspectives to help develop a clear understanding of the homelessness problem The editors include information on the background and politics of the problem and descriptions of the current homeless population The book concludes with a resource section which highlights governmental policies and programs established to deal with the problem of homelessness *USDA Forest Service Experimental Forests and Ranges* Deborah C. Hayes,Susan L. Stout,Ralph H. Crawford,Anne P. Hoover,2014-07-22 USDA Forest Service Experimental Forests and Ranges EFRs are scientific treasures providing secure protected research sites where complex and diverse ecological processes are studied over the long term This book offers several examples of the dynamic interactions among questions of public concern or policy EFR research and natural resource management practices and policies Often trends observed or expected in the early years of a research program are contradicted or confounded as the research record extends over decades The EFRs are among the few areas in the US where such long term research has been carried out by teams of scientists Changes in society s needs and values can also redirect research programs Each chapter of this book reflects the interplay between the ecological results that emerge from a long term research project and the social forces that influence questions asked and resources invested in ecological research While these stories include summaries and syntheses of traditional research results they offer a distinctly new perspective a larger and more complete picture than that provided by a more typical 5 year study They also provide examples of long term research on EFRs that have provided answers for questions not even imagined at the time the study was installed **Proceedings** ,1975 *Fernow Experimental Forest, Tucker County* ,2005 **Proceedings,**
