Sociocognitive Approach To Social Norms:

A Sociocognitive Approach to Social Norms Nicole Dubois, 2004-01-14 Original theory based upon numerous laboratory studies and wide ranging case studies This research has had great impact in French speaking countries but there is a definite absence of information on this area in English Conceptual and methodological approach

A Sociocognitive Approach to Social Norms Nicole Dubois, 2004-01-14 Societies and groups attribute greater value to some behaviours and some judgments These norms are what is most important for understanding how behaviours and judgments are socially regulated The approach presented examines in particular the social foundations of our judgments

The Complexity of Social Norms Maria Xenitidou, Bruce Edmonds, 2014-05-28 This book explores the view that normative behaviour is part of a complex of social mechanisms processes and narratives that are constantly shifting From this perspective norms are not a kind of self contained social object or fact but rather an interplay of many things that we label as norms when we take a snapshot of them at a particular instant Further this book pursues the hypothesis that considering the dynamic aspects of these phenomena sheds new light on them The sort of issues that this perspective opens to exploration include Of what is this complex we call a social norm composed of How do new social norms emerge and what kind of circumstances might facilitate such an appearance How context specific are the norms and patterns of normative behaviour that arise How do the cognitive and the social aspects of norms interact over time How do expectations beliefs and individual rationality interact with social norm complexes to effect behaviour How does our social embeddedness relate to social constraint upon behaviour How might the socio cognitive complexes that we call norms be usefully researched

Speech, Print and Decorum in Britain, 1600--1750 Elspeth Jajdelska, 2016-03-10 Filling an important gap in the history of print and reading Elspeth Jajdelska offers a new account of the changing relationship between speech rank and writing from 1600 to 1750 Jajdelska draws on anthropological findings to shed light on the different ways that speech was understood to relate to writing across the period bringing together status and speech literary and verbal decorum readership the material text and performance Jajdelska's ambitious array of sources includes letters diaries paratexts and genres from cookery books to philosophical discourses She looks at authors ranging from John Donne to Jonathan Swift alongside the writings of anonymous merchants apothecaries and romance authors Jajdelska argues that Renaissance readers were likely to approach written and printed documents less as utterances in their own right and more as representations of past speech or as scripts for future speech In the latter part of the seventeenth century however some readers were treating books as proxies for the author's speech rather than as representations of it These adjustments in the way speech and print were understood had implications for changes in decorum as the inhibitions placed on lower ranking authors in the Renaissance gave way to increasingly open social networks at the start of the eighteenth century As a result authors from the lower ranks could now publish on topics formerly reserved for the more privileged While this apparently egalitarian development did not result in imagined communities that transcended class readers of all ranks did encounter new models of reading and writing and were empowered to engage legitimately in the gentlemanly criticism that had once been the reserve of the cultural elites

International Law's Invisible Frames Andrea Bianchi, Moshe Hirsch, 2021-09-23 What is international law and how does it work This book argues that our answers to these fundamental questions are shaped by a variety of social cognition and knowledge production processes These processes act as invisible frames through which we

understand international law To better conceive the frames within which international law moves and performs we must understand how psychological and socio cultural factors affect decision making in an international legal process This includes identifying the groups of people and institutions that shape and alter the prevailing discourse in international law and unearthing the hidden meaning of the various mythologies that populate and influence our normative world With chapters from leading experts in the discipline employing insights from sociology psychology and behavioural science this book investigates the mechanisms that allow us to apprehend and intellectually represent the social practice of international law It unveils the hidden or unnoticed processes by which our understanding of international law is formed and helps readers to unlearn some of the presuppositions that inform our largely unquestioned beliefs about international law
