Sociobiology The New Synthesis:

Sociobiology Edward O. Wilson, 2000-03-24 When this classic was first published in 1975 it created a new discipline and started a tumultuous round in the nature versus nurture debate In the introduction to this edition Wilson shows how research in human genetics and neuroscience over the past quarter of a century has strengthened the case for a biological understanding of human nature Sociobiology Edward O. Wilson, 1982 SOCIOBIOLOGY THE NEW SYNTHESIS EDWARD O. WILSON, *Sociobiology*, 1979 *The ^ATriumph of Sociobiology* John Alcock, 2001-06-28 In The Triumph of Sociobiology John Alcock reviews the controversy that has surrounded evolutionary studies of human social behavior following the 1975 publication of E O Wilson s classic Sociobiology The New Synthesis Denounced vehemently as an ideology that has justified social evils and inequalities sociobiology has survived the assault Twenty five years after the field was named by Wilson the approach he championed has successfully demonstrated its value in the study of animal behavior including the behavior of our own species Yet misconceptions remain to our disadvantage In this straight forward objective approach to the sociobiology debate noted animal behaviorist John Alcock illuminates how sociobiologists study behavior in all species He confronts the chief scientific and ideological objections head on with a compelling analysis of case histories that involve such topics as sexual jealousy beauty gender difference parent offspring relations and rape In so doing he shows that sociobiology provides the most satisfactory scientific analysis of social behavior available today Alcock challenges the notion that sociobiology depends on genetic determinism while showing the shortcoming of competing approaches that rely on cultural or environmental determinism He also presents the practical applications of sociobiology and the progress sociobiological research has made in the search for a more complete understanding of human activities His reminder that natural behavior is not moral behavior should quiet opponents fearing misapplication of evolutionary theory to our species The key misconceptions about this evolutionary field are dissected one by one as the author shows why sociobiologists have had so much success in explaining the puzzling and fascinating social behavior of nonhuman animals and humans alike

Sociobiology: Beyond Nature/nurture? George W Barlow, James Silverberg, Frank B Livingstone, 2019-06-26 To most biologists sociobiology represents the concept of strict Darwinian individual selection married to an analytical application of ecological principles and brought to bear on social behavior in an unusually exciting and productive way Joining the biologists are a small number of social scientists But there are radically divergent views as to how the field should be delimited and sociobiology is one of the most widely discussed fields in biology and anthropology today The symposium on which this book is based was arranged by a biologist and an anthropologist The participants leaders in their fields ably present contrasting and responsible views on current issues This is the first collection of essays on sociobiology in which opposing views are aired It is an exciting timely book and an important historical document **Final Solutions** Richard M. Lerner, R. C. Lewontin, Benno Muller-Hill, 2010-11 The nature nurture debate continues to stir controversy in the social and

behavioral sciences How much of human behavior and development can be attributed to biology and how much to the environment Can either be said to determine human development And what are the implications of each view for society In this important study a noted developmental psychologist contributes to this debate by confronting the difficult issue of doctrines of human development and the consequences for society of deriving political programs and public policy from them Beginning with the premise that scientific ideas are not neutral but can be used for either good or evil Richard Lerner considers the recent history of one such idea biological determinism which at times has had the backing of respected scientists intellectuals and political leaders During this century biological determinism has been coupled with political philosophies that hold that some people are inherently better than others This has meant that certain groups of people Jews Blacks Native Americans women have been stigmatized because of supposedly innate even biological differences with sometimes disastrous consequences The most notorious instance was Nazi Germany where racial science given legitimacy by the scientific community became a cornerstone of the Nazi Final Solution Meanwhile theories of biological determinism continue to find adherents within the scientific community Konrad Lorenz who was awarded a Nobel Prize in 1973 was a critical figure in the development of the most recent manifestation of biological determinism sociobiology Lerner examines the work of Lorenz and current sociobiologists and the implications of their claims for modern society He fears that biological determinism may again be co opted to serve the political agenda of today s reactionary politicians In fact Lerner notes sociobiologists have had to face the fact that organizations such as the fascist National Front party in Britain and its counterparts in France and the United States have selectively seized upon sociobiology to fuel their notions of genetically superior and inferior races

Philosophy of Biology Alex Rosenberg, Robert Arp, 2009-04-27 By combining excerpts from key historical writings with editors introductions and further reading material *Philosophy of Biology* An Anthology offers a comprehensive accessible and up to date collection of the field s most significant works Addresses central questions such as What is life and How did it begin and the most current research and arguments on evolution and developmental biology Editorial notes throughout the text define clarify and qualify ideas concepts and arguments Includes material on evolutionary psychology and evolutionary developmental biology not found in other standard philosophy of biology anthologies Further reading material assists novices in delving deeper into research in philosophy of biology

Principles of Animal Behavior, 4th Edition Lee Alan Dugatkin, 2020-01-15 Since the last edition of this definitive textbook was published in 2013 much has happened in the field of animal behavior In this fourth edition Lee Alan Dugatkin draws on cutting edge new work not only to update and expand on the studies presented but also to reinforce the previous editions focus on ultimate and proximate causation as well as the book s unique emphasis on natural selection learning and cultural transmission The result is a state of the art textbook on animal behavior that explains underlying concepts in a way that is both scientifically rigorous and accessible to students Each chapter in the book provides a sound theoretical and conceptual basis upon which the

empirical studies rest A completely new feature in this edition are the Cognitive Connection boxes in Chapters 2-17 designed to dig deep into the importance of the cognitive underpinnings to many types of behaviors Each box focuses on a specific issue related to cognition and the particular topic covered in that chapter As *Principles of Animal Behavior* makes clear the tapestry of animal behavior is created from weaving all of these components into a beautiful whole With Dugatkin's exquisitely illustrated comprehensive and up to date fourth edition we are able to admire that beauty anew

The Renaissance of Sociological Theory Henry Etzkowitz, Ronald M. Glassman, 1991 *Shaping Science with Rhetoric* Leah Ceccarelli, 2010-11-15 How do scientists persuade colleagues from diverse fields to cross the disciplinary divide risking their careers in new interdisciplinary research programs Why do some attempts to inspire such research win widespread acclaim and support while others do not In *Shaping Science with Rhetoric* Leah Ceccarelli addresses such questions through close readings of three scientific monographs in their historical contexts Theodosius Dobzhansky's *Genetics and the Origin of Species* 1937 which inspired the modern synthesis of evolutionary biology Erwin Schrödinger's *What Is Life* 1944 which catalyzed the field of molecular biology and Edward O Wilson's *Consilience* 1998 a so far not entirely successful attempt to unite the social and biological sciences She examines the rhetorical strategies used in each book and evaluates which worked best based on the reviews and scientific papers that followed in their wake Ceccarelli's work will be important for anyone interested in how interdisciplinary fields are formed from historians and rhetoricians of science to scientists themselves

Richard Dawkins, 2006-03-16 Published to coincide with the 30th anniversary of *The Selfish Gene* this sparkling collection explores the impact of Richard Dawkins as scientist, rationalist and one of the most important thinkers alive today Specially commissioned pieces by leading figures in science, philosophy, literature and the media such as Daniel C. Dennett, Matt Ridley, Steven Pinker, Philip Pullman and the Bishop of Oxford highlight the breadth and range of Dawkins' influence on modern science and culture from the gene's eye view of evolution to his energetic engagement in public debates on science, rationalism and religion This volume which includes personal reminiscences and critical debate as well as accessible discussions of science is a stimulating tribute to a remarkable intellectual written by some of the finest writers and scientists working today

Why Gould Was Wrong Nils K. Oejjord, 2003 Stephen Jay Gould 1941-2002 was a leading critic of human behavioral genetics, human sociobiology, evolutionary psychology and the modern evolutionary synthesis *Why Gould Was Wrong* explains why Gould's claims were horribly wrong

Encyclopedia of Time Samuel L. Macey, 2013-04-11 In this encyclopedia some 200 international scholars in 360 articles explore subjects such as physics, archaeoastronomy, astronomy, mathematics, time's measurements and divisions as well as covering other scientific and interdisciplinary areas: biology, economics and political science, horology, history, medicine, geography, geology and telecommunications

Labour Theory of Culture Charles Woolfson, 2013-04-15 Despite its importance in understanding the social relations of labour little attention has been paid by Western Marxists to evolutionary theory Taking as a starting point an unfinished essay by Engels

the author argues that the human species must be seen as discontinuous with its nearest biological ancestors that a qualitative distinction was brought about by social labour It is argued that the most likely forms of human organization were co operative and field studies are discussed which apparently provide evidence for tool use and linguistic ability among the higher primates The relationship between hand and brain in terms of Marxist psychology is also elaborated **Charles Darwin** Lance Workman,2017-09-16 This book examines the history of thought surrounding the relationship between Darwinism and the behavioural sciences Accessible and thought provoking it demonstrates how and why Darwinism remains both illuminating and controversial today **Dictionary of Concepts in Cultural Anthropology** Robert H. Winthrop,1991-11-18 The field of cultural anthropology describes and interprets the thought and behavior of contemporary and near contemporary societies Inherently pluralistic it offers a framework in which the distinctive perspectives of each cultural world can be appreciated Robert Winthrop s dictionary describes the major concepts that have shaped the discipline both historically and theoretically It sets modern anthropology in its proper context within the broader intellectual tradition Eighty entries review the key concepts culture race nature symbolism adaptation the primitive etc that have established the fundamental problems and issues guided research and served as the focus for debate in key areas of the discipline The entries which range from 2 000 to 6 000 words in length are both thorough in treatment and contemporary in relevance Some entries are primarily of historical significance while others describe recent developments Each entry contains an annotated bibliography and a guide to additional reading on the subject While this is not primarily a technical lexicon many terms have been glossed and explained Designed to be useful to students of anthropology this dictionary will assist those in other disciplines to find their way through the anthropological labyrinth **Human Nature and Natural Knowledge** B. Phenomenology 1970 On First Reading L Idiot de **Violence as Seen Through a Prism of Color** Letha A See, 2018-12-20

So many parts of society target citizens of color for violence what can be done **Violence as Seen Through a Prism of Color** examines violence from a structural perspective including violence in prisons schools and colleges churches homes and within political corporate structures This unique hard hitting book argues that individual violence stems from the structure of our society and its institutions Most of the contributors are African American educators and practitioners who have a thorough understanding of structural violence Some have experienced political violence others have expert knowledge of structural violence within the criminal justice system educational institutions and elsewhere even in churches and homes Their writings are undeniably unflinchingly authentic it is impossible not to be moved and enraged by what they have to say The good news is that in addition to calling attention to the structural violence in our society they provide excellent insights on how the situation might be resolved **Violence as Seen Through a Prism of Color** shows that much of the violence within the criminal justice system stems from decisions made at the highest levels of government that minority offenders are much more frequently convicted and more harshly sentenced than their white counterparts how cultural racism contributes to the construction of motives for lynching hate crime and police violence against Americans of color such as Abner Louima Amadou Diallo and Rodney King how the judicial system encourages black on black violence by neglecting to halt criminal activities in non white neighborhoods how in the words of Mahatma Gandhi Poverty is the worst form of violence You ll also learn how corporations are amassing great wealth through privatizing prisons and conscripting the labor of non violent African American prisoners how racial profiling affects people of color how the media has exploited black men imprisoned for minor drug offenses how and why violence occurs in and against the black church Helpful charts and tables like one that names the corporations that use prison labor supplement the material you ll be surprised at what you learn Extensive references are included at the end of each chapter

Decoding the Language of God George C. Cunningham, 2010-05 Fellow geneticist George C Cunningham presents a point by point rebuttal of Francis Collins *The Language of God* arguing that there is no scientifically acceptable evidence to support belief in a personal God and much that discredits it
