theories debates and research in Australian political science **Electoral Systems in Divided Societies** Brij Lal, Peter Larmour, 2012-12-01 In 1987 Fiji had its first change of government since the country became independent in 1970 A new Constitution was drawn up to replace the one adopted at Independence in 1970 The 1990 Constitution contained provisions for its own review within seven years Section 161 The Review was eventually commissioned in March 1995 and reported in September 1996 The chapters in this book assess the CRC's recommendations about the system of electing members of Parliament The following chapters are based on papers presented at a workshop held at ANU's Research School of Pacific and Asian Studies in Canberra in January 1997 Introduction *Political Parties and the Collapse of the Old Orders* John Kenneth White, Philip John Davies, 1999-01-07 With the passage of the Cold War political parties in nearly every corner of the globe have undergone a vast upheaval Old ideas have become obsolete electoral maps have been redrawn party structures have been rebuilt and new leaders have emerged *Political Parties and the Collapse of the Old Orders* describes these changes using several countries as laboratories the United States United Kingdom France Germany Italy Canada Australia Mexico Israel South Africa and Russia While the nature and extent of the political upheavals vary from place to place the transformations in each nation's party system have been extraordinary In this new world order the old political arrangements and old ways of doing things have disappeared The altered states of political parties in the post Cold War world pose a central question what does change look like The answers given here illuminate our understanding of why the world has changed and how political parties are attempting to cope with it New Developments in Australian Politics Brian Galligan, Ian McAllister, John Ravenhill, 1997 An overview of contemporary issues in Australian politics Part I examines the operation of the political system and political culture Part II looks at issues such as republicanism and citizenship Part III examines Australia's recent attempts to reshape defence and foreign policy in response to the post Cold War international environment and Australia's response to the impact of globalisation on the economy Includes references and index Also available in paperback The 14 contributors include Clive Bean Graeme Cheeseman and Glyn Davis Political Parties in Advanced Industrial Democracies Paul Webb, 2002-09-26 How relevant and vital are political parties in contemporary democracies Do they fulfill the functions that any stable and effective democracy might expect of them or are they little more than moribund anachronisms relics of a past age of political life now superseded by other mechanisms of linkage between state and society These are the central questions which this book aims to address through a rigorous comparative analysis of political parties operating in the world's advanced industrial democracies Drawing on the expertise of an impressive team of internationally known specialists the book engages systematically with the evidence to show that while a degree of popular cynicism towards them is often chronic though rarely acute parties have adapted and survived as organizations remodelling themselves to the needs of an era in which patterns of linkage and communication with social groups have been transformed This has enabled them to remain central to democratic systems especially in respect of the political functions of governance

recruitment and albeit more problematically interest aggregation On the other hand the challenges they face in respect of interest articulation communication and participation have pushed parties into more marginal roles within Western political systems The implications of these findings for democracy depend on the observer's normative and theoretical perspectives Those who understand democracy primarily in terms of popular choice and control in public affairs will probably see parties as continuing to play a central role while those who place greater store by the more demanding criteria of optimizing interests and instilling civic orientations among citizens are far more likely to be fundamentally critical

The Politics of the Second Electorate Joni Lovenduski, Jill Hills, 2018-12-19 Prior to publication there had been little study of the political role of women Gender had been seen only as a background variable in social surveys of political behaviour and women had rarely been extensively or separately considered Now in essays specially written for this volume first published in 1981 the authors map out the political behaviour of women in twenty industrially developed countries bringing together and analysing contemporary material on a variety of topics such as voting standing for public office entering the political elite and engaging in political activity outside the formal structures of government In each chapter the history of women's political activity is outlined from the first movements for female suffrage and emancipation to the new political involvement occasioned by the women's movements of the 1970s The impact of differing political systems on the experience of women is considered and some striking similarities and differences are pointed out It has been generally agreed that women's participation in politics has been less than that of men although reasons postulated for this have varied widely The essays in this book offer further suggestions in this area while charting a steady increase in activity by women in all political spheres as feminism politicises issues previously restricted to private or male dominated spheres and women become increasingly concerned to participate

in the political process The authors indicate current trends and explode prevailing myths and the second electorate and they suggest future possibilities both for Political Woman and the Political Science which must take account of feminist political activity Students of social and political science readers seeking comprehensive cross national coverage of party and election data and all interested women will find the book to be a mine of information and a rare and readable picture of half the world's electorate

Intellectual Movements and Australian Society Brian Head, James Walter, 1988 This collection of fifteen essays presents a comprehensive discussion of the main aspects of Australian intellectual life and social and political inquiry in this century The contributors focus on such areas as the place of the intellectual in contemporary Australian life and society the historical role of the intellectual the significance of particular groups including feminists Catholics conservatives and liberals and intellectual traditions in such disciplines as science and literature

Explaining and Predicting Elections Ian Budge, Dennis J. Farlie, 2025-08-01 First published in 1983 Explaining and Predicting Elections is the first cross national and comprehensive explanation of election results It considers why one election differs from another and attempts to account for party gains and losses in the elections which have taken place in twenty three democracies in the post war period Budge and Farlie base their study on a radically new view of party behaviour Parties not arguing or debating over the same issues but talking past each other Their book shows why it is in the parties interest to do this how parties might improve their appeal and how electors react in a broadly rational manner by supporting one party alternative rather than another The discussion also considers important topics for example whether electors are abandoning old partisan loyalties and becoming more volatile The usefulness of these ideas is measured and checked against new evidence from twenty three countries These ideas are then used to produce advance predictions of ten elections in different countries which are then checked against actual results The reader can use the methods to make his own predictions for elections which interest him In many ways this makes Explaining and Predicting Elections the most comprehensive and useful investigation of the election process yet produced It will interest the general reader political practitioner historians and election and area specialists

Social Inequality in Australian Society John Stuart Western, 1983 Chapter 4 demonstrates that Aborigines have limited access to resources facilities and services in Australian society considers factors such as employment income education health access to health and welfare services housing experiences with legal system land rights participation in politics and public affairs

The End of Class Politics? Geoffrey Evans, 1999-09-23 The last few decades has seen a prolonged debate over the nature and importance of social class as a basis for ideology class voting and class politics The prevailing assumption is that in western societies class inequalities are no longer important in determining political behaviour In The End of Class Politics leading scholars from the US UK and Europe argue that the evidence on which the assumptions about the decline importance of class is based is unfounded Instead the book argues that the class basis of political competition has to some degree evolved but not declined Furthermore the social basis of political competition and sweeping claims about the new politics of
