Social Mind Language Ideology And Social Practice:

The Social Mind James Paul Gee, 1992 Stepping beyond cognitive science's new theory of connectionism Gee formulates a dynamic social theory of mind and meaning With penetrating analyses he illustrates how such psychological entities as memories beliefs values and meanings are not formed in isolation but in a social or cultural context that is inherently ideological or political As he moves toward his conclusion showing what socio culturally situated linguistics would look like and points to some of the implications for human development education and society inherent in this view of linguistics Gee persuasively demonstrates how people often construct self deceptive stories that advantage themselves or their group In the first half of the book Gee lays the groundwork for the overall theory of language mind and society that is developed in the two concluding chapters He develops a concept of meaning as being rooted in cultural models introduces a connectionist view of the mind brain and argues that memory is a social phenomenon Then Gee sketches together a theory of mind and society and the nature of socio cultural based psychology He explicitly displays how language fits within social practices and exemplifies claims about the political and ideological nature of social practices This is a thought provoking contribution for courses dealing with discourse narrative social linguistics education social theory cognitive science social cognition and linguistics in anthropology

Raising Standards in Literacy Ros Fisher, Greg Brooks, Maureen Lewis, 2002 Raising Standards in Literacy represents the best current thinking and research about literacy The book is the outcome of a high profile series of seminars on raising standards in literacy and includes contributions from an impressive group of international researchers and policymakers By offering a rich and unique mix of contemporary perspectives on literacy education this book provides an invaluable source of study and insight into the latest research and developments in the teaching of literacy It includes sections on how research into literacy teaching can inform new approaches found in England the USA and Australia the ways in which literacy education is developing in England the USA and Australia the issues involved in assessing progress in literacy and the validity of research claims made about standards of attainment The book celebrates the apparent success of current literacy initiatives at the same time as raising questions about the feasibility and relevance of such initiatives to the literacy coordinators and consultants and for all those undertaking further study or research in literacy education
