Making Sense of Cities Blair Badcock, 2014-04-23 In 2000 for the first time a majority of the world's population was living in cities. The trend towards increasing urbanization shows no sign of slowing and the third millennium looks set to be an unprecedentedly urban one. Making Sense of Cities provides an up to date vibrant and accessible introduction to urban geography. It offers students a sense of the patterns and processes of urbanization and the spatial organisation of cities recognizing the significance of globalization economics politics and culture from a range of perspectives. Above all it seeks to provide a relevant approach inviting students to engage with competing theories of the urban and to assess them against the background of their own opinions and personal experience. Examples and case studies are drawn from a range of international settings from San Francisco to Shanghai Sydney to Singapore giving a genuinely global coverage. The book is written in a fresh and engaging style and is fully illustrated throughout. It is designed to appeal to any student of the urban and will be essential to students of geography urban studies town planning and land economy.

The Transformation of Cities David C. Thorns, 2017-03-14 The aim of the book is to examine the transformation of the city in the late 20th century and explore the ways in which city life is structured. The shift from modern industrial to information consumption based post modern cities is traced through the text. The focus is not just on America and Europe but also explores cities in other parts of the world as city growth in the twenty first century will be predominantly outside of these regions.

Urban Geography Michael Pacione, 2009-03-16 Today for the first time in the history of Humankind urban dwellers outnumber rural residents. Urban places towns and cities are of fundamental importance for the distribution of population within countries in the organization of economic production distribution and exchange in the structuring of social reproduction and cultural life and in the allocation and exercise of power. Furthermore in the course of the present century the number of urban dwellers and level of global urbanisation are destined to increase. Even those living beyond the administrative or functional boundaries of a town or city will have their lifestyle influenced to some degree by a nearby or even distant city. The analysis of towns and cities is a central element of all social sciences including geography which offers a particular perspective on and insight into the urban condition. The principal goal of this third edition of the book remains that of providing instructors and students of the contemporary city with a comprehensive introduction to the expanding field of urban studies. The structure of the first two editions is maintained with minor amendments. Each of the thirty chapters has been revised to incorporate recent developments in the field. All of the popular study aids are retained the glossary has been expanded and chapter references and notes updated to reflect the latest research. This third edition also provides new and expanded discussions of key themes and debates including detailed consideration of metacities boomburbs public space urban sprawl balanced communities urban economic

restructuring poverty and financial exclusion the right to the city urban policy reverse migration and traffic and transport problems The book is divided into six main parts Part one outlines the field of urban geography and explains the importance of a global perspective Part two explores the growth of cities from the earliest times to the present day and examines the urban geography of the major world regions Part three considers the dynamics of urban structure and land use change in Western cities Part four focuses on economy society and politics in the Western city In part five attention turns to the urban geography of the Third World where many of the countries experiencing highest rates of urban growth are least well equipped to respond to the economic social political and environmental challenge Finally part six affords a prospective on the future of cities and cities of the future New to this edition are further readings based on the latest research updated data and statistics an expanded glossary new key concepts additional study questions and a listing of useful websites The book provides a comprehensive interpretation of the urban geography of the contemporary world Written in a clear and readable style lavishly illustrated with more than eighty photographs 180 figures 100 tables and over 200 boxed studies and with a plethora of study aids *Urban Geography A Global Perspective* represents the ultimate resource for students of urban geography

Consuming Cities Ingemar Elander, Brendan Gleeson, Rolf Lidskog, Nicholas Low, 2005-08-12 This book is about cities as engines of consumption of the world's environment and the spread of policies to reduce their impact It looks at these issues by examining the impact of the Rio Declaration and assesses the extent to which it has made a difference *Consuming Cities* examines this impact using case studies from around the world including the USA Japan Germany the UK China India Sweden Poland Australia and Indonesia The contributors all have direct experience of the urban environment and urban policies in the countries on which they write and offer an authoritative commentary which brings the urban consumption dimension of sustainable development into focus

Greening Post-Industrial Cities

Corina McKendry, 2017-09-22 City greening has been heralded for contributing to environmental governance and critiqued for exacerbating displacement and inequality Bringing these two disparate analyses into conversation this book offers a comparative understanding of how tensions between growth environmental protection and social equity are playing out in practice Examining Chicago USA Birmingham UK and Vancouver Canada McKendry argues that city greening efforts were closely connected to processes of post industrial branding in the neoliberal economy While this brought some benefits concerns about the unequal distribution of these benefits and greening s limited environmental impact challenged its legitimacy In response city leaders have moved toward initiatives that strive to better address environmental effectiveness and social equity while still spurring growth Through an analysis that highlights how different varieties of liberal environmentalism are manifested in each case this book illustrates that cities though constrained by inconsistent political will and broader political and economic contexts are making contributions to more effective socially just environmental governance Both critical and hopeful McKendry s work will interest scholars of city greening environmental governance and comparative urban politics

Geography and Ethics James D. Proctor, David M. Smith, 2002-09-11 This book represents a landmark exploration of the common terrain of geography and ethics Drawing together specially commissioned contributions from distinguished geographers across the UK North America and Australasia the place of geography in ethics and of ethics in geography is examined through wide ranging thematic chapters Geography and Ethics is divided into four sections for discussion and exploration of ideas Ethics and Space Ethics and Place Ethics and Nature and Ethics and knowledge all of which point to the rich interplay between geography and moral philosophy or ethics

Handbook of Urban Studies Ronan Paddison, 2001 The Handbook of Urban Studies provides the first comprehensive up to date account of the urban condition relevant to a wide readership from academics to researchers and policymakers It provides a theoretically and empirically informed account embracing all the different disciplines contributing to urban studies Leading authors identify key issues and questions and future trends for further research and present their findings so that where appropriate they are relevant to the needs of policymakers Using the city as a unifying structure the Handbook provides an holistic appreciation of urban structure and change and of the theories by which we understand the structure development and changing character of cities

The Political Economy of City Branding Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways One of its manifestations

is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding *Introducing Human Geographies, Second Edition* Paul Cloke, Philip Crang, Mark Goodwin, 2013-01-11

Introducing Human Geographies is a comprehensive stimulating and innovative introduction to human geography This second edition has been thoroughly revised and updated to build upon the success of the acclaimed first edition Now in full colour and with sixteen new chapters discussion points and glossary definitions in the margin it is even more accessible Part one discusses the principal ideas through which human geographers understand and shape their subject Part two examines each of the main sub fields cultural geography development geography economic geography environmental geography historical geography political geography rural geography social geography urban geography Part three demonstrates how different thematic interests are combined in cutting edge human geographical debates *Introducing Human Geographies* continues to be the essential textbook for first year undergraduate geography students taking introductory courses in human geography

Remaking Post-Industrial Cities Donald K. Carter, 2016-03-02 *Remaking Post Industrial Cities* Lessons from North America and Europe examines the transformation of post industrial cities after the precipitous collapse of big industry in the 1980s on both sides of the Atlantic presenting a holistic approach to restoring post industrial cities Developed from the influential 2013 Remaking Cities Congress conference chair Donald K Carter brings together ten in depth case studies of cities across North America and Europe documenting their recovery from 1985 to 2015 Each chapter discusses the history of the city its transformation and prospects for the future The cases cross cut these themes with issues crucial to the resilience of post industrial cities including sustainability doing more with less public engagement and equity social economic and environmental the most important issue cities face today and for the foreseeable future This book provides essential lessons learned from the mistakes and successes of these cities and is an invaluable resource for practitioners and students of planning urban design urban redevelopment economic development and public and social policy *Urban Sores* Hans

Skifter Andersen, 2019-01-15 This title was first published in 2003 Most European cities have experienced problems in certain neighbourhoods that are termed deprived or excluded Traditionally these were found in the oldest urban areas with lowest quality housing but since the 1980s such areas have emerged in housing estates built around the cities edges These neighbourhoods are marked by visible physical and social problems that disfigure the otherwise pleasant urban landscape and can be seen as urban sores This engaging and thought provoking book provides a deeper understanding of why urban decay and deprived neighbourhoods appear in certain parts of cities as well as how they affect residents and cities in general Drawing on in depth empirical research from Denmark it compares this with other studies from Europe and the United States The author combines theories and methodologies from the fields of geography on segregation economics on processes of urban decay and social research on social exclusion and deprived neighbourhoods to provide original illuminating and invaluable insights *Social Polarization in Post-industrial Metropolises* John Vianney O'Loughlin, Jürgen Friedrichs, 1996

How to Build a Global City Michele Acuto, 2022-01-15 In *How to Build a Global City* Michele Acuto considers the rise of a new generation of so called global cities Singapore Sydney and Dubai and the power that this concept had in their ascent in order to analyze the general relationship between global city theory and its urban public policy practice The global city is often invoked in theory and practice as an ideal model of development and a logic of internationalization for cities the world over But the global city also creates deep social polarization and challenges how much local planning can achieve in a world economy Presenting a unique elite ethnography in Singapore Sydney and Dubai Acuto discusses the global urban discourses aspirations and strategies vital to the planning and management of such metropolitan growth The global city he shows is not one single idea but a complex of ways to imagine a place to be global and aspirations to make it so often deeply steeped in politics His resulting book is a call to reconcile proponents and critics of the global city toward a more explicit engagement with the politics of this global urban imagination **Healthy Cities** Namir Khan, Willem H. Vanderburg, 2001 Modern cities

can be designed to constitute a more supportive environment for a great many activities provide a more livable habitat and reduce the burden imposed on the biosphere They can be made healthier in terms of the definition by World Health Organization and more sustainable by means of new and emerging preventive approaches *Healthy Cities* focuses on those preventive approaches that can make cities healthier and more sustainable This book as well as the two companion volumes *Sustainable Energy* and *Sustainable Production* is the result of a twelve year research project carried out at the Center for Technology and Social Development at the University of Toronto The research findings led to the development of a new conceptual framework and strategy aimed at converting technological and economic growth into development that would gradually become more sustainable *International Handbook of Globalization and World Cities* Ben Derudder, 2012-02-01

This Handbook offers an unrivalled overview of current research into how globalization is affecting the external relations and internal structures of major cities in the world By treating cities at a global scale it focuses on the stretching of urban

functions beyond specific place locations without losing sight of the multiple divisions in contemporary world cities The book firmly bases city networks in their historical context critically discusses contemporary concepts and key empirical measures and analyses major issues relating to world city infrastructures economies governance and divisions The variety of urban outcomes in contemporary globalization is explored through detailed case studies Edited by leading scholars of the Globalization and World Cities GaWC Research Network and written by over 60 experts in the field the Handbook is a unique resource for students researchers and academics in urban and globalization studies as well as for city professionals in planning and policy
