Social Workers And Their Practice In Welfare Bureaucracies:

Social Workers and Their Practice in Welfare Bureaucracies David Howe, 1986 *The McDonaldization of Social Work* Donna Dustin, 2016-02-17 Based upon George Ritzer's McDonaldization of Society thesis and incorporating aspects of social theory this book examines the introduction of care management to social work practice Donna Dustin analyzes care management as an example of the managerial application of efficiency calculability predictability and control to social work practice These principles put to good use in organizations that produce tangible outputs at a profit are being increasingly applied in non profit public sector organizations where the outcomes require intangibles such as professional relationships The author examines whether the McDonaldization process heightens dilemmas such as cost versus rights for professionals working in the social services Using social theory to frame her research with care managers and their managers in the UK the author examines the day to day implications of care management for social work practice and questions whether the construction of service users as customers contributes to empowering practice The book's in depth analysis of the policy background implementation and practice of care management will resonate with social workers in other national contexts such as the US where the care management model has been introduced [Reflecting on Social Work - Discipline and Profession](#)

Karen Lyons, 2017-03-02 Social work has always been a contested activity and its status as an academic discipline remains uncertain There is currently renewed interest in the theoretical and research dimensions of social work at a time when significant changes in the broad social political and economic context in which practice takes place require a re evaluation of social work's role and a re examination of its identity This timely book brings together leading social work academics to examine the state of social work at the beginning of the 21st century With their focus on the relationships between research theory and practice they reflect critically on the nature of social work as a discipline in higher education and the importance of this to the profession as a whole The book represents an exploratory conversation among social work academics about the current state and future aspirations of the discipline and the profession It aims to stimulate wider debate about the dominant constraints and opportunities for social work in the 21st century [Managing State Social Work](#)

John Harris, 2018-12-20 Published in 1998 The industrial model of the labour process developed by Braverman was applied to social work in the radical social work literature The book engages in a more critical examination of the application of the labour process perspective to social work with particular reference to front line management in a local authority context It begins with a review of the labour process literature which demonstrates the extent to which the independence of Braverman's model on scientific management was undermined in the post Braverman debate The radical texts orthodox Bravermanian approach to the social work labour process is considered In those texts the social work labour process is represented as having moved towards an industrial model which steadily encroached on the autonomy of front line field social workers through managers wresting of control over their work The book advances an alternative model of the social work labour

process which takes account of the distinctive features of social work as a state mediated bureau professional labour process Findings from a small scale case study of a social services department are presented Data from the study are used to test the bureau professional model of the social work labour process against the orthodox Bravermanian model Developments in the social services department s organizational structure are set out and the position of front line managers is considered through an exploration of their identifications and commitments in relation to management and trade unionism The data from their accounts support the bureau professional model of the labour process and the position of front line managers emerges as more ambiguous than the radical social work literature indicated Front line managers did not share global goals with senior management nor were their interests merged straightforwardly with those of social workers *Contemporary Field Social Work* Mark Doel, Steven M Shardlow, Steven Shardlow, Paul G. Johnson, 2010-06-29 This text bridges the gap by offering learning activities that can be worked in both settings The book is divided into four main parts that accounts for the major areas of social work practice Part I covers the foundations of practice including self awareness and knowing and learning about the community within one will practice The second part deals with direct practice and covers individual assessment and group work The third part focuses on agency practice and finally the last part covers special issues for consideration including multicultural practice law informed practice ethics specialist and comparative practice *An Introduction to Social Work Theory* David Howe, 2017-03-02 Social workers need to recognize the critical role that theory plays both in the way they make sense of what is going on and in the way they order their work Such recognition clarifies practice for both the worker and the client David Howe s classic text provides a framework to help social workers develop an understanding of the theories which inescapably underpin their thoughts and actions This edition contains a new preface by the author written in 2008 in which he examines the continuing value of his framework concluding that it remains an effective tool for making sense of the profession s most current ideas The book covers a range of theoretical approaches demonstrating through examples that different theories necessarily lead to very different practices It offers a stimulating guide to social work theory which is proven to help social workers both to understand their practices and to practise in a disciplined and imaginative way **The State of Feminist Social Work** Vicky White, 2006-09-27 Tracing key ideas in feminist social work from the 1970s through to the present day and using data from interviews with female social workers this book examines and explores the current state of feminist social work *Modernising social work* John Harris, Vicky White, 2009-03-31 New Labour s modernisation agenda has produced an avalanche of change that has posed formidable challenges for everyone involved in social work whether as service users practitioners or managers *Modernising Social Work* provides a radical appraisal of the far reaching changes in their theoretical historical and policy contexts The book is organised into three sections that consider the inter relationship of modernisation and managerialism modernisation s impact on service users and the ways in which social workers and front line managers seek to exercise professional discretion for the

benefit of service users within a workplace culture of intensified scrutiny and control Analysis of a range of key developments in all three areas reveals the modernisation agenda as complex and contested The book's three sections cover the main issues of the modernisation agenda making it ideal for teaching Locating the issues in their theoretical historical and policy contexts meets the needs of student readers and experienced social workers will appreciate the emphasis on empirical research as well as practice experience
