Society And Food Science In A Social Context:

Food, Science and Society P.S. Belton, Teresa Belton, 2013-06-29 There is widespread concern amongst consumers about the safety and acceptability of food and there are clearly communication gaps between consumers many food professionals and food industry This book offers accounts of the two way nature of this difficult communication process and steps that can be made to bridge these communication gaps in a variety of social and cultural environments Individual chapters of the book analyze the roles of science culture and risk perception and of mass media and attitudes towards eating An additional section describes the interface between scientists and lay people with regard to policy making and agricultural practice Annals of the American Academy of Political and Social Science ,1922 Communicating Science in Social Contexts Donghong Cheng, Michel Claessens, Nicholas R. J. Gascoigne, Jenni Metcalfe, Bernard Schiele, Shunke Shi, 2008-07-15 Science communication as a multidisciplinary field has developed remarkably in recent years It is now a distinct and exceedingly dynamic science that melds theoretical approaches with practical experience Formerly well established theoretical models now seem out of step with the social reality of the sciences and the previously clear cut delineations and interacting domains between cultural fields have blurred Communicating Science in Social Contexts examines that shift which itself depicts a profound recomposition of knowledge fields activities and dissemination practices and the value accorded to science and technology Communicating Science in Social Contexts is the product of long term effort that would not have been possible without the research and expertise of the Public Communication of Science and Technology PCST Network and the editors For nearly 20 years this informal international network has been organizing events and forums for discussion of the public communication of science **Context** Herbert L. Meiselman, 2019-04-20 Context The Effects of Environment on Product Design and Evaluation addresses the environment or context in which we consume products and the impact of context on choice and acceptability The book explores what context is how it influences design by specialists and acceptance by consumers Chapters discuss the basics of context food and drink in context testing a range of other products and other contextual variables Historically research on context has been done in the laboratory and various natural locations but rapid growth in other methods to study context including evoked contexts immersive contexts virtual reality contexts and more have widened research possibilities Appealing to the professional academic and commercial markets this book will be of interest to those who conduct research in product development and product testing to those who study what controls product usage including eating from the health perspective and to those who make decisions about product and space development Explores information on how context works and how to assess its influence on product decisions Discusses the basics of context food and drink in context and testing other products in context including personal care products and home and workspace design Identifies variables that contribute to the contextual experience **Joint Seminars on the U.N. Conference on Science and Technology for Development (UNCSTD)** United States. Congress. House. Committee on

Science and Technology,1979 Management of Health Risks from Environment and Food Hajime Sato,2009-10-30 This book examines the policy and politics of two health risks which have recently become prominent social issues in many countries One is the issue of asbestos as an environmental risk to humans and another is that of bovine spongiform encephalitis BSE or mad cow disease as an animal disease and of its variant Creutzfeldt Jakob disease CJD as a human food risk Employing a set of analytical frameworks in political science each case study explores how the issues emerged agendas got set alternatives were chosen and policies were implemented Through the analysis it is examined how safety and public reassurance were pursued in the countries studied Japan the UK France the USA and Korea Exploration of the successes and failures in their efforts discloses the key elements to successful health risk management *Education and Training in Food Science* Ian Douglas Morton,J. Lenges,1992 Containing a selection of papers presented at an international conference this volume reviews the need for increased training in the food industry in order to bridge the gap between standards in Eastern and Western Europe and the USA Higher education is discussed including the training of food technicians European initiatives such as ERASMUS and Network are also described The text includes coverage of the importance of international trade and consumer protection acts including a description of the needs of various groups and future developments

Gupitill,Denise A. Copelton,Betsy Lucal,2013-04-03 This timely and engaging text offers students a social perspective on food food practices and the modern food system It engages readers curiosity by highlighting several paradoxes how food is both mundane and sacred reveals both distinction and conformity and in the contemporary global era comes from everywhere but nowhere in particular With a social constructionist framework the book provides an empirically rich multi

faceted and coherent introduction to this fascinating field Each chapter begins with a vivid case study proceeds through a rich discussion of research insights and ends with discussion questions and suggested resources Chapter topics include food s role in socialization identity work health and social change as well as food marketing and the changing global food system In synthesizing insights from diverse fields of social inquiry the book addresses issues of culture structure and social inequality throughout Written in a lively style this book will be both accessible and revealing to beginning and intermediate students alike

Global Perspectives on Building Resilience for Sustainable Rural Development Yuheng Li,2025-12-02 The book brings together rural scholars from the Global North and the Global South who have contributed chapters based on their own contexts The book aims to provide a general picture of how rural communities are responding to challenges in a global context This general picture can be presented through three specific research questions namely 1 What is the socio economic status of rural development in the country This research question tends to explore the socio economic status of rural development in the contributor s country or in the country of study It highlights the challenges to sustainable rural development in the country 2 How are rural communities responding to these challenges This research question focuses on analysing how rural communities are responding to challenges such as depopulation spatial compression economic marginalisation and climate change 3 How can rural resilience to risks and future challenges be built This research question aims to discuss possible approaches and actions to build rural resilience to current challenges and to seek transformation to better cope with and adapt to future challenges and unexpected risks The target audience of this book is researchers postgraduate students and government officials in the field of rural and agricultural development Readers can expect to gain a basic knowledge of rural resilience a deeper understanding of rural development around the world and different approaches to building resilience to challenges and shocks

Food Chemical Risk Analysis David R. Tennant,2012-12-06 Food Chemical Risk Analysis provides an introduction to the sciences of food chemistry and risk analysis and demonstrates how the potential hazards associated with food chemicals can be assessed and managed Food scares are never far from the news and particular attention is therefore focused on the consumer perception of risk and risk communication Leading international experts provide unique insights in the future of food chemical risk analysis Chapters on alternatives to animal testing show how emerging methods offer the prospect of a more rational human based approach to toxicity testing Discussions about relative risks and protective factors highlight the possibility that risks from food can be over estimated and approaches to avoid such risks are proposed The science of risk management is presented as more than just a method for translating science into policy by demonstrating how social psychological economic ethical and other factors can and should be taken into account The book makes it clear that if risk communication is to be effective an integrated approach to risk analysis must be adopted

Social Networks and Food Security in the Urban Fringe Stephen Morse,The Reverend Sister Nora

MacNamara,2020-04-25 This book explores how social groups in the urban fringe of Abuja Nigeria engaged with a series of development projects spanning 15 years 2003 to 2018 which focused on the enhancement of food security for farming households The groups were at the heart of these development projects and the book presents the many insights that were gained by farmers and project agents working within these partnerships and provides advice for those seeking to do the same The book also explores how the social groups attempted to lever benefits from being near to the fastest growing city in Africa and a centre of economic and political power While much has been written about social groups and their embeddedness within wider social networks in Africa and in other parts of the world the exploration of the role of social groups within development projects is an area that remains relatively uncharted and this book seeks to fill that important gap in knowledge It provides an important contribution for all those researching and working with social groups in the developing world

Interfaces between Science and Society Ângela Guimarães Pereira,Sofia Guedes Vaz,Sylvia Tognetti,2017-09-08 The project of science has been to provide answers to questions about the world and how it works Often this lofty role has been characterised by a narrow and dogmatic scientific training an unwillingness to communicate to differing stakeholder needs a refusal to accept and to manage uncertainty complexity and value commitments and the reduction of knowledge assessment to colleague peer review on narrowly technical issues Times have changed As the world faces increasingly disparate challenges science is subjected to increasingly vehement demands from a society calling for transparency openness and public participation in science policy Science is going through an evolutionary process Perhaps the most painful process it has ever encountered Research on the interfaces between science and society is a burgeoning area A new conception of knowledge now appears to be emerging based on the awareness of complexity uncertainty and a plurality of legitimate perspectives and interests Democracy is extending into the previously quite exclusive scientific realm and science must now submit to public scrutiny and participation in the governance of knowledge This book provides much needed reflections on the methods and tools for knowledge quality assurance particularly on its inputs to extended policy and decision making processes The overall aim is to improve the relationship between science and society The discussion involves six themes communicating between plural perspectives accepting and learning how to manage uncertainty complexity and value commitments acknowledging new conceptions of knowledge implementing transparency openness and participation in science policy valuing community based research and exploring how new ICT can support inclusive governance Taken together these themes provide both a framework and vision on how to conceive discuss and evaluate the changes that are occurring The chapters cover theory practice approaches experiences ideas and suggestions for a move beyond talking the talk to walking the walk Science and policy interfaces are dynamic processes needing to permanently redefine themselves and their roles This book contributes to the enrichment and deepening of our

understanding of these important new trends in the social relations of science which are fundamental to our understanding of the prospects for further progress The book will be essential reading for scientists policy makers managers and the public

Justice and food security in a changing climate Hanna Schübel,Ivo Wallimann-Helmer,2023-08-14 The UN s Sustainable Development Goals saw the global community agree to end hunger and malnutrition in all its forms by 2030 However the number of chronically undernourished people is increasing continuously Ongoing climate change and the action needed to adapt to it are very likely to aggravate this situation by limiting agricultural land and water resources and changing environmental conditions for food production Climate change and the actions it requires raise questions of justice especially regarding food security These key concerns of ethics and justice for food security due to climate change challenges are the focus of this book

which brings together work by scholars from a wide range of disciplines and a multitude of perspectives. These experts discuss the challenges to food security posed by mitigation, geoengineering and adaptation measures that tackle the impacts of climate change. Others address the consequences of a changing climate for agriculture and food production and how the Covid-19 pandemic has affected food security and animal welfare.
