Brewer, 2013-03-28 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com What is the purpose of social science How can social science make itself relevant to the intractable problems facing humanity in the twenty first century The social sciences are under threat from two main sources One is external reflected in a global university crisis that imposes the marketization of higher education on the ancient practice of scholarship The other internal threat is social science s withdrawal from publicly engaged teaching and research into the protective bunker of disciplinarity In articulating a vision for the public role of social science in the twenty first century John Brewer argues that these threats also constitute an opportunity for a new public social science to emerge confident in its public value and fully engaged with the future of humanity in its teaching research and civic responsibilities while also remaining committed to science The argument is presented in the form of an interpretive essay thought provoking forward looking and challenging to intellectual orthodoxy It should be read and debated by all researchers and teachers in the social science disciplines who are concerned by the future of higher education and the relevance of their subjects to the future of humankind *The SAGE Handbook of Qualitative Research* Norman K. Sociology and Social Research (RLE Social Theory) Geoff Payne,Robert Dingwall,Judy Payne,Mick Carter,2014-08-21 A social science which has become so remote from the society which pays for its upkeep is ultimately doomed threatened less by repression than by intellectual contempt and financial neglect This is the message of the authors of this book in this reassessment of the evolution and present state of British sociology Their investigation analyses the discipline as a social institution whose product is inexorably shaped by the everyday circumstances of its producers it is the concrete outcome of people s work rather than a body of abstract ideas Drawing upon their varied experience as teachers and researchers they identify three major trends in contemporary sociology First that the discipline s rapid expansion has led to a retreat from rigorous research into Utopian and introspective theorising Second that the concept of sociological research is being taught in a totally false way because of this and encourages research within a wholly academic environment Third that the current unpopularity of sociology with academics prospective students and

politicians is no coincidence but a reflection of the conditions under which sociology is now produced and practised In Sociology and Social Research the authors suggest substantial changes in sociological research the way in which it is carried out and the conditions under which it is undertaken Their book is a timely warning to fellow sociologists when the profession is under attack as a result of public expenditure cuts
