Social Inclusion: Societal and Organizational Implications for Information Systems

Eileen Trauth, Debra Howcroft, Tom Butler, Brian Fitzgerald, Janice DeGross, 2006-09-13 Changes in society resulting from the pervasiveness of information technology have produced positive and negative intended and unintended consequences Key among them is the exclusion of individuals who lack access to technological resources from various societal processes and services The theme of this book social inclusion explores the many dimensions of this exclusion This issue has been the focus of much debate within the social sciences yet has largely been underresearched in the Information Systems field despite our concerns with the social and organizational aspects of technology To the extent that contemporary debates have identified access to information as a key component of poverty digital exclusion is seen as the problem Thus ICTs are portrayed as either exacerbating exclusion or are presented as the solution for greater inclusion This conference will provide us with the opportunity to build upon our strong tradition of studying technology design and use in organizations and expand our field of enquiry to consider the processes that engender social exclusion and the issues that derive from it This theme invites consideration of social and organizational constraints that result in the underrepresentation of certain groups and by implication certain issues Likewise it invites consideration of emerging technologies that have the potential to alter social political and economic relations Much is being written about the ubiquitous nature of ICTs to change society for example open source software has recently emerged as a concept with implications far beyond the technology domain This suggests

that the role of ICTs in addressing social exclusion is far more complex than often thought For this reason it is timely to expand our focus and progress the study of IS beyond the organizational level of analysis so that we may consider wider concerns affecting all citizens This book contains the proceedings of the Working Conference on the societal and organizational implications for information systems of social inclusion This conference sponsored by the International Federation for Information Processing Working Group 8.2 was held in Limerick Ireland July 12-15 2006 *Urban Regeneration in Europe* Chris Couch, Charles Fraser, Susan Percy, 2008-04-15 This book provides a comparative account of the process of urban regeneration and examines the factors influencing these processes as well as the consequences of their implementation Through a mixture of theoretical discussion and a series of case studies a thorough examination is made of the extent to which these different European old industrial conurbations are facing similar problems **The Oxford Handbook of Urban Politics** Karen Mossberger, Susan E. Clarke, Peter John, 2015-02-15 The Oxford Handbook of Urban Politics is an authoritative volume on an established subject in political science and the academy more generally urban politics and urban studies The editors are all recognized experts and are well connected to the leading scholars in urban politics The handbook covers the major themes that animate the subfield the politics of space and place power and governance urban policy urban social organization citizenship and democratic governance representation and institutions approaches and methodology and the future of urban politics Given the caliber of the editors and proposed contributors the volume sets the intellectual agenda for years to come **Reshaping Regional Planning** Brita Olerup, 2017-11-30 This title was first published in 2002 Uniting scholars from across the full range of social sciences this distinctive volume provides a unique overview of northern European planning It examines all the key issues as well as the evolution traditions current innovations and future developments in the field of planning Focusing on how planning impacts upon social issues such as employment social exclusion and quality of life the volume also looks at innovations in planning policy and practice in particular the challenge of sustainability The contributors analyze the built environment's relationship with culture and take a critical look at the creative rethinking currently taking place in Nordic planning **Religious Communities and Civil Society in Europe** Rupert Graf Strachwitz, 2019-08-19 The seemingly vitalizing impact of religiosity on civil society is a research topic that has been extensively looked into not only in the USA but increasingly also in a European context What is missing is an evaluation of the role of institutionalized religious communities and of circumstances that facilitate or impede their status as civil society organisations This anthology in two volumes aims at closing this gap by providing case studies regarding political legal and historical aspects in various European countries Vol I provides an introduction and looks at cases in Greece Italy the Netherlands Sweden and Bosnia and Herzegovina as well as chapters on legal issues and data and comprehensive bibliography
