Social Problems Eric Bonds, 2014-06-05 This short book lays out a new definition for what constitutes a social problem the violation of a group's human rights which are understood as commonly upheld standards about what people deserve and should be protected from in life Evaluating U S society from an international human rights perspective Bonds also stresses that human rights are necessarily political and can therefore never be part of a purely objective exercise to assess wellbeing in a particular society His approach recognizes that there is no one single interpretation of what rights mean and that different groups with differing interests are going to promote divergent views some better than others This book is ideal for undergraduate sociology courses on social problems as well as courses on social justice and human rights

Social Problems John B. Williamson, Jerry F. Boren, Linda Evans, 1977 *Media Bias?* Tawnya J. Adkins Covert, Philo C. Wasburn, 2009-01-01 Media Bias addresses the question To what extent can mainstream news media be characterized as conservative or liberal The study involves a systematic comparative analysis of the coverage given to major domestic social issues from 1975 to 2000 by two mainstream newsmagazines Newsweek and Time and two explicitly partisan publications the conservative National Review and the liberal Progressive Working from the idea that some biased accounts of social issues can perform several positive functions for the maintenance and vitality of political democracy Adkins Covert and

Wasburn offer a new methodology for analyzing bias empirically one that is capable of producing valid and reliable findings They begin by defining the meaning of bias and discuss possible methods of measuring media bias empirically and systematically By comparing each publication s coverage on poverty crime the environment and gender issues in which the line between the conservative and liberal positions are clearly delineated the authors consider both the positive and negative consequences of media bias and how the bias plays out within a media conscious democratic society **Sociological**

explore commonalities and contrasts between strategy in armed conflict and strategy in public health The first part uses the asymptotic limit theorems of information and control theories to study strategy as an exchange of messages between adversaries in the context of underlying power relations The messages to be exchanged are constructed from an alphabet of tactics available to each contender in a large sense The second part of the book explores four case histories from this perspective ranging across agribusiness generated pandemics through tuberculosis and COVID 19 The final chapter attempts a strategic synthesis applicable more specifically to public health than to the remarkably and disturbingly close parallel of armed conflict Taking a unique approach to public health tactics and strategy this volume will be of interest to social epidemiologists public health economists public policy scientists as well as public health researchers and practitioners

Handbook of Marriage and the Family Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4

Searching for a Demon Steven M. Chermak, 2002 This provocative volume thoroughly examines the ways in which the media demonized militia groups following the devastating bombing of the Alfred F Murrah building in Oklahoma City Using quantitative and qualitative research methods Steven M Chermak offers a fresh perspective on how news coverage and popular entertainment transformed a largely overlooked movement into a symbol for this new threat of domestic terrorism and ignited a national panic over the militia menace *Searching for a Demon* describes the representation of the militia movement in the news media editorial cartoons films and television Chermak delves into such topics as the type and amount of coverage after the blast how social problems are constructed in the news the motivations and biases of authoritative or celebrity figures used as news sources and why images of militias were framed in specific ways Chermak balances his account with an in depth look at the philosophies activities and strategies of militia groups Drawing on extensive interviews he conducted at gun shows and preparedness exhibitions the author compares and contrasts media depictions of militia life and ideology with the firsthand accounts of members and leaders themselves and he assesses how media coverage affected changes in the movement In conclusion Chermak discusses the parallels between media treatment of militias in the wake of the Oklahoma City bombing and the coverage of the al Qaeda terrorist network after the September 11 2001 attacks Solidly grounded in social constructionist theory *Searching for a Demon* fills a significant gap in the literature on terrorism

as well as on the roles of the news media and popular culture in reshaping the public consciousness after dramatic crimes
